> SHE QUIT COFFEE And Much Good Came From It.

It is hard to believe that coffee will put a person in such a condition as it did a woman of Apple Creek, O. She tells her own story:

"I did not believe coffee caused my trouble, and frequently said I liked it so well I would not quit drinking it, even if it took my life, but I was a miserable sufferer from heart trouble and nervous prostration for four years.

"I was scarcely able to go around at all. Had no energy, and did not care for anything. Was emaclated and had a constant pain around my heart until I thought I could not endure it. I felt as though I was liable to die any

"Frequently I had nervous chills and the least excitement would drive sleep away, and any little noise would upset me terribly. I was gradually getting worse until finally one day, it came over me, and I asked myself what is the use of being sick all the time and buying medicine so that I can indulge myself in coffee?

"So I thought I would see if I could quit drinking coffee, and got some Postum to help me quit. I made it strictly according to directions, and I want to tell you that change was the greatest step in my life. It was easy quit coffee because I had the Postum which I like better than I liked the old coffee. One by one the old troubles left, until now I am in splendid health, nerves steady, heart all right, and the pain all gone. Never have any more nervous chills, don't take any medicine, can do all my housework, and have done a great deal besides.

"My sister-in-law, who visited me this summer had been an invalid for some time, much as I was. I got her to quit coffee and drink Postum. She gained five pounds in three weeks, and I never saw such a change in anyone's health."

SYNOPSIS.

Elam Harnish, known all through Alaska as "Burning Daylight," celebrates his 30th birthday with a crowd of miners at the Circle City Tivoli. The dance leads to heavy gambling, in which over \$100.00 is staked. Harnish loses his money and his mine but wins the mail contract. He starts on his mail trip with dogs and sledge, telling his friends that he will be in the big Yukon gold strike at the start. Burning Daylight makes a sensationally rapid run across country wins the mill, appears at the Tivoli and is now ready to ioin his friends in a dash to the new gold fields. Deciding that gold will be found in the up-river district Harnish buys two tons of flour, which he declares will be worth its weight in gold, but when he arrives with his flour he finds the big flat desolate. A comrade discovers gold and Daylight reaps a rich harvest. He goes to Dawson, becomes the most prominent figure in the Klondike and defeats a combination of capitalists in a vast mining deal. He returns to civilization, and, amid the bewildering complications of high finance, Daylight finds that he has been led to invest his eleven millions in a manipulated scheme. He goes to New York, and confronting his disloyal partners with a revolver he threatens to kill them if his money is interested. They are cowed, return their stealings and Harnish goes back to fin Francisco where he meets his fat in Dede Mason, a pretty stenographer. He makes large investments and gets into the political ring. "You see, I give the value to the land by building the roads. Then I sell the land and get that value back, and after that, there's the roads, all carrying folks back and forth and earning big money. Can't lose, And there's all sorts of millions in it. I'm going to get my hands on some of that water front and the tide-lands. Take between where I'm going to build my pier and the old pier. It's shallow water. I can fill and dredge and put in a system of docks that will handle hundreds of ships. San Francisco's water front is congested. No more room for ships. With hundreds of ships loading and unloading on this side right into the freight cars of three big railroads, factories will start up over here instead of crossing took at least a thousand more feet to San Francisco. That means factory sites. That means me buying in the factory sites before anybody guesses the cat is going to jump, much less, which way. Factories mean tens of thousands of workingmen and their families. That means more houses and more land and that means me for I'll be there to sell them the land. Then there's the water. I'll come pretty close to owning the watershed. Why not the waterworks too? There's two water companies in Oakland now, fighting like cats and dogs and both about broke. What a metropolis needs is a good water system. They can't "The cause of more than half the, give it. They're stick in the muds. I'll gobble them up and deliver the right article to the city. There's money there, too-money everywhere. Everysome one absolutely antagonistic to thing works in with everything else. Each improvement makes the value of everything else jump up. It's people that are behind the value. The bigger the crowd that herds in one place. the more valuable is the real estate. And this is the very place for a crowd to herd. Look at it. Just look at it! You could never find a finer site for a great city. All it needs is the herd. and I'll stampede a couple of hundred thousand people in here inside two years. And what's more, it won't be one of these wildcat land booms. It will be legitimate. Twenty years from now there'll be a million people on this side the bay. Another thing is hotels. There isn't a decent one in the town. I'll build a couple of up-todate ones that'll make them sit up and take notice. I won't care if they don't pay for years. Their effect will more than give me my money back out of the other holdings. And, oh, yes, I'm going to plant eucalyptus, millions of them, on these hills."

"I've thirty million, and if I need more I can borrow on the land and other things. Interest on mortgages won't anywhere near eat up the increase in land values, and I'll be selling land right along." In the weeks that followed, Day-

light was a busy man. It meant quick work on a colossal scale, for Oakland and the adjacent country was not slow to feel the tremendous buying. But Daylight had the ready cash and it had always been his policy to strike quickly. Before the others could get the warning of the boom, he quietly accomplished many things. At the same time that his agents were purchasing corner lots and entire blocks in the heart of the business section and the waste lands for factory sites, Daylight was rushing franchises through the city council, capturing the two exhausted water companies and the eight or nine independent street rallways, and getting his grip on the Oakland Creek and the bay tide-lands for his dock system. The tide-lands had been in litigation for years, and he took the bull by the horns-buying out the private owners and at the same time leasing from the city fathers. By the time that Oakland was aroused by this unprecedented activity in every direction and was questioning excitedly the meaning of it, Daylight secretly bought the chief Republican newspaper and the chief Democratic organ, and moved boldly into his new offices. Of necessity, they were on a large scale, occupying four floors of the only modern office building in the town—the only building that wouldn't be torn down later on. as Devlight put it. No matter what notions you've got in your head, you've got to get out of the way and give him a chance. Will you let me go and see him and talk it over with him? I'll make it a hard and fast. business proposition. I'll stake him to get well, and that's all, and charge him interest."

