CHILDREN CAN MAKE A TENT

By Following Directions Herewith Given Little Folks Can Construct Shady Place.

A tent can be made by children very easily and quickly without outside help. Get three old sheets or shawls, a rope and some safety pins and follow the illustration shown herewith and the directions as follows: Tie the rope between two trees, so that you walk under it without touching your head. Throw a sheet or shawl over it. Tie four strings as long as yourself to each corner of the sheet, one on each corner, as the illustration shows, says

A Simple Tent.

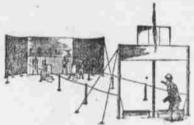

Popular Home Journal. One the other end of each string tie a pointed stick of pretty good size, and strong. Drive these sticks into the ground as far from the rope as you can. The sheet will now make a good roof. Two more sheets are now used for the sides of the tent. Each sheet makes an end and one side.

Use safety gins to pin up these sides. The hole at each end of the tent under the roof is necessary to keep it coo! and comfortable. Most tents are very stuffy and hot, but this tent will be found very satisfactory and answer the purpose as well as the average tent which one is apt to purchase. It is advisable to use a pretty strong rope to tie between the trees; it should not have any more slack than is shown in the illustration. The cords used at the four corners should be strong, also, to prevent a sudden gust of wind from wrecking the tent.

TO TRAIN BASEBALL PITCHER

Equipment Arranged So That When Ball Strikes Umpire It Will Ring Electric Bell.

The illustration shows a patented device of Harry E. Hire, Mark Center, O., which is to be used as a training equipment for pitchers in the game of baseball, says Popular Electricity. The screen at the back represents the grand stand and catcher. At the proper distance in front of it

Training Baseball Pitchers.

placed a figure representing the player at bat. The home plate is provided and just behind it a padded frame which is called the "umpire." Balls thrown by the pitcher if passing over the home plate as they should will ring a bell, the circuit of which is closed when the ball strikes the umpire.

MOUSE TRAP IS VERY USEFUL

Easily Made by Placing Plece of Stout Paper Over Top of Earthenware Jar.

If you have no cat and find the mice in your house getting altogether too bold for comfort, or if you would like to keep some mice for pets, a homemade trap will catch them.

Over the top of an earthenware jar fasten a piece of writing paper, tightly binding it with a string or elastic band. In the center of the paper cut a cross. Set the jar in the closet, and suspend by a string a piece of cheese over the center of the jar, and lean something against the jar so that the 9:30?" mice can reach the top. If there are attract them, but just as soon as the first mouse reaches the center of the paper he will drop into the jar and so can I. the paper will fly back into place again, ready for the next comer. A trap arranged in the same manner can the stark fact that 21 worked two be used for the capture of field and ways. harvest mice, which make odd and wasing pets.

A barrel covered with stiff brown paper can be used for common rats, but they will gnaw out unless the barrel be partly filled with water.

Squeiching a Young Officer. Some years ago Queen Maud of Norway was staying with the late Queen Victoria at Osborne, and went to a bazar at Shanklin, where she was assisting at one of the stalls. Presenty a young military officer walked up to the stall and making some small purchase tried hard to get into conversation with her royal highness. His efforts failed, but he made one last effort: "I am sure I know you," he said, "do your people live about here?" "No, I am staying with my grandmother," was the princess' reply. "Oh, I daresay I know her, then; I know most of the people about here," said officer, rather patronizingly. What's her name, by the way, I will jook her up?" "Queen Victoria," was the reply.

An Accident. big brother has a bicycle. Ruth heard gant word. all sorts of conversation about "tires," "gears," and other bicycle terms. One at looking pin. Above her screams got a puncture!"

SONG OF A PAIR OF SHOES.

wenty littlé beds in rows of ten, wenty little roly poly men, Little black men go to bed by day-I must put them in and make them stay.

Naughty little black man, Go to bed I say! Deary me, there you see— Now he's run away; On the floor, by the door, See him try to hide. All the other black men Sleeping side by side.

I wenty little beds in rows of ten, Only nineteen roly poly men, I've a little bed to spare today. Naughty little man to run away!

