The American Home WILLIAM A. RADFORD Editor

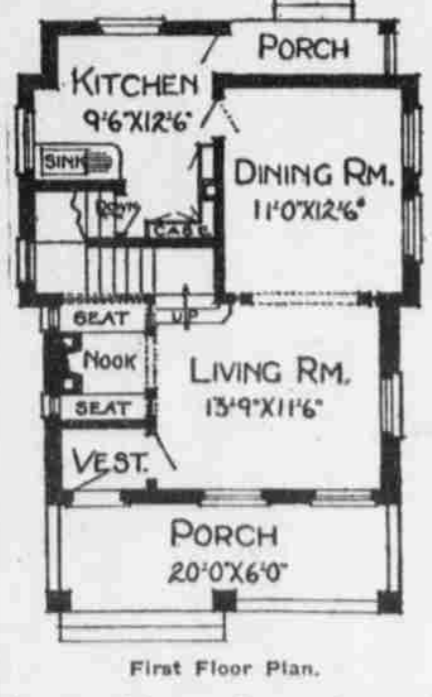

Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on all subjects pertaining to the subject of building for the readers of this paper...

It is frequently asserted that the people of the middle west have not developed the particular art...

The public in general is being educated in the uses of cement and its value and economy as a home-building material...

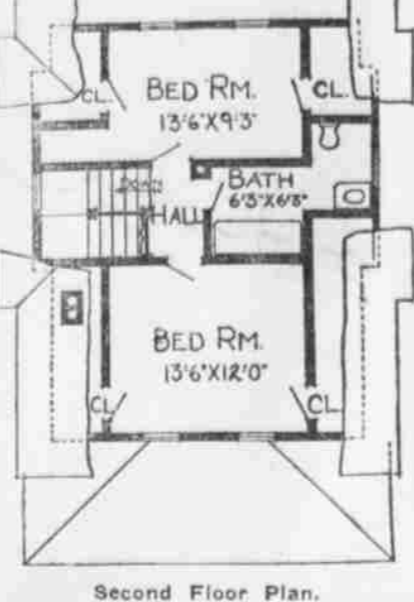

from that form of building material. The common objection to the block is its sameness...

block would prove damp and unsanitary has been removed. The house shown in this connection is a combination of the block construction and the plaster house...

Imagine being snugged up in that nook on a cold winter night when the wind is howling outside...

all aspect when we build a home to keep it for a lifetime, but in the experience of many the time comes by change of fortune...

A rigid realism would make dramatic performances impossible. Just as the poet puts words into Juliet's mouth...

which that ineffectual Danish prince could not have mastered in a lifetime of facial exercises...

Young Men's Buddhist Association. Japanese Buddhism is remarkable for the great number of sects into which the believers are divided...

Sure They're Edible and Fresh. "Will you have some fresh mushrooms?" asked the hostess sweetly...

Social Change Present Age Not Less Sordid Than Others

DO NOT BELIEVE myself that this age is less spiritual or more sordid than its predecessors...

Some point of contact they must have with the world in which they live, and if their influence is to be based on widespread sympathy...

The material world, however it may have gained in sublimity, has, under the touch of science, lost in domestic charm...

The appropriate remedy is the perpetual stimulus which the influence of science on the business of mankind offers to their sluggish curiosity...

If our outlook upon the universe has suffered modifications in detail so great and so numerous that they amount collectively to a revolution...

But science is the great instrument of social change, all the greater because its object is not change but knowledge...

It may seem fanciful to find in a single recent aspect of this revolution an influence which resembles religion or patriotism...

A social force has come into being, new in magnitude if not in kind. This force is the modern alliance between pure science and industry...

That on this we must mainly rely for the improvement of the material conditions under which societies live is, in my opinion, obvious...

Promote Good Health and Long Life By H. L. PIERCE

How shall we eat and drink for the attainment of health and long life? I understand it is the rule among school teachers...

Let us begin now to teach the child how to eat and drink for health, strength, endurance, efficiency and gustatory satisfaction...

It is hard for a man who tries to adhere to the niceties of the English language to comprehend a good deal of the talk he hears nowadays...

Difficult to Keep Pace With Slang By PROF. SIDNEY A. OSGOOD of Boston

"For heaven's sake," thought I, "what did the man mean by a 'run-in'?" Later I gathered from his conversation...

Your Boy's Life's Work What Shall It Be?

FARMER. Not the traditional sort, but the scientific farmer, the man who is equipped to enjoy a free and prosperous life...

Don't turn up your nose when a friend suggests that you encourage your boy to take up farming for his life-work...

A recent letter from D. J. Crosby, government specialist in agricultural education, to the writer contained this:

For those engaged in agricultural occupations—the farmers, dairymen and fruit growers, and their sons and daughters who are unable to leave home during the busy seasons...

Not That Kind of Faith. "Things says he believes in meeting the exercise of one virtue with another."

Made Good. "You claimed that that preparation would blanch his gray hairs!"

the importance of agriculture that in nearly all states it is taught in the common schools. A typical four-year high school agricultural course includes such subjects as study of the seeds of grasses, grains, and vegetables...

Another important phase of present day agricultural education is the farmers' institutes, of which over 15,000 are held annually under state or government auspices...

Just to show what can be achieved by a man that is determined to be a scientific farmer, note this: A man who has followed the ministry and was ordered by his physician to get into an outdoor occupation...

After he had got all the education he feels he can afford he reaches the problem of how to get a farm. There is no end of avenues...

Mostly any sturdy young man can get a job on a farm, the requirements are so obvious and simple; but with the scientific training he has had he will probably have a situation offered him or another avenue will be opened up some time before he leaves school...

Anyhow, your boy's place as a scientific farmer will be an enviable one, particularly as nowadays owing to improvements in all lines of activity, every farm in a populated section can have its own telephone and running water, and trolley lines that will take your boy to the city in a short time...
