my feet. My sisterin-law wished me to try Lydia E. Pinkham's Vegetable Compound and my nerves became firm, appetite good, step elastic, and I lost that weak, tired feeling. That was six years ago and I

have had three fine healthy children since. For female troubles I always take Lydia E. Pinkham's Vegetable Compound and it works like a charm. I do all my own work."- Mrs. A. F. KREAMER, 1574 Electric Avenue, Lackawanna, N. Y.

G

-

The fuccess of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

Women who suffer from those distressing ills peculiar to their sex should be convinced of the ability of Lydia E. Pinkham's Vegetable Compound to re-store their health by the many genuine and truthful testimonials we are constantly publishing in the newspapers.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confi-dential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Heartless Wretch. Absorbed in her own sweet thoughts Miranda meandered through the meadow, coyly aware that in the distance her lover awaited her coming.

The sun just popped off this earth as Miranda was clasped in her lover's Sandow embrace.

# Chicago Judge's Dead Pig Is His Bailiff's Jinx

C HICAGO.-Judge Adelor J. Petit of the circuit court directed his deputy balliff, John Hickey, to take a dressed pig to the judge's home in Rogers Park. Hickey started to wrap up the pig. "Don't you know it's against the

IT AIN'T NO KID passengers in public conveyances."

won't know it," said Hickey. Before he could leave the county body of a dead baby that had been used as an exhibit in a murder trial.

Several hundred "murder fans" were gathered in front of the building when Hickey emerged with the package under his arm,

"Let's see the kid," said a dirty-faced urchin, tugging at the bailiff's arm. "It's no kid, I've got. "Tis a pig, it is," said Hickey, elbowing his way through the crowd. Hickey boarded a train for Rogers Park. A fellow deputy called up the Rogers Park police station.

"This is Simpson, the commission merchant," he said. "I just fired one of my employes and when he left he stole a dressed pig weighing 49 pounds. He just got on an elevated train and we think he will get off at Birchwood avenue. Arrest him for us."

Heavy hands fell on Hickey's shoulders as he stepped to the platform at Birchwood avenue. Two detectives grabbed him., Hickey denied that he was a pig thief.

"What's this?" said one of the detectives, tearing the paper around the package under Hickey's arm. "Ah! ha! 'tis a pig. You will lie to us, will you? C'm'long.'

"I got a court order to deliver this pig to Judge Petit's house," said Hickey, "and I don't care whether you are detectives or not. 1 am going to in our own bodies.

times in hospital management when, for six hours after a well-known man had dled, a hospital telephone girl continued to tell his friends who inquired perity of the individual and of the

pital recently. The first morning after a slight operation his daddy telephoned to ask about him. "He had a good night, has had his bath and has eaten his breakfast," said the girl at the other end of the line. It was indeed reassuring. That afternoon the

boy's mother called on him and he was, indeed, all right. The next morning the answer at the hospital was just the same. It was suspicious. When the same words, precisely, were used the third morning and the fourth, the father has been an enormous reduction in in-

THE QUESTION OF CURES.

In his "Principles of Biology," Herbert Spencer wrote: "Early ideas are law to take a pig on the 'L'?" said one not usually true ideas. Undeveloped of Hickey's associates. "A friend of intellect, be it that of an individual or mine was arrested last winter by that of a race, forms conclusions health officers because it is against which require to be revised and rethe law to take dead animals among revised before they reach a tolerable correspondence with realities. Were "If they don't see the pig they it otherwise there would be no discovery, no increase of intelligence. What we call progress of knowledge is the building other deputies told newsboys bringing of thoughts into harmony Hickey was going to carry out the with things; and it implies that the first thoughts are either wholly out of harmony with things, or in very incomplete harmony with them."

In this quotation is the key to the deavored to digest every berry, plant, reply to the frequent query: "What root or leaf that looked good to them has the spectrum got to do with my growing out of doors within the range health and digestion?" There is a of their physical ability to cover in close analogy between the building up the region in which they habitually of organic compounds out of the inorlived, and under stress of famine they ganic under the influence of light were forced to wide excursions. Those waves and the rebuilding of these that survived passed on to our age same complicated compounds into an organization adapted to that parhigher forms in our bodies under the ticular range of diet, and humanity influence of the enzymes; and by com- thrives on the simple natural food to prehending what we can see of the which it was adjusted. But in the operation of light on the vegetable highly artificial conditions incident kingdom we are able to secure some to civilization the habits developed by understanding of what we cannot see this eager quest for anything that would enable primitive men to sur-

Knowledge has value in exact pro portion to the benefit it confers, directly or indirectly, on the human race.

