Small Boy Didn't Get Looked-For Tickets, but Day Was Not Altogether Without Fun.

When that spectacular drama of Africa, "The Garden of Allah," recently appeared in Washington, with its troop of camels and donkeys to lend atmosphere to the scenes, Beverly, a tropical small boy of ten, hastened to offer his services, when they arrived in the city Monday morning, as a carrier of water and food for the beasts, hoping thereby to get a seat among the gallery gods for his

The next afternoon Beverly was seen sitting enthroned among a party of his companions, all evidently listening eagerly to the tales of his last

night's experience. Well, Beverly," hailed a passing acquaintance, "did you get into the show for looking after the animals?"

"No," replied Beverly. "But," he added, swelling with pride as his comrades gazed eagerly upon him. "A donkey kicked me and a camel tried

Daring Aeronaut Shy of Horse. A Rockwood farmer thinks these balloonist fellows are queer. He is still scratching his head over a strange remark by Capt. Honeywell. As the baloon was packed and ready for shipment to St. Louis, a farmer standing near, offered his team to transport the balloon and the men to Rockwood, Honeywell demanded to know if the horse was a safe one. care to risk my life behind a scary balloon from Kansas City, fleeing before a storm the whole way!-Tolede

PANTRY CLEANED A Way Some People Have.

A doctor said:

"Before marriage my wife observed in summer and country homes, coming in touch with families of varied means. culture, tastes and discriminating tendencies, that the families using Postum seemed to average better than those using coffee.

"When we were married two years ago, Postum was among our first order of groceries. We also put in some tea and coffee for guests, but after both had stood around the pantry about a year untouched, they were thrown away, and Postum used only.

"Up to the age of 28 I had been accustomed to drink coffee as a routine libit and suffered constantly from ineligestion and all its relative disorders. Bince using Postum all the old complaints have completely left me and I sometimes wonder if I ever had them." Name given by Postum Co., Battle Creek Mich. Write for booklet, "The Read to Wellville."

l'ostum comes in two forms. Regular (must be boiled).

Instant Postum doesn't require bolling but is prepared instantly by stirring a level teaspoonful in an ordinary cup of hot water, which makes it right for most persons.

A big cup requires more and some prople who like strong things put in a heaping spoonful and temper it with s

ree supply of cream. Experiment until you know the mount that pleases your palate and have it served that way in the future. Thore's a Reason" for Postum.

HAD SOME JOYS TO RECOUNT WAR ON HOG CHOLERA

Serum Developed by Department of Agriculture Used.

Cleaning Up of Infection is Huge Job, rack may rest when not in use. By But Belleved Can Be Accomplished Same as Eradication of Ticks in South.

Beginning with a few counties in lowa and Indiana, the department of agriculture is commencing a campaign for the eradication of hog cholera. As this disease is as widespread as the hog raising industry, which covers the whole country, the cleaning up of the infection is a large order. It is believed, however, that it can be done in much the same way that the cattle tick is being eradicated from the south.

Before the tick eradication work started it was feared that it was an impossible task. The experts of the department, however, figured out methods of cattle dipping, pastere rotation and other means of control so that now a quarter of the area in the south that formerly was under strict cattle quarantine has been declared tick free and released. Counties adjoining the cleared territory have seen the benefit and are taking up the work so that eventually the impossible will be accomplished and the whole of the south will be turned into a cattle-raising country.

It is thought that the same thing can be done with hog cholera. Congress last year appropriated \$75,000 to start ually until some were as large as a the work. The beginning in Iowa will be in co-operation with the Iowa State college. The method used will be the smart. The clothing would irritate serum that was developed by Doctor Dorsett of the department of agricul-

Hog cholera is by all odds the greatwould run from them. My scalp be est scourge of the hog-raising industry. It was estimated that it cost the farmers last year \$60,000,000. Before the discovery of the serum treatment the toll was still larger. Cholera was re-"I treated about six months and got garded as inevitable and was almost no relief and after using Cuticura always fatal. There was no protection against it except segregating the well bogs, and this precaution was uncer-

The injection of the serum gives immunity from attack even on close contact. The immunity is not permanent, but it lasts long enough to allow cleaning up an entire community. It was estimated that the second year the terum was in use it saved about \$11,-100,000. Now many of the states are manufacturing the serum in their own Igricultural laboratories and distribute t free on application.

