Farm Notes.

Issued by the University of Nebraska College of Agriculture.

HINTS ON ICE CREAM MAKING Success in making ice cream is largely dependent upon proper freez ing, according to the Dairy Depart ment, College of Agriculture, It says that in the ordinary freezer this is accomplished by packing a mixture of ice and salt around the can containing the ice cream mixture. The production of a smooth ice cream is due to both the agitation and the freezing. The degree of agitation s, of course, due to the speed of the dasher and is under the control of the operator. The freezing, how-ever, is dependent upon the propor-tion of ice and salt used in the freez-

ing mixture. A mixture of one part of salt to nine or ten of ice gives the best results. If more salt is used, the mixture freezes too quickly and is likely to be granular. On the other hand if an insufficient amount of salt is used, the freezing may be so prolonged that the cream will become partly churned in the freezer. The results may be avoided by proper icing.

The space between the can and the tub should be filled about one-third of the way up with finely crushed ice well packed in. A little coarse salt should then be sprinkled over the ice and another layer of ice added. On each layer of ice should be placed a small amount of salt. This is con-tinued until the tub is filled, using more salt near the top than at the

The brine from the melting ice and salt should not be allowed to drain away as fast as formed. Care must be exercised, however, that the brine does not get under the cover of the freezer. The agitation should be discontinued when the ice cream mixture is well whipped and has a smooth, fluffy appearance. The dasher should then be removed and the ice cream allowed to harden without further agitation.

COST OF GROWING CORN It cost \$12,08 an acre or 27 cents a bushel to produce and harvest 526 acres of listed corn in Gage county last season on \$104 land yielding

44.6 bushels an acre. Approximately half of the man labor required in producing this crop of 44.6 bushels was used in the preparation, planting, and cultiva-tion, the other half being used in the harvesting.

The average yield of corn in Gage under present economic conditions, net profit above all expenses of about \$7 an acre.

These figures were compiled from ecords kept by farmers of Gage county in cooperation with their county agricultural agent. Besides giving reliable information on the rincipal crop of the county, it has demonstrated the value of combining experience in a definite, tangi-

SALAD SUGGESTIONS In making salad, the College of Agriculture suggests that the folowing points be observed: Cut pieces large enough so that they are distinct.

Have all ingredients cooled. Have all salad dressing well sea

Combine flavors that blend well Mix just before serving. Serve attractively.

COOKING FISH Fish contains protein and so should not be cooked at an extremely high temperature. Because of the structure of fish, the Agricultural College says that it must be cooked quickly. The muscle fibres are held together with a sort of gelatinous connective tissue which softens and breaks away with prolonged cooking. Fish does not seem to be as hearty a food as meat. Its food value may be increased by the addition of butter or rich sauce when preparing for the

CARE OF THE DRY SOW Dry sows not bred for fall litters may be roughed thru the summer on alfalfa or rape pasture. Sows carrying a litter should receive some grain with the pasture but not enough to cause them to become fat. Good condition is desired, but excessive fatness often results in small itters and weak pigs.-College of Agriculture.

Notice

There are many reliable farm papers issued nowadays that supply the farmers and stockmen with cash able and workable ideas, but the best suited to the farmers of this section is Farmer and Breeder. It is issued semi-monthly at Sioux City, Ia., and is intensely interesting and practical It regularly carries veterinary, dairy, poultry, horticulture, home and fashion departments in addition to ly lines. market and live stock news. The special feature stories about success ful farmers and breeders give many valuable hints, suggestions, and les sons that any intelligent farmer can apply with profit.

MONEY-SAVING OFFER The Herald has made special ar angements with Farmer and Breeder which enables us to offer you The Herald and Farmer and Breeder both for one year for only \$1.00. Send us your subscription now and save money. This offer is good for only i limited time. Every subscriber to

CHRIST ASCENDED AS HE DESCENDED

We Have Erred In Supposing His Flesh Ascended.