Every new scientific fact or principle generally grasped helps to an understanding of nature's laws, and when properly applied is sure to lead to increased health, efficiency and proscommunity. For example: But a few years ago the milkman might let any quantity of dirt fall into the milk provided he strained it out again so on any label or package. we could not see it, and might feed his cows any kind of slop that would not kill them. We did not care, be-

cause we did not understand the relations of things. But today, because of the general knowledge of bacteriology and of sanitary science, enlightened public opinion compels the milkman

to keep dirt out of the milk and to give his cows good food. The result of this is shown in the fact that there

preventive measures and the reduc

simply the result of lack of corres-pondence with nature.

The principles underlying the laws of light and plant life are the same that underlie human life, and until we understand them we are certain to get into trouble continually.

DECEPTIVE GUARANTIES. Since the life of the average individual is so full of interesting events. and pleasant reflections and his time so fully occupied in accomplishing the daily tasks and enjoying the many diverting pleasures of existence, few ever reflect that all one's activities are dependent on the oxidization of the food consumed at breakfast, dinner and supper, and that the instant one ceases to produce heat by reason of this internal combustion, that instant one becomes a cold, dead body.

It is a disturbing thought, anyway, and quite generally we refuse to entertain disturbing thoughts voluntarily

Probably no better, no more vivid illustration of the Darwinian principles of progress, of the survival of the fittest, of wisdom slowly and painfully acquired and developing as the result of bitter experience in repeatedly doing the wrong thing, can be found than our growth in the knowledge of dietetics, of the development of the science of enting to live.

Our primitive ancestors in their unceasing and omnivorous search for everything that would satisfy hunger

vive or that would add attractiveness to their menu in times of plenty have TOOK BISHOP AT HIS WORD come down to us as instincts that

make us easy victims of ignorant or Footman May Have Been Considerunscrupulous manufacturers. The United States department of agriculture, through its official weekly news letter of May 20, 1914, gives notice of a decision signed May 5, 1914, by the secretaries of the treasury, agriculture and commerce, prohibiting the use of the legend, "Guaranteed under the food and drugs act," as he had not been very well. "But

The date of the new regulation will not take effect until May 1, 1916, in order to give manufacturers an opportunity to use up their present stocks of labels. The reasons for this action are, quoting the official letter: "It has been determined that the legend, 'Guaranteed under the food and drugs act, June 30, 1906,' and 'guaranteed by (name of guarantor) mummy, they asked me to have cake, under the food and drugs act, June 30, and I said, 'No thank you'; and they 1906,' borne on the labels or pack- asked me again, and I said, 'No, thank

The police took up their station generation or more are we willing to the door.

His actions were sufficiently sus- with sufficient constancy in any dis-

picious to warrant arrest, and the man was ordered to open the door. He did ease, will score more than sixty per so, but locked the trunk, and threw the key into a crevice in the wall. It took cent of cures. Hence every new remmore than an hour to retrieve the key. Hoberlik said later that he could edy starts "loaded" with a margin have done it much faster, had he wanted to, for he had a long hook with a of chances in its favor, and in the abwire handle, to turn the trick.

Much of the goods was packed up in packages available for carrying, and statistics to prove that more patients the two detectives and the suspect, each with full arms, came to the police station. Hoberlik was carrying 100 calendars.

The detective was writing. "What day is this?" he asked Hoberlik. "Don't know," said Hoberlik,

"Sweet Essence of Ignorance," should the detective, "You have 100 calendars there; look it up."

"Can't read," said Hoberlik.

And he couldn't. He thought it was still August.

# Zoological Park Walrus a Victim of Gluttony

N EW YORK.-Ephraim, the huge walrus of the New York Zoological park, afflicted with a multitude of hookworms, died of sheer laziness, superinduced by the most voracious appetite ever possessed by any animal. He was caught near Etah, Green-

land, by Paul Rainey, and was presented to the park four years ago. At that time he weighed 140 pounds, but he began eating his way to an early death on the day he arrived. Eating was a continuous performance with Ephralm, both awake and asleep, until he became so fat that it pained him to move.

He weighed 500 pounds on the day of his death. In the last four months his weight increased at the

rate of ball a pound a day. He was possibly the most expensive animal on exhibition at the park. He ate 40 pounds of clam meat and other itemz of expense were the labor of preparing the feed, the frequent cleaning of his tank and adding sea salt to the water, so that the cost of keeping Ephraim Lyons, France, of a dangerous mad a parcel which exploded, doing conwas equal to that of two large elephants.

Of late the wakrus never attempted to move away from the pan of clam has been reported to the police as an meat upon which he fed. Unless it was kept continually full he raised a anarchist, did not yield without a howl, which sent all the other animals into throes of nervous excitement. fierce struggle, in the course of which . Patience-And you suy she came He frequently went to sleep with his faws in the feeding pan.
