DEATH CALLS ANOTHER PIONEER

Perry Leamer Answers the Final Summons.

Perry Leamer, for forty-three years an esteemed and respected citizen of this precinct, passed away at his home two miles southwest of this place Wednesday morning, August 10, 1910, at 7 o'clock. He had been ill more or less for the past two years, and his death resulted from infection due to cystitis.

Perry Leamer was born at Hollydaysburg, Pa., June 18, 1834, and was 76 years, 1 month and 22 days old. He came to Dakota county in 1867 and located on the farm, near this place, which has been his home during all these years; where he had reared his family, seeing them grow to noble manhood and womanhood, and where he finally answered the summons that comes to us all. During his early life he had accumulated a competence by coming into possession of a finely situated Dakota county farm, which he equipped with a commodious residence and convenient farm buildings.

His wife, who accompanied him to this county, preceded him to that other world eight years ago.

Mr. Leamer was the father of ten children, seven of whom survive him. They are—Mrs. Will Brodyhill, Mrs. Ollie Hale, Mrs. George Warner and William Leamer, of Homer; Mrs. William Abbott of Burlington Junction, Mo., Mrs. Thomas W. Gribble and Frank Leamer, of this precinct.

Mr. Leamer was a man whose friends were numbered by his acquaintances, his kindly, genial disposition winning the confidence and esteem of all with whom he had business relations. While his death will be a shock to the community, the loss to the bereaved family will be more deeply and keenly felt. But his trust was in God who doeth all things for the best, and to Him we will consign his fate.

The funeral services were held on Thursday afternoon at 2:30 o'clock from the Evangelical Lutheran church in this city, where the deceased had held his membership for many years, and were conducted by Rev. S. L. Keller. Interment was in the family lot in the Dakota City cemetery.

NEBRASKA

Very few people have any idea of the productivity of Nebraska. They have some comprehension of the gold output of the nation and of the several states. They think of the copper output as something wonderful. They think of the tobacco crop as one of the nation's great resources. Yet they utterly fail to realize that Nebraska produces in grains and grasses more wealth than the gold mines, the copper mines or the tobacco plantations.

Wonderful stories have been told of the Alaskan mines, and thousands have been lured to the mountains of the west and the frozen wastes of Alaska by the glitter of the yellow metal. But in 1909 the corn crop of Nebraska was worth \$5,000,000 more than all the gold mined during the same year in the entire United States, including Alaska and the Philippines.

We have heard about sugar and its protection until we are apt to imagine that the sugar crop of the United States is something magnificent in its proportions. But the 1909 wheat crop in Nebraska was worth \$5,700,000 more than the entire sugar production of the United States during the same year.

Texas is a great state, and it takes the lead in cotton production. We have heard a great deal about "King Cotton," but the 1909 oats crops in Nebraska was worth \$4,500,000 more than the 1909 cotton crop of Texas.

Kentucky is the greatest tobacco producing state in the Union, and we are apt to believe it means more to Kentucky than any grain crop means to Nebraska. But the 1909 egg crop in Nebraska was worth \$500,000 more than the 1909 crop of Kentucky tobacco.

Rockefeller acquired his wealth from petroleum, and we are apt to imagine that the crude petroleum product is something surpassing the entire product of Nebraska's fields and stockyards. Not so! In 1909 the Nebraska live stock product was worth \$9,000,000 more than the total crude petroleum product of the United States for the same year.

Illinois is one of the great coal producing states of the Union, and coal is one of the boasted products of the Sucker state. But Nebraska wild and tame hay in 1909 was worth \$14,000,000, more than the 1909 output of Illinois coal.

Nebraska butter in 1909 was worth \$3,000,000 more than the total gold and silver output of Colorado's mines for the same year.

Nebraska live stock, cereals, grasses, butter, eggs, fruit and poultry in 1909 was worth as much as the Nation's output of bituminous coal, save the output of Illinois, mentioned above.

The 1909 potatoes of Nebraska were worth \$1,800,000 more than the 1909 output of Arizona's gold and silver mines.

Nevada is a great mining state, but her 1909 output of gold and silver was worth \$1,000,000 less than Nebraska's 1909 crop of alfalfa.

Nebraska's total addition to the material wealth of the nation, in the shape of live stock, dairy products, poultry, eggs and manufactured goods was worth \$98,000,000 more than the total cotton crop of the Nation.

We hear much of the iron and steel industry, but Nebraska beef and pork in 1909 was worth \$45,000,000 more than the product of iron ore of the nation, valued at the mines.

Nebraska's 1909 wild hay crop was worth \$9,000,000 more than the 1909 output of Alaska's gold mines.

Isn't it a wonderful state? And isn't it our duty to spread a knowledge of it abroad to the land hungry and industrious peoples of the earth?

"Massachusetts, there she stands!" exclaimed Daniel Webster in his famous Dartmouth college speech. Correct—there she stands. And there she will have to stand until she pays back to the school children of Nebraska the \$1,000,000 she borrowed from them.

Great are the steel rail mills of Pennsylvania—but the eggs laid by Nebraska hens in 1909 would, if laid end to end in a double row, reach three times as far as all the steel rails rolled in Pennsylvania mills during the same year.

Loaded into standard freight cars the agricultural, live stock and dairy products of Nebraska would make a train twice as long as all the new railroads built in the United States in 1909—and there were approximately 5,000 miles of new railroad built in that year.

One of the youngest, Nebraska is also one of the greatest states in the Union. Let us all work together for the upbuilding of Nebraska, and one way to accomplish the best results is to spread abroad the real facts about this beloved state of ours.

Wealth in Irrigation

Congress has just appropriated Twenty Million Dollars to hasten the work of Government Irrigation.

The Government Shoshone Project in THE BIG HORN BASIN

will receive its share and be pushed to completion at once. Contracts for a 12-mile extension of the main canal were let June 27. More than 150 farms now ready for settlers, and a large number of farms are now being surveyed, which will be open to entry within a few weeks.

The rich lands, irrigated by the Government, can be home-steaded by simply repaying the government actual cost—\$45 per acre, in ten yearly payments, without interest.

15,000 Acres of Carey Act Lands just opened to entry—only 30 days residence required. Under this law settlers buy water from the irrigation company at \$50 per acre, and the land from the state at 50 cents per acre, paying \$10 per acre cash, the remainder running over a period of 10 years at 6%.