The plan for cleaning up the country is to commence on county areas, as is being done in Indiana and Iowa, and gradually spread the work, cleaning up in widening circles and preventing the importation of the disease by careful juarantine. Any specific local outbreak will be wiped out as quickly as it can be located.

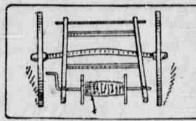

It may be the work of years to get all the country cleaned, but it is befleved once it is cleaned it can be kept This will mean a great increase in the hog-raising industry, larger profits tnd a proportionate reduction in the price of meat.

REWINDINNG OF BARBED WIRE

Excellent Use May Be Made of Old Buggy Axle and Wheels—Two Mon Required to Operate.

The sketch shows a very useful device for winding loose wire and taking "Don't mention it. You see, I have up old wire fences. Procure an old buggy axle and wheels, and fasten two axle as illustrated

EXCELLENT HAY RACK LIFT

Much Manual Labor May Be Saved by Use of Device Shown in Illustration-How Worked.

(By J. WESLEY GRIFFIN.) Much heavy lifting may be avoided by having a place on which the hay making a support something like the one shown in the drawing, not only the heavy lifts may be avoided but much time saved. I have known as many as three men to lose an hour each, going to and from the field, just o change a wagon body and the hay frame. This was at a time when time was valuable, more so than other times. With a lift like this one, or something similar, one man can change frames with ease and dispatch.

All one has to do is to drive be-

tween the posts at the lower end. The

To Load the Rack.

the team draws it through. The lift should be the same height at the top of the lowest posts, as the top of the wagon wheels, the rear ones, then the rack is raised above the wheels the wagon will pass out, leaving the rack high and dry.

When ready to load the rack, simply drive between the posts, under the rack, and slip back the rack, at the same time back the wagon. As soon as the rear of the rack rests on the wagon, stand on the rear of the rack and your weight will hold the rack in place while the team is backed far enough to let the front of the rack fall in place.

MONEY IN QUINCE GROWING

There is Unlimited Demand for Them and Fruit Is Neglected More Than Any Other.

Two acres of quinces ought to make more money for the farmer than 20 acres of apples, according to J. C. Whitten, professor of horticulture in the Ohio College of Agriculture, in a lecture to the pomology class.

"The quince is more neglected in proportion to its merits than any of our orchard fruits," he said. "Nobody ever saw an overplus of quinces. There is an unlimited demand for them. If to ship, the most handsome and the prison. best keeper."

apples and other fruits are grown, does criminal career when a boy. quires the greatest skill to select the ficial. right site for the orchard. If properly handled, pruning, spraying and orchards.

"When cooked the quince is the best of our core or stone fruits. For preserves, jellies and the like, the quince is the richest, most highly flavored and the most delicious fruit we have."

SELF-BOILED LIME SULPHUR

Expert of Alabama Experiment Sta-

tion Gives Some Excellent Advice on Spray Material. Writing in regard to the use of self-boiled lime-sulphur solution to

combat the San Jose scale, Dr. W. E. Hinds of the Alabama experiment station says: "We cannot depend upon the heat of the lime to produce a combination

wash means waste of the materials.

"There is, of course latitude for some variation in the proportion of fifteen pounds and twenty pounds of earth. Considering the danger of get- in vain. ting a poor grade of lime, and the it advisable to use slightly more lime nure heap is a hot bed of bacterial than sulphur. I would advise eighteen or twenty pounds of lime and fifformed into ammonia and passes into teen pounds of sulphur to make fifty gallons of wash. It is necessary to and better, for forty-five or more, to get the most effective wash."