Naughty little black man Left an empty space!
Never mind, he will find
Some one takes his place.
Nurse has got quite a lot Like the ones I lose-Little roly black man, Buttons on my shoes

OLD BOOKS FOR CHILDREN

Writing Was Covered With Sheet of Horn to Protect Lettering From Dirty Fingers,

The earliest English book for children was "The Babies' Book, or a Lyttl Report of How Young People should Behave." The horn books existed in Elizabeth's reign. The writing was covered with a sheet of horn in order to protect the lettering from contact with dirty fingers.

The chap book contained most of the familiar nursery rhymes and stories which have appertained to nurscry lore for generations. They exhibit very crude woodcuts, often daubed with inappropriate color, and the commonest paper as a rule was used. They were hawked about by the chapmen or pedler and cost only a few pence apiece.

They served to perpetuate such fa miliar dittles as "Sing a Song of Sixpence," which dates from the sixteenth century; "Three Blind Mice," in use, with music, in 1609; "Tho Freg and the Mouse," in existence in 1580; and "Girls and Boys Come Out to Play," which was sung by the vilagers in the time of Charles H .; 'Little Jack Horner," we know, Is older than the seventeenth century; and last but not least, "Lucy Locket," the tune from which originated "Yankee Doodle."

A few of what were called "battledore books" have been handed down to us. They were three leaved cards which were folded up into oblong pocked shaped pieces. These taught reading and numerals in the dame schools in town and country. The little gilt books, as they were called, adorned on the outside with gilt Dutch paper colored flowers, were much

prized gift books of that period. According to the Queen, children vere employed coloring such picture books by hand, one child doing all the red in the series of illustrations, another all the blue, and so on. Of course they gained precision by repeition, but we very often find the tints overlapping, as if carried out by an nexperienced hand.

WORKING TWENTY-ONE RULE

Young Man Thought He Could Do as He Pleased, but Found Out Father Could, Too.

Old Jacob Weatherly is a man of extreme regularity, and on the principle that "Early to bed," etc., is the best guiding rule for a household, he insists that everyone under his roof and authority shall retire at 9:30. As may be readily understood, this rule sometimes proved irksome to the younger members of the family, espedally Charles.

Recently, however, Charles reached man's estate, and on his birthday Jacob gave him a blessing.

"I have no longer any authority over you," he said; "now that you are 21 you must act as pleases you best." On the following Saturday evening, therefore, Charles returned home at 11:15 p. m., and rapped at the door. "Who's that?" said Jacob from the

"Charles," replied his son. "But why do you come home at this

hour? Don't you know we lock up at "Yes," remonstrated the youth; "but any mice in the closet the bait will I'm gone 21 now, and can do as I

please. "Quite so," said the old man; "but

And the window went down with a bang, and Charles was left to face

SOME QUEER FOODS LAND OF JAMES DESOLATION

FASHIONS IN EDIBLES VARY WITH TASTE AND CONDITION.

What to One Race Will Seem Natural and Toothsome Article of Diet Might Seem to Others Repulsive.

Fashlons in foods vary as do most of man's needs with taste and circumstance. It has been truly said that "one man's meat is another man's poison." What to one race of people will seem a perfectly proper and natural and toothsome article of diet will to others seem repulsive, and climatic conditions will afford some explanation of the varying nature and amount required for human sustenance. Thus the intense cold of the Arctic regions will explain why the Esquimo are able not only to eat and drink substances as foreign to our tastes as walrus, frozen seal and trainoil, but to gorge themselves to a disgusting extent; Sir John Ross said that an Esquimo "perhaps cats 20 pounds of flesh and oil daily." But climatic considerations do not explain why some tribes in tropical regions can exist almost solely on a meat diet, or why others in Africa and Polynesia should indulge in the horrible and degrading practise of cannabilism.

The flesh of the samel is eaten with relish in some parts of Africa, but is alleged by Arabs to produce serious disorders of the stomach. One was eaten during the siege of Paris, and is said to have tasted like veal. A camel's hump is considered something of a delicacy by many desert tribes. Crocodiles are eaten by a few African tribes, as also their eggs. Dr. Livingstone wrote: "To us the idea of tasting the musky-scented, fishylooking flesh carried the idea of cannibalism." Of crocodiles' eggs he said: "In taste they resemble hen's eggs with perhaps a smack of custard, and would be as highly relished by whites as blacks were it not for their unsavory origin in man-eaters." The toad is also an article of diet with some negro races. The crested Basilisk, a reptile upwards of a yard in length, is eaten by the inhabitants of Amoboyna and the East Irdian arch-Ipelago.

