trish Legislator Even Withdrew the Words That He Was About to Utter.

There is in congress a western representative of Celtie origin who has more than once "stirred up the animals" by his propensity to bait the opposition.

On one occasion he rose to demounce the statements made in a speech that had been delivered by a member of the other party. His impetuosity led him to phrase his remarks rather strongly.

"Order, order!" exclaimed the speaker, pounding with his gavel. Again, in a minute or two, did the non of Erin return to his charge of wilful misstatement. Again was he

called to "order." It was a critical moment. His col leagues, for motives of policy, did not wish him to be put out of the debate, so they binted so by tugging vigor ously at his coat tails.

Now, it's a very dangerous matter to trifle with the talls of an Irishman's coat, save in the cause of friendship. Nevertheless, the indignant yet good natured member recognized the command of his party and sat down after delivering this Parthian dart: "I obey the ruling of the House, and

I beg to retract what I was about to observe!" That one touch of Irish oratory took

SYNOPSIS.

Captain Nathuniel Plum of the sloop Typloon, lands secretly on Beaver island, Lake Michigan, stronghold of the Mormons. Obadish Price, an eccentric old man and councilor of the Mormons, who has been spying on him, suddenly confronts him and tells him he is expected. Plum insists he has got the wrong man. Price ignores his protestations and bargains for the ammunition on board the sloop. He blinds Nat by a solemn oath to deliver a package to Franklin Pierce, president of the United States. He agrees to show Plum the Mormon town, St. James. Plum sees the frightened face of a young woman in the darkness near Price's cabin. She disappears, leaving an odor of lilacs. It develops that Plum's visit to Beaver island is to demand settlement from the king, Strang, for the looting of his ship some time previously by men whom he suspected of being Mormons. Burke, his mate, has been left in charge of the sloop with orders to bembard St. James if the captain does not return within a certain time. Price takes bouse, and through a window he seem Strang and his seven wives, among whom is the lady of the lilacs, who Price says is the seventh wife. Price's actions lead Plum to believe that he is jealous of Strang. Plum calls at the king's office where a young woman warns him that his life is in danger, and urges him to return to his ship. He refuses, Strang receives Plum cordially professes great indignation when he hears the captain's streamer and reconsists to investigate and

grievance and promises to investigate and punish the guilty. CHAPTER IV .- Continued ..

"Ah, you wish to see the whipping?" The king smiled his approval. "That is one way we have of punishing slight misdemeanors in our kingdom, Captain Plum. It is an illustration of our to Captain Plum.

Her whole attire was one to add to her childish appearance. Her hair, which was rather short, fell in lustrous dark purls about her face and upon her neck. She were a fitted coat-like blouse, and knee skirts which disclosed a pretty pair of legs and ankles. As Strang was returning with the paper which she handed to him the girl turned her face to Captain Plum. Her mouth was formed into a round red O and she pointed anxiously to where she had thrown the note. The king's eyes were on his

paper and Nathaniel nodded to assure her that he understood. "I am like a gardener who compels every passing neighbor to go into his back yard and admire his first sprouts," laughed the prophet jovially. "What did Casey tell them?" gasped Nathaniel.

Obadiah hunched his shoulders. "Enough to warrant a bullet through your head, Nat. Cheerful, isn't it? But we'll fool them, Nat, we'll fool them! You shall board your ship and hurry away with the package, and then you shall make love to Strang's wife-for she will go with you!"

He stopped to enjoy the amazement that was written in every lineament of the other's face, "She will go with me, councilor!

And why?" Obadiah had laughed softly as he watched the change. Suddenly he erked himself erect.

MODEL CITY IN THE WEST

Statistician Sees Ideal Community Where There is an Abundance of Sunshine,

"I believe that the model city of the world will be built in the desert coun try of the west. Civilization and mud do not mix. It takes sunshine and plenty of it to make people cheerful and successful. It is not so very well known that the United States government is building new towns on a cooperative basis that represents as near an approach to Utopia as can be reached."

C. J. Blanchard, statistician of the United States Reclamation service, made these statements in announcing the opening of a new town in Montana, to be known as Pompey's Pillar, and an auction of 200 acres, subdivided into town lots, at Rupert, ld., a thriving young "model town," whose greatest needs just now are a hotel, an ice factory, a cannery and a sugar factory.

"I have been accused of being visionary," said Mr. Blanchard. "But there are today graded schools and telephones and even trolley cars where, when I first expressed my faith in the future of the reclamation work, there were only sage-brush plains.

"But in the near future there is to be realized in the communities like that at Rupert something that it new in rural life. That is, public ownership of power-producing plants that will furnish electricity at the absolute ost of production

"Here is a beginning of a co-opera ive plan of government that will ap proach ideal conditions. Co-operation also exists in every other phase of life in the government irrigation projects. Where the welfare of all depends upon the same conditions you are bound to have mutual interest.

"Here is a growing city in the heart of a thriving agricultural community with sunshine the year round. One of these model towns which we are developing under these promising conditions-1 don't know which one it is going to be-is to become the model city

'It will be a city without congestion without palaces or poorhouses and with co-operation very highly developed. One of the conspicuous features of these western communities, even the rougher ones, is the absence of petty crime. People don't have to nail down the windows of their houses or lock their doors, even.

Iron Road Pavements.

In the last few years decided improvements have been made in highway construction. The development of the automobile has done much to further new discoveries in road making. The French have begun the use a paving material consisting of fron shavings, or iron excelsior embedded in concrete. The metallic shavings come in sheets or masses which are broken apart with difficulty owing to the interwining of the fliaments, and which are somewhat elastic. In the construction of paying blocks a mold is filled with these Iron shavings and the interstices are filled with cement sufficiently fluid to penetrate the entire mass. The blocks thus formed possess great strength and resistance to abrasion. They are also elastic under blows of jarring. They are said to have a resistance to compression of about 150,000 pounds to a square inch, and a tensile strength four times that of cement. The cost of construction is said to be the same as that of ordinary mac-
