# Farm Management Ass'n Closes Year's Business

Old Officers Re-elected-Reports Filed and Accepted-New County Agent Takes Charge of Work.

On account of the holiday season the second annual meeting of the Dakota County Farm Management association held at Hubbard on December 31st, was not so largely attended as had been expected, yet every one present felt that the meeting was one of interest and profit. The sentiment expressed by every one present was that the association formed a year and a half ago was of great benefit and help to the farmers and their live s ock and farming interests. Said one member: "Demonstration work has come to stay: the farmers of Dakota county will always desire it."

In accordance with the order of business for the day the board of directors, consisting of Messrs. Henry Cain, Thomas J. Hartnett and John Feller, convened for the regular December business in the large of the regular December business in the property of the county. If he plans a program of work for other county offices. There is also always some one to answer telephone calls, or to transmit messages left by farmers who visit the office when the county agent is absent. the regular December business

Minutes of the November business meeting were read and approved.

Theodore Peters was permitted to vote and thus represent Emerson precinct in the day's order of busi-County Demonstrator Raymond

then reported the work accomplished for December, as follows: During the month of December there

has come to the office 20 phone calls, 27 office callers, have visited 20 farms, written 30, sent one circular letter (300

written 30, sent one circular letter (300 copies), vaccinated 365 hogs and 18 caives and have traveled 480 miles.

One week was spent in Lincoln at a meeting of county agents from all counties. The remainder of the month has been spent mostly with heg choiera, as there has been several herds reported that were effected. These berds were all vaccinated and the disease has not spread from these places. It has just been reported that in one part of the county hogs are dying from choiera and that the owners are not burying or burning them but leaving them scattered over the fields. If choiera is ever going to be controlled such work as this must be stopped, or choiera will spread over the entire county. I hope that every one will soon realize that the improper disposal of dead hogs is one of the casiest ways to spread choiera and by one man neglecting this he may be the cause of infecting a whole neighborhood.

gave way to the second annual meeting of the association. J. F. Leamer began the session by presenting the president's an-

nual address, as follows: Fellow members of our Farm Management association and gentlemen:
One year and a half has been the life of
our organization and like all organizations
there must be a beginning, an experimental

or perfecting stage before results are obtained.

We, however, have thru this period done much good. In the control of hog choiera alone our agent has earned his salary many times. In soil survey, many farmers have begun thinking that more profits can be had with better management, and they are taking definite steps along this line.

We also have in this year and a half found some very serious difficulties that should be overcome in the future. Of these I will now speak.

The aim of the county agent is to serve

perincation was made occase now the now from experience and observation that n the great majority of cases the county gent can be at be of service to his county when located at the county seat rather than t any other town in the cennty.

Dean Burnett, director of the experiment station at Lincoln, spoke to the association next. Those present gave Mr. Burnett close attention and what he said left a last with untreated seed. In these fields the ing impression. He was pleased to know that the people of Dakota per cent smut. These fields were plant-county were interested in this kind ed with the same seed only a part was treated and a pait was not treated. sociation on the work it so far had accomplished. He said that the experiment station had long felt the need of such an organization to be a connecting link between it and the farmers. No one man working alone can accomplish for himself what he ought unless be gets all others working at the same business to work with him. Business men get together. Agriculture is men get together. Agriculture is visited every school in the county and no different than any other line of explained the club "ork and secured business. If you will help one good members 166 members were enrolled in business. If you will help one good farmer in a community, that helps the entire community; but if you will benefit forty farmers in that same community you have raised the standard of agriculture. Mr. the standard of agriculture. Mr. City of all clubs on January 8th, where Burnett mentioned the farmers City of all clubs on January 5th, where survey work that had been done in the county and urged that this Agood deal of time has been spent in true status of the farming business. must look at their business from a business standpoint and a business office callers.

and social side of farm life.

Following this address County

Chofera has been controlled quite effectual y until the last few weeks and this outbreak can be traced directly to the improper disposal of dead bogs. I hope the time will come when people wake up to the fact that choices is a contagious disease and that the fence come or the creek is no place for hogs using rom cholera. FARM MANAGEMENT SURVEY

This work was first started last spring The work was started in Dakota and Omadi precincts and consisted of taking a record of the farm business on 49 farms. These records were summarized and figured up and records returned to the men who gave them. The results were explained at meetings called for that purpose. The results showed that the average farmer was making only \$277 above paying 5 per cent interest on the capital he had invested. 13 of the better paying farms were making \$1,000 besides paying 5 per cent interest on capital while the 13 poorer paying farms lacked \$596 of paying interest on the capital they had invested. This work should be started in other parts of the county and con-tinued for a number of years for if prop-erly carried out one should be able to get at the real factors that effect farm profits better than in any other way

WORK WITH CROPS Probably the most importants work done in this direction was that with the oat smut. During March a letter was sent out explaining the formaldehyde treatment for the prevention of smut, and asking farmers to carry it out and demonstrate its value to other people of the county. 22 farmers agreed to do so. During the summer 140 oat fields were inspected and counts taken to determine the percentage of smut. The 22 treated fields were included in the 140 fields. It was found that the 118 untreated fields. averaged 12.47 per cent smut while the treated fields averaged 0.91 per cent smut

and I hope they will endeavor to get their neighbors to try the treatment next year, because above figures certainly show that there is value in the treatment and also that almost every field in the County had more or less smut last year. Some other work was done with other crops but it was not of such a nature that any definite results could be secured.

BOYS AND GIRLS' CLUB WORK. During the spring Mr. Voss and mysel the various ciubs. Most of the members finished the work except those enrolled

the county and urged that this should continue from year to year. No single year can represent the true status of the farming business.

A good deal of time has been spent in answering calls from farmers which dealt with all kinds of farm problems. These calls were taken care of when not but to get a true average a series of working on the above lines of work, which the board of directors directed me to carry out. The following is a brief summary of other work accomplished:

Sircular letters (1,800 copies).....

The report of Treasurer H, H, To the Board of Directors of the Dakota County Farm Management Association: Your Treasurer herewith submits his re-port of receipts and disbursements from port of receipts and disbursement July 29, 1915, to December 31, 1915. Balance on hand July 29, 1915, as per statement rendered. Collected on subscriptions from July 29, 1915 to Dec. 31, 1915. they should think of the sanitary