The insect world is also called upon to contribute to the dietary of our more or less colored brethren. Spiders are eaten by the natives of New Caledonia and the bushmen of South Africa, who also eat grasshoppers. Locusts are eaten in great quantities, both fresh and salted, by Persians, which they feed.

Hammond's Peculiar Preference. John Hays Hammond, the mining ing through the state of Texas when cate ears. Hammond arose at that ungodly hour and went out to the observation plat-

form of his car to see the comet. On the platform he found two tramps and spoke to them cordially. They told him where they were going and thanked him for his politeness.

"You fellows wait here a minute and I'll get you some cigars," said

Hammond When he produced the smokes one of the tramps said:

Traveler Relates His Experience in Harrowing Trip Through Terrible Wilderness.

"The country I was now approach ing," said the travler, "was desolate

and dreary in the extreme, "I was proceeding down a great rocky canyon, from which at irregular intervals ravines led to the right and left. Great mountains of stone rose before and behind me, apparently blocking my path, but far ahead could see a faint streak of daylight which showed me there was an out let to the deep defile.

"Although there were evidences of human habitations I could not see a soul. Occasionally, far off, I could hear sounds which resembled someeven disgusting. The exigencies of what the toot of a steamboat whistle, and his made me think I was near the sea or some great river.

"Once in awhile I heard what to my imagination sounded like the clanging of bells, but though I looked carefully into several of the ravines could see nothing that resembled human life. At other times I seemed to hear shrill, hoarse cries at a great Matance.

"I was parched and thirsty from my long walk and the stones were rough and my feet were weary, but still there seemed no end to the length of that interminable deserted canyon. panted for water, but the rocks yielded none. I longed for a drink of whisky, but my flask was empty and there was no place to replenish it.

"Still I stumbled blindly on knowing that to pause there and tamely submit to the desolate surroundings would be folly. So on and on through the terrible wilderness I plodded and trudged, hoping against hope I would soon see some sign of the buman life which had left its footprints and handlwork all around me."

"Great heavens!" cried the listener. "Where was this terrible, desolate country-in Alaskan mountains or

the wilds of Arizona?" "Neither," replied the traveler, with a smile, "I was walking down lower Broadway in New York at seven o'clock at night when every one had gone to the other end of the Island te get dinner.'

Lifting Cats and Rabbits. It is a mistaken idea that the prope way to lift a full grown cat is by the nape of its neck without supporting the lower part of its body with the other hand. It is true that the mother cat carries young kittens by grasping in her mouth the loose skin at the back of her offspring's neck, but a tiny kitten is a very different matter from a large cat, and indeed the only Egyptians and Arabians. Diodorous way to lift a kitten without squeezing Siculus and Ludolphus both refer to or hurting its soft little body is to the locust as an article of diet. The lift it by the neck. But after it has latter remarks: "For it is a very grown larger its own weight is too sweet and wholesome sort of diet, by great to be supported by such a bit of means of which a certain Portuguese skin and fur as is so grasped by the garrison in India that was ready to band, and many a cat suffers perfect yield for want of provisions held out tertures by being held in this mantill it was relieved another way." Lo- ner and is quite helpless to run or custs have a strongly vegetable taste, struggle, as in such a position certain the flavor varying with the plants on of its muscles cannot be controlled and it is absolutely at the mercy of its

unfeeling tormentor. The same rule should be observed in lifting rabbits by their ears. GOOD WORK IS PROGRESSING

Women in Every State Join Earnestly in Campaign Against Tuberculosis.

