CANADA THE LAST WEST

Now Offers More and Better Opportunities Than Any Other Country in the World.

The west, as far as the United States is concerned, is gone. The young man looking for a future and the old man looking for a place to build a home for himself and family at the lowest possible expense and effort are turning to the large, broad and easily cultivated fields of western Canada, which can now be bought at very reasonable prices. It is the present day land of opportunity. Fifteen or twenty years ago land in the western states could be bought cheap but not any more. With development comes advance in land values. So it will be with Canada, but the man who buys cheap land in Canada now will not have to wait fifteen or twenty years for the advance. He will realize quicker returns than the man who bought cheap western lands in the United States. Things are done quicker or more rapid. The Canadian Transcontinental Rail Roads have arranged to spend \$500,000,000 in western Canada immediately. That's a demonstration of faith in this new country, that puts to rest all questions of doubt as to progress and development. With railroads comes population and with population comes increase in land values. In western Canada, there are all kinds of good cheap land, especially in the Saskatchewan district, which has proven to be the most fertile wheat producing country in the world. Good wheat lands in this district can now be bought for as low as \$16.00 to \$22.00 per acre, and on easy payments at that.

We own over 100,000 acres in the fertile Saskatchewan district, and it will pay any man who is looking for a good investment or an opportunity to get a home and farm cheap to write us for our book called "The Guide to the Last West." This book tells you all you want to know about Canada and a copy will be sent to anybody free of charge. Just send your name and address. Last Land & Development Co., Norfolk, Nebraska.
