FEEDING ALFALFA TO HORSES

Alfalfa is a splendid horse feed but must be fed with judgment and care. Because of its palatability, mature horses are likely to eat too much al-falfa, if permitted to have free access

The average farm horse at hard work is allowed to est much more alfalfs and other roughage than he really needs to maintain his weight.

One pound of alfalfa or other hay and about 14 pounds of grain per day for each 100 pounds of the horse's weight make a good ration for the working horse.

Horses like alfalfa stems. Refuse from the cattle racks is very accepta-ble to horses.

Feed mature horses first and second cutting alfialfa which is free from mold and dust.

Never feed wet alfalfa hay to horses. A sudden change of feed deranges the horses' digestive system.

Horses accustomed to alfalfa as regular part of their ration are seldom troubled from its use .- Extension Bul-

Omaha is leaving nothing undone to make the stay of the teachers comfort. able and agreeable. The Omaha committee on arrangements, which itself numbers more than three hundred, has perfected a system that insures abso. lutely no friction in the details of the convention.

The entertainment this fall will be arranged with the idea in view of pleasing the teachers. High class di version will be provided. This will include the trade excursions, which have become so popular. All general meet ings will be held in the Auditorium and the sectional meetings in the High school and adjoining buildings.

Headquarters and registration will be at Hotel Rome. The arrangements will be quite similar to those of preceding years, which makes it an easy ceding years.

Assuredly Omaha will leave nothing undone to make the stay of the teachers pleasant, while the executive committee has seen to it that the program is instructive.

For the convenience of teachers whe desire private accommodations, the rooming bureau is again in operation at the Young Men's Christian Associa
