

She Will Recover

So her doctor said, 'Her friends and neighbors felt sure of it too. They have used Peruna themselves and know of its merits. That old cough that had worried her for years and years, for which she had taken all sorts of cough medicines, has disappeared. Peruna is doing the work. She will recover. Indeed, she has recovered.'

Her name is Mrs. William Hohmann, 2764 Lincoln Ave., Chicago, Ill. She had suffered with catarrh of the bronchial tubes and had a terrible cough ever since a child. As she got older she grew worse. She coughed both winter and summer. Had to sit up at night. Could not sleep. "But all that has left me now, Peruna has cured me!"

There are others, and there is a reason.

Official Paper of Dakota County

Although eastern manufacturers and exporters have been the chief beneficiaries of war order business, it is reported that one wheat exporter at Portland, Ore., has made "a cool million" on contracts for shipment of wheat to the warring nations. There are evidently a few "spots" of war prosperity in the far west.

Announcement that President Wilson fears defeat of his defense plan is not at all surprising. He was such a recent convert to a national defense policy and prepared his plans so hurriedly that not even the friends of preparedness could be expected to stand for it. Rome was not built in a day nor was it built by over-night believers in the greatness of Rome.

Farm Notes

Issued by the University of Nebraska College of Agriculture.

NEW OUTLINE FOR WOMEN'S STUDY

A new outline for study entitled "The Home" for use in local women's organizations has recently been issued by the Extension Service of the College of Agriculture. The sub-topics are the home, the business side of housekeeping, system in housekeeping, marketing, the care of the house, cleaning, what the home maker should know about disease and its prevention, home nursing, home training of children, and the home and the community. It also contains a list of bulletins and books for reference. The outline will be sent without cost upon application for Home Economics Circular 7, Series 2, Extension Service, College of Agriculture, Lincoln. A list of other outlines for the study of women's organizations may also be had upon request.

MORE ABOUT SUDAN GRASS

The results of three years have not proved at the North Platte Experimental Substation that Sudan grass is superior to sorghum, but later tests under different weather conditions may give results more favorable to Sudan grass. It is lauded as a dry land crop but may, like broom grass, prove a humid or sub-humid crop rather than a semiarid crop. The feeding value per ton seems to be about the same as sorghum or prairie hay. As the Sudan grass stems are fine and rather leafy there may not be as much waste as in feeding sorghum. On the other hand, the stems of the Sudan grass seem very dry and somewhat pithy, and possibly are not relished as much as the stems of sorghum. This is particularly true during the present season, the cattle eating the sorghum with much more relish.

CHANCE FOR JUNIORS

Nine clubs or home projects in agriculture and home economics, conducted by the U. S. Department of Agriculture and State College of Agriculture, are open to membership this year to any boy or girl of not over 18 years on January 1, 1916. A large number of awards will be offered. The clubs in which one may enroll are the Pig Club, the Corn Club, the Calf Club, the Potato Club, the Sewing Club, the Cooking Club, the Cow-testing Club, and the Gardening and Canning Club. Monthly lessons will be sent free to all members. Information and membership rules for each project will be furnished to anyone upon application to the Extension Service, College of Agriculture, Lincoln.

PRELIMINARY SEED CORN TEST

The preliminary seed corn test is one of the practices that progressive farmers are observing these days. Owing to the uncertainty of the viability of last season's seed, the farmers are testing it at once to know whether or not they will have to buy. Information concerning the testing of seed corn may be had by sending for Extension Bulletin 3, of the Agricultural Experiment Station at Lincoln.

GREEN-MANURE CROPS DO NOT PAY

The yields have been increased by green manure crops at the North Platte Experiment Substation, the additional cost of producing the crop, as represented by the rental of the land an extra year, the cost of seed for the green-manure crop, and the extra tillage that must accompany this method, is so great that the final profit is not as great as from ordinary methods.

WORSE THAN CROPPING

Granting that it is highly necessary to maintain soil fertility which is being depleted thru cropping, the College of Agriculture says that it is fully as important to attempt to control the loss thru the action of wind and waters, as, in general, more is lost in this manner than by any other.

DETECTION OF SPOILED CANNED GOODS

When buying canned goods, the Home Economics Department of the College of Agriculture says to be sure to examine every can and to discard those that bulge. This bulging is caused by the pressure of gas within, which is formed by the action of bacteria. Food so acted upon is unwholesome and may be dangerous.

Items of Interest

From our Exchanges

Lakeport Items in Sloan, Ia., Star: Mr. Hanson, of Dakota City, Neb., came over last week for a visit in the home of his aunt, Mr. and Mrs. Neils Hanson.

Emerson Enterprise: Fred Brasfield, of Homer, was in Emerson the latter part of last week looking after crop and rental interests on the reservation for Thomas Ashford.