Pastor Russell Says the Logos Descended-He Was Made Flesh-Humbled Even Unto Death, Sheol, Hades. He Was Raised From the Dead a Spirit Being-He Ascended as He Descended-Jesus a Quickening Spirit Ascended to Glory, Honor and Immortality-What He Left and More Added Glory,

Detroit, Mich.,

May 4.-Pastor

Russell gave two

addresses here to-

led anptivity cap-

rebellious also, that the Lord God might dwell among them."-Psalm 68:18.

Pastor Russell declared that one of he serious errors engrafted into the Christian faith is the supposition that Jesus is still a man. This wrong thought prevails especially amongst Premillenarians, and belps to turn many away from faith in the premillennial coming of Christ for the blessing of all the world. Many Christians perceive that a reign of Christ in the flesh would be inferior to a spiritual reign. Hence the general rejection of faith in the Second Coming of Christ

and the establishment of His Kingdom. He showed that all Christans firmly believe that Jesus was a spirit being before He came into the world. All believe that a spirit being is of a higher order than a human being, and that Jesus made a great stoop when He laid aside the glory of His prehuman condition to become "the Man Christ Jesus." Man is "a little lower than angels," even in his perfection.

The Pastor declared that surely no Bible student supposes that the Heavenly Father had permanently degraded county for the last ten years is about 25 bushels an acre. This yield angels to one below them. Yet many Christians profess to believe this very figured at 50 cents a bushel, gives a thing. The ascension of Christ is claimed to prove it. How absurd to suppose about \$2 an acre. Figured at 70 that our Lord Jesus, accustomed to cents a bushel, the profit would be spirit conditions, and made flesh for a short period, could be otherwise than discommoded and seriously dishonored by the Father, if He has a body of flesh!

Ascends Where He Was Before, Mistaken views respecting the word ascend have helped to confuse us. St. Paul, explaining our text, shows the ascension of Jesus is to be considered in conjunction with His descending. (Ephesians 4:8-11.) He that ascended is the same that descended, thirty-four years before. Did the descending have reference to the kind of body? Surely not! Then the ascending has no reference to the kind of body.

The descending signified the humilia-

tion, the leaving of spiritual glory, to be born of the flesh. The life of the Logos was transferred from the spirit body to the body of the babe, that He might become "the Man Christ Jesus." Similarly, the begetting of the Holy Spirit came to Jesus at His baptism, and for three and a half years it constituted Him a spiritual Priest, whose work was to "offer Himself." That offering ended at Calvary. When on the third day, the Father raised Him from the dead, it was the Priest who was raised to glory, honor and immortality-not the sacrificed human body. As it is written, "A body hast Thou prepared Me for the suffering of death." Jesus' sacrifice was finished at Calvary, as He said. He dieth no more and therefore has no further use for the body of flesh. What became of it, the Pastor would not undertake to say. It was not seen in the tomb. But the soul, not the body, was raised to life. "Thou wilt not leave My soul in Sheel" -Hades-the tomb.

Why a Body of Flesh Was Used. We must remember two things, said the Pastor. Followers of Jesus were required to have full faith: (1) That Jesus was the Logos, who had descended from the spirit plane to the human. (2) That He had died sacrificially, and that God raised Him from

the dead. Unless these two points were fully established, they could not continue as Jesus' disciples, acceptable with the Father, and capable of receiving the Holy Spirit. But they could not receive spiritual things until after the spirit-begetting at Pentecost. Hence their instructions must be along earth-

If after His resurrection, Jesus bad appeared to them as He did to Saul of Tarsus, what proof would they have that it was the same Jesus who had dled? How could the Message of His resurrection and ascension have been conveyed to their minds? Some ocular demonstration was necessary to constitute a basis for faith. Therefore our Lord demonstrated to His disciples the fact that a great change had taken place.

The disciples were children in the School of Christ, learning a great lesfarmer and Breeder is entitled to son. To have crowded all lessons upon free consultation with its editors on them at once would have been injuriany phase of farming or stock rais- ous. So Jesus had said. See John 16:12, 13.
