# Don't Burn Up Your New Dress

Scores of women will do it this winter, in some poor, old base burner; and they'll get very little warmth out of it, too.

Don't you think it would be a good idea to buy a First Class Favorite Base Burner, with Triple Exposed Flues, and save enough on your coal bills this winter to buy a new dress in the spring? It is a positive fact—the Favorite does burn less coal and throws out more heat than any other base burner made.

It took an organized body of stove experts nearly fifty years to perfect it. There is no other Base Burner like it, because the features that make it such a wonderful and economical heater are patented. It is the most attractive and best made stove, too.

In the Triple exposed Flues you will find one reason why it will save fully one half on your coal bills. But there are many other reasons—too many to mention here. Come and see us, and we will show you that there is no other base burner that will compare with the Favorite.