She visibly hesitated. And just remember one thing, Miss Mason: It's his leg, not yours." Still she refrained from giving her answer, and Daylight went on strengthening his position.

"And remember, I go over to see him alone. He's a man, and I can with him better without women folks around. I'll go over tomorrow

CHAPTER XVII.

For six weeks hand-running Daylight had seen nothing of Dede except in the office, and there he resolutely refrained from making approaches. But by the seventh Sunday his hunger for her overmastered him. It was a stormy day. A heavy southeast gale was blowing, and squall after squall of rain and wind swept over the city. He could not take his mind off of her, and a persistent picture came to him of her sitting by a window and sewing feminine fripperies of some sort. When the time came for his pre-luncheon cocktail to be served to him in his rooms, he did not take Filled with a daring determina-

tion, he glanced at his note-book for Dede's telephone number, and called for the switch. At first it was the landlady's daughter who was raised, but in a minute he heard the voice he had been hun-

gry to hear. "I just wanted to tell you that I'm coming out to see you," he said. I didn't want to break in on you with-

out warning, that was all." "Has something happened?" came her voice.

"I'll tell you when I get there," he evaded.

She came berself to the door to eceive him and shake hands with him. He hung his mackintosh and hat on the rack in the comfortable

hall and turned to her for direction. "They are busy in there," she said, indicating the parlor, from which came the boisterous voices of young people, and through the open door of which he could see several college youths. "So you will have to come nto my rooms."

Joseph Healy Then Batters One Intruder and Forces Both to Hurried Flight - Pursues Men Into Street, But They Escape.

New York.-After seeing his employer, William Davis, a grocer at No. 134 East Fifty-third street, beaten unconscious the other night by two holdup men intent upon robbery, Joseph Healy, 13 years old, battled with the intruders, blackened the eyes of one of the men, and put them to flight with an ax when they threatened him with revolvers.

The boy was badly injured, but was able to give chase through the streets, shouting an alarm, while the retreating robbers brandished their weapons and cursed him as they fied.

Davis had just counted the cash he took in during the day and put the currency in an inside pocket.

The two robbers evidently had watched him from the street. They entered just as he started to close the cash drawer and inquired the price of a jar of jam. Davis turned toward a shelf, when one of the men struck him a heavy blow on the back of the head with a club. Davis fell to the floor unconscious.

One of the men reached over the counted and took between six and seven dollars in small change from the open drawer. To reach the fallen man the second intruder ran to the rear of the store to get behind the coun-

The boy then struck him a heavy blow in the face, which not only staggered the man, but took him by surprise. Blow after blow the boy delivered in rapid succession and the bewildered thief was soon defending himself instead of leading in the attack.

When the boy had him practically whipped, the second man, who had bounded over the counter, rushed to his companion's aid. He sprang at Healy and tried to catch his arms, but the boy was too quick for him.

The robber then struck at the boy with his club, but the blow was a glancing one, and failed to land. With stained face and blackened eye, the first man pulled his revolver and started for the boy.

"Don't shoot yet," shouted his companion. "Let me get him with

He swung a vicious blow in the direction of the lad's head. The boy fell to his hands and knees in avoiding the blow, but was up again in an instant, in the corner, he found an ax. Armed with this he started toward the two

Both aimed their revolvers and held the boy at bay, but with careful aim he let the ax fly at the head of the robber nearest him, He missed the man, but the ax

crashed through the front window of the store, making a fearful racket. Evidently fearing they would be trapped in the store the robbers fled. The boy pursued the fugitives into Third avenue. They waved their revolvers at him in a threatening manner and shouted they would kill him if

When to Call the Doctor. When to summon the doctor is point which has probably puzzled most people at one time or another, but in case of throat and intestinal troubles there should be no uncertainty, says a medical authority. The doctor should be summoned at once, for the sore throat may be diphtheria, and the intestinal symptoms may mean peritonitis, appendicitis or any one of a dozen complications of serious character. Valuable time and the golden opportunity may be wasted by waiting for symptoms that are severe enough to justify calling the doctor.

The new residence which is being built on the Clearview plan at Mount Lebanon, Pittsburg, for A. G. Smith turned open farming country into one of Pittsburgh, has some features which are unique and probably not embodied

in any other residence in this section. The house is without stairways or steps, the slope idea having been substituted. The grade of this slope is about ten per cent. Entering from the veranda to the large reception hall one's attention is directly drawn to the unique method employed of reaching the upper floor. In the living room, which is probably 20x35 feet, a large concrete fireplace and mantel is the principal feature, with a wide bay window. There are no corners to the house, as each of the four ends of the residence are of the bay type. The only wood used in the construction of the building is to be found in the door sills, windows and floors, the latter of which will be hardwood. The walls of the building are of cement,

Even the two bathrooms are fitted with cement tubs. In all there are ten rooms. The roof is of concrete, surrounded with a parapet, the porch roofs are of the same type, thus affording second story porches in the front and rear, both of which are fitted up with concrete flower troughs in which blooming flowers are now to be seen even in the unfinished condition of the house. On the front second story porch a fountain is arranged -Engineering Record.