Sioux City Journal, 2nd: Frank Resseguie, of South Sioux City, is ill at his home with the grip. Mr. and Mrs. W. F. Curry, of South Sioux City, announce the marriage of their daughter, Miss Edith Irene Curry, to Jesse L. Keith. The wedding took place Sunday evening in the home of the bride's parents.

Allen News: Wm. Triggs and Wm. Lorenz returned to their home at Dakota City Monday, after a few days' visit at the D. O. Triggs home. McKinley Williams and Anna Russ were married at the Catholic church at Willis at 8:30 a. m. Wednesday, January 26th. Father Gleason performed the ceremony. They will make their home on a farm south of Waterbury.

Lyons Mirror: Mrs. Florence V. Nixon was down from Homer Monday. Major Dad Phillips says his son William writes from Montana that the thermometer registered 63 below zero, but he did not mind it at all in that high altitude with no wind. Thomas Ashford, of Homer, was a Mirror caller Friday. He is a son of the late Thomas Ashford, sr., one of the earliest pioneer settlers of Dakota county. Mr. Ashford is probably the richest man in northern Nebraska.

Sioux City News, 28: Oscar Garrett, 19 years old, eloped with Miss Helen Culver, an 18-year-old high school girl, to Dakota City, Neb., Wednesday afternoon where they were quietly married. The wedding secret leaked out among the groom's friends today. Miss Culver is the daughter of E. R. Culver, 2301 W. 5th street, while the groom resides at 2124 Sioux street. He is in charge of the elevator in the Motor Mart. There were no parental objections, according to the groom, but they just wanted to surprise their friends.

Sioux City Journal, 28: I. Miller & Co., wholesale liquor dealers, who a month ago moved to Jackson, Neb., have absorbed the business of the H. Manderscheid Sons' company, which opened a jobbing place at the same place when the dry law became effective in Iowa. Announcement of the taking over of the Manderscheid stock was made yesterday by Herman Galinsky, who is at the head of the Miller company. The Mandersheids have been in the wholesale and retail liquor business Sioux City for years, and also conducted a business at South Sioux City. John Manderscheid has gone to California for an extended visit. Henry Manderscheid probably will embark in some other business.

Ponca Advocate: Mrs. T. T. Harris was in South Sioux City, Tuesday. Mrs. P. D. Fales was reported quite sick the first of the week. Walter Wade came over from Winnebago last Friday and visited until Tuesday with Mr. and Mrs. T. T. Harris. The little year-old babe of Mr. and Mrs. Alonzo Garner died Wednesday morning at the home of Mrs. Jas. Bigley. The Garners live on the McIntyre farm, in just an old shack of an outbuilding, and the children, three in number, took the measles, and the baby had pneumonia from being exposed, and it was thought best to bring it to a warmer house, so the mother and baby were brought to Mrs. Bigley's Tuesday morning, but the disease had taken too strong a hold on the little fellow, and he died early Wednesday morning. It is a sad affair.

The M. G. R. club was pleasantly entertained at the home of Mrs. Ruth Culbertson last Wednesday afternoon, Jan. 19th. The roll call was responded to by each one telling what they would do if they had a million dollars. The contest was enjoyed by all. The members had to write on a slip of paper something they received for Xmas, and then were asked to act it out, the rest guessing what they were acting.

Mrs. Alta Boals won the prize. A four o'clock lunch was then served.

Notice

There are many reliable farm papers issued nowadays that supply the farmers and stockmen with cashable and workable ideas, but the best suited to the farmers of this section is Farmer and Breeder. It is issued semi-monthly at Sioux City, Ia., and is intensely interesting and practical. It regularly carries veterinary, dairy, poultry, horticulture, home and fashion departments in addition to market and live stock news. The special feature stories about successful farmers and breeders give many valuable hints, suggestions, and lessons that any intelligent farmer can apply with profit.

MONEY-SAVING OFFER

The Herald has made special arrangements with Farmer and Breeder which enables us to offer you The Herald and Farmer and Breeder both for one year for only \$1.00. Send us your subscription now and save money. This offer is good for only a limited time. The Satisfactory Kind

Western Nebraska and Colorado Farm

are fast increasing in value. Their 1915 yield of from 25 to 45 bushels of wheat per acre will exceed the present price of similar and adjoining lands. Indications point to the greatest demand for these ceded Western lands that the West has yet seen. The incoming inquiries show already the movement to get hold of one of these farms before it is too late; if you can buy these lands at from \$15 to \$35 an acre you can make up your mind that they will be 50% higher in the near future. Dairymen are making money. The silo has revolutionized farming on these lands and insures a return value that has never been known. All farm improvements on adjacent lands bear testimony to their worth. Yuma County, Col., last year produced \$1,275,000 worth of wheat, \$600,000 worth of corn and \$120,000 worth of stock. This was about the production of other counties where these lands lie in Western Nebraska and Eastern Colorado.
