If you were to Purchase a Family Burial Plot, would you give the following points consideration?
The location one that is suitable for all time, or would it be impaired by the dense population of future years?
The location one whose natural resources would tend toward the beautiful without the heavy increased expense of maintenance?
The "PERPETUAL CARE" Fund sufficient and so safe-guarded that its future uses will not have dependance upon individual integrity?
In the guaranteeing of "Perpetual Care" does this fall upon the individual as a member of the Corporation, or is the guarantee backed by sufficient real estate and he assume none of the obligations attendant?
These questions and many others may come to you some time; why not investigate conditions now and avoid future complications that might arise?

HOUSEKEEPERS
Must be Watchful
For great efforts are being made in this vicinity to sell baking powders of inferior class, made from alum acids and lime phosphates, both undesirable to those who require high-grade cream of tartar baking powder to make clean and healthful food.
The official Government tests have shown Royal Baking Powder to be a pure, healthful, grape cream of tartar baking powder, of highest strength, and care should be taken to prevent the substitution of any other brand in its place.
Royal Baking Powder costs only a fair price per pound, and is cheaper and better at its price than any other baking powder in the world.
