Sioux City Tribune, 5th: Bloodhounds owned by Rymill & Stidworthy, of Homer, Neb, have been used in South Sioux City today in an effort to get trace of burglars who made away with three valuable boxes of merchandise early Sunday morning from the Evans building, located next door to the South Sioux City postoffice. The merchandise which was stolen belonged to D L Fairbanks and was stored in the Evans building. One of the stolen boxes contained 100 pairs of shoes, another contained 40 suits of clothes and the third contained an assortment of jewelry. Indications are that the thief or thieves used a wagon to make away with the plunder. While the bloodhounds in their operations today gave indications of striking a trail of the thieves, the South Sioux City officials state that nothing material developed in the way of a clue. On two separate trails the hounds went east from the postoffice for three blocks, thence directly north to the river. Assuming that the hounds outlined the course taken by the thieves, the officials have formed the opinion that the stolen boxes were hauled to a boat, probably heading into Sioux City.

Replying to a statement of Dr L Devore, health officer of South Sioux City, who Thursday night declared that a public funeral of the Phillips baby would not be allowed, even though he had to call out the militia to prevent it, Rev J L Phillips, pastor of the Methodist Episcopal church in South Sioux City, yesterday said: "There was no occasion for Dr Devore to make any such assertions as that with reference to the militia. All residents of South Sioux City are cooperating in the effort to stamp out cerebro spinal meningitis and to prevent its spreading. That little child was my grandson and there never was any intention on our part to try to hold a public funeral. We are not certain that meningitis caused his death, but we are taking no chances and the funeral will be private. We are as anxious as anyone to do everything possible to avoid an epidemic." The condition of Mabel Farrand, who is suffering from the disease, was slightly improved last night, stated Dr Devore. The child's temperature and pulse were normal. Dr Devore stated that another injection of serum may be necessary. With the Farrand case the only one in the city, extra precautions have been taken to prevent the disease from spreading. The city has employed a man to guard the Farrand home to see that no one leaves the premises. All of the dogs in the city have been ordered tied up until the danger of an epidemic subsides, in fear that the animals may spread the germs. The churches probably will hold meetings as usual to-morrow and the schools will reopen Monday, according to E C Melz, mayor of South Sioux City. Dr Devore is willing that the schools shall open Monday and the churches hold their usual service Sunday.