> While fruit growing brings the money in chunks at certain seasons of the year, dairying is the only branch of farming bringing in money every month of the year. The dairyman who knows his business will have a check going into the bank every month and need never be short for cash, provided he used good judgment in his business. Then when the big check fall he will realize the great advan-

Oppenheimer, in some way, "beat the case," but three years later was picking are easier than in our other sentenced to fifty years' imprisonment for robbing a drug store. This severe sentence was given him because of evidence showing that he was a dangerous and habitual criminal. A man named Ross testified against Oppenheimer at his trial, at which time "The Man Tiger' 'swore to be revenged.

Not long after Oppenheimer's arrival at Folsom prison, Ross was sent there as a convict. Oppenheimer waited for him at the gate and stabbed him to death before the guards could interfere. A short time later Oppenheimer murdered a guard named Mc-Donald. As punishment he was placed in solitary confinement, but obtaining a file he made his way out and attacked a fellow-convict named John Wilson with a butcher knife. Wilson died a few days later.

In 1901 the state legislature passed that will be effective as a winter a law imposing the death penalty upon wash against San Jose scale. . . . I any prisoner who should make an asfear that the writers recommending sault upon a prison official or a fellowthis, confuse the preparation of self- prisoner. Under this law, Oppenheiboiled lime sulphur for summer use mer was tried in October, 1907, for "Yes," said the farmer, "but a bit as to keep the rod in place. If the for brown rot with the fire-boiled the murder of Wilson. He was found wash for the scale. An ineffective guilty, and was sentenced to die on June 6, 1908.

Apparently supplied with plenty of money, Oppenheimer fought his case all the way up to the Supreme court of the United States, but finally lost. lime and sulphur, ranging between He then endeavored to obtain his freedom by writ of habeas corpus, but

While awaiting the decision of the manure, the farmers can save or lose cheapness of that material, I believe courts in his efforts to save himself from the gallows, Oppenheimer was kept in strict confinement at the Folsom prison. There he continued his criminal career with unequaled cunning and ferocity. In company with two other criminals, prisoners, J. W. Finley and San Francisco Quijada, Oppenhelmer made an attempt to break out of the prison at midnight on Jantary 4, 1910, by sawing the bars of their cell. COCA COLA HABIT, A GHOST. We have all heard of ghosts, but none of us have ever seen one. It's the same way with coca cola "flends;" you can hear about them but you might search for them until doom's day and you would never find one. Physicians who have treated hundreds of thousands of drug habit cases, including opium, mor-phine, cocaine, alcohol, etc., say that they have never seen a case where the use of Coca-Cola has so fastened itself upon the individual as to constitute a habit in the true sense of the word. Although millions of glasses of Coca-Cola are drunk every year, no Coca-Cola fiends have ever made themselves visible at the doors of the sanitariums for

the treatment of drug habits. The Coca-Cola habit is analogous to the beefsteak habit and to the straw-berry habit and the ice cream habit. Peeple drink Coca-Cola first because they see it advertised and thereafter because it tastes good and refreshes their minds and bodies. They drink it when they can get it and content of do without it when they can't got it. If you had ever witnessed the ravings of a real drug flend when deprived of his drug, if you had ever observed the agony he suffers, you would never again be so unfair as to mention Coca-Cola in the same breath with the "habit-forming" drugs.—Adv.

Novelist Misquoted Scripture.

Novelists do not seem to be very strong in their knowledge of the scriptures somehow, and Sir Walter Scott in "The Heart of Midlothian" attempts to point a moral with the words: "Our simple and unpretending heroine had the merit of those peacemakers to whom it is promised as a benediction that they shall inherit the earth." The fact is that the peacemakers did not receive any such promise, but it is said that "the meek shall inherit the earth.'