Four years ago the only active women workers in the anti-tuberculosis movement were a little group of about 80 women's clubs. Today 800,000 women, under the United States, are banded together against this disease, and more than 2,000 clubs are taking a special interest in the crusade. Not less than \$500,000 is raised annually by them for tuberculosis work, besides millions that are secured through their efforts in state and municipal appropriations. Mrs. Rufus P. Williams is the chairman of the department that directs this work. In addition to the work of the General Federation of Women's Clubs, the Public Health Education committee of the American Medical association, composed largely of women physicians, has carried on an educational campaign of lectures during the past year in which thousands have been reached. The Mothers' congress, the Young Women's Christian association, and many unattached clubs bring the number of women united in the tuberculosis war to well over a million. There is not a state in the union where some work has not been done.

IN AGONY WITH ECZEMA

"No tongue can tell how I suffered for five years with itching and bleeding eczema, until I was cured by the Cuticura Remedies, and I am so grateful I want the world to know, for what helped me will help others. My body and face were covered with sores. One day it would seem to be better, and then break out again with the most terrible pain and itching. I have been sick several times, but never in my life did I experience such awful suffering as with this eczema. I had made up my mind that death was near at hand, and I longed for that time when I would be at rest. I had tried many different doctors and medicines without success, and my mother brought me the Cuticura Remedies, insisting that I try them. I began to feel better after the first bath with Cuticura Soap, and one application of Cuticura Ointment.

"I continued with the Cuticura Soap and Cuticura Ointment, and have taken four bottles of Cuticura Resolvent, and consider myself well. This was nine years ago and I have had no return of the trouble since. Any person having any doubt about this vonderful cure by the Cuticura Remedies can write to my address. Mrs. Altie Etson, 93 Inn Road, Battle Creek, Mich., Oct. 16, 1909."

WESTERN CANADA'S 1910 CROPS

Wheat Yield in Many Districts Will Be From 25 to 35 Bushels Per Acre

Land sales and homestead entries increasing. No cessation in numbers going from United States. Wonderful opportunities remain for those who intend making Canada their home. New districts being opened up for settlement. Many farmers will not, this year, \$10 to \$15 per acre from their wheat crop. All the advantages of old settled countries are there. Goed schools, churches, splendid markets, excellent railway facilities. See the grain exhibit at the different State and some of the County fairs.

Letters similar to the following are received every day, testifying to satisfactory ittions; other districts are as favorably spoken of: THEY SENT FOR THEIR SON. Maidatone, Sask., Canada, Ang. Sth. 1916.
"My parents came here from Cedar Falls, lows,
four years ago, and were so well picased with this
country they sout to Coeur d'Alene for me. I have
taken up a homestead near them, and am perfectly
satisfied to stop here."
Leonard Douglas,

WANTS SETTLER'S RATE FOR HIS STOCK. "Well I got up here from Forest City, lows, last Spring in good share with the stock and everything. Now, I have got two bors back in lows yet, and I am going back there now soon to get them and another car up here this fall. What I would like to know is, if there is any chance to get a cheap rate back again, and when we return to Canada I will call at your office for our certificates."

Your struly, H. A. Wik.

WILL MAKE HIS HOME IN CANADA. Brainerd, Minn., Aug. 1st, 1916.
"I am going to Canada a week from today and intend to make my home there. My husband has been there six weeks and is well pleased with the country, so he wants me to come as soon as possible. He filed on a claim near Landis, Sask, and by his description of it it must be a protty place.

My prother-in-law. Mr. Frank J. Zimmer, lives these and it was through him that we decided to locate in Canada."

Yours traly.

Mrs. Blichard Henry Bbinges. Taxlors Falls, Minn., Ang. 7, 1912.

"I shall go to Camrose this Fall with my cattle and household goods. I got a poor crup here this year and my brother-in-law, Azel Nordation in Camrose, wants me to come there. He formerly lived by Wilton, North Dakota. I am going to buy or take homestead when I get there, but I do not want be travel two times there, for I take my brother-in-law word about the country, and want to get your low rate."

Poter A. Nelson. TAKES HIS RECTHER-IN-LAW'S WORD FOR FR.

WANTS TO RETURN TO CANADA. "I went to Canada nine years ago and took up marter acction of rathroad land and a homesses set my boys have never taken up any land yea will hold the railread land. I had to come back the matter on account of my health. Please let a now at once if I can get the cheap rates to Pomos tiberta."
