

## Triggs' New Meat Market and Restaurant

I have re-opened my Meat Market in the new location—the Beermann building, which I have remodeled and fitted in first-class shape.

Besides a full line of the best Meat of all kinds I have added a line of Canned Fruits and Vegetables, Canned Fish, Confectionery, Tobacco and Cigars.

Everything New, Clean and Up-to-Date

WM. TRIGGS, DAKOTA CITY NEBRASKA

## Don't Be a Transportation Slacker

The country needs the use of cars.

Every hour you delay in loading or unloading freight, deprives someone of service.

Uncle Sam will soon need freight equipment—and will get it.

By quick work in handling freight the equipment can go 'round, your business can be taken care of.

DELAYS AT THIS TIME, IN LOADING OR UNLOADING FREIGHT, IS A SERIOUS MATTER—DO YOUR SHARE AND THE TRAFFIC PROBLEM WILL BE SOLVED.

## Sturges Bros. Have Moved

to 315 Pearl Street

where we will be glad to see all our old patrons, and we hope, many new ones. This move is necessary, as the building we now have is too small for our growing business.

**Sturges Bros.**

Old Location, 411 Pearl St.

Sioux City, Iowa

Pure Bred  
**Perc heron  
Stallions**

Captain 90975  
Wallace 121599

**CAPTAIN**—foaled May 1, 1912, color black, is a large, powerful horse, known as a sure foal getter.

**WALLACE**—foaled April 10, 1915, color dark dapple gray. Winner of First Prize for 1 year old at Oakland, Nebr., in 1916. Wallace is a very promising colt, stands 16 hands high, weighs 1625 lbs at 23 months old.

These horses are both inspected and guaranteed sound and in perfect breeding condition by the Live Stock Sanitary Board of Nebraska.

**Terms**—\$15 to insure mare in foal, \$20 for colt 9 days old. Due care will be taken to prevent accidents, but at mare owner's risk.

Both these horses will stand at my barn in Hubbard, Nebr., during the season of 1917.

**Louis Bogg**

Owner and Attendant

Hubbard, Nebr.

## IS THIS TOWN A WAREHOUSE SUBURB OR NOT

By HONORE WILLISIE, Editor of the Delineator.

Two years ago the Delineator started an architectural series which we called The House That Grows. The plan was to present a house in three stages of growth, each stage being complete and habitable. One could live in the first stage until financially able to add the second, then the third. The idea was to satisfy the American

desire for growth and improvement without sacrificing America's great need for permanent homes.

For the lack of homes is one of America's fundamental weaknesses. It goes hand in hand with our lack of family pride, and this breeds inevitably a lack of civic pride.

Community pride follows the love of home as surely as fine growth follows rich planting. And community pride dies where there is no community of interests.

The great complaint against the average suburban town is that it lacks interest in itself. You can't get the merchants and the townspeople to cooperate to any extent.

And the stores are poor and the suburban population is shifting and unreliable.

Doesn't this apply as well to the towns given over to mail order buying? Do you want your town, the town in which you have started your home, to thrive and improve? Well, it won't thrive and improve unless the tradespeople in your town are getting and giving a fair deal. Mail order buying turns your town into a suburb of a great city mail order house. It is taking out of your town the life blood, the circulation of which nourishes your home as well as those of your neighbors. It doesn't pay. That is why I'm glad The Delineator has excluded mail order announcements from the advertising columns. It has removed from our readers' homes a powerful temptation to buy away from home.

## ROYAL RAIMENT FROM AMERICAN SPECIFICATIONS

Royal wardrobes from American dress patterns? Ridiculous!

Nevertheless it is a fact that for years the nobility of England, France, Germany and other European powers have been fashioning the garments of their women folks from identically the same tissue paper pattern that is on sale in practically every nook and corner of the United States.

The funny part of it is that, while the world recognizes that Paris originates style, few people realize that the distribution of style information and the adaptation of Paris creations to the world's millions of well-dressed women are entirely in the hands of Americans.

There is one sixteen story building in New York city entirely devoted to the business of making dress patterns and publishing magazines which go to the four corners of the earth regularly with style information gathered from the fashion centers of the world, particularly Paris. These magazines not only are read in the United States to the extent of 1,500,000 a month, but the counterpart of one of them goes regularly to England, France, Germany, Italy and the Spanish speaking countries in editions especially prepared in those languages.

Furthermore, the paper patterns, which reproduce the fashions illustrated and explained in this magazine, also go to all of these countries, where they outsell all similar magazines and patterns indigenous to those lands.

And the best part of it all is that the woman who lives in Paris, Tex., is enabled to buy the very latest pattern from the house of Butterick at the same time that the woman of Paris, France, is seeking the same pattern in the Avenue de l'Opera shop of the concern. An interesting exhibit at the New York plant is a collection of original letters from titled ladies of Europe ordering Butterick patterns or the foreign editions of The Delineator. There are so many of these letters from French, English, German, Austrian, Russian and Scandinavian noblewomen that the eleven vellum bound volumes in which they are kept are known as "Butterick's Peerage." One letter is from the British Royal household, advising that the present Prince of Wales as a child was dressed by Butterick patterns. This supremacy of a United States institution in fashion distribution is certainly gratifying to every red blooded American who believes in "America Over All."

## DOUBLE DUTY

A Dairy Ration Has Two Main Uses—Life and Product.

(National Crop Improvement Service.) A ration is divided into two parts:

1. The part needed to maintain or keep the animal alive.

2. The part needed to make stored up material like wool, fat, meat or milk.

Milk is roughly in solids, one-third each casein (protein), fat and sugar. The casein in milk can only be furnished by the protein in the food. The fat and sugar may be derived from either protein, fat or carbohydrates.

If a cow has the ability to give 50 pounds of milk containing two pounds of casein, and only gets enough protein to make one pound of casein, then she will only give 25 pounds of milk.

A balanced ration is one that has just the exact amount of protein, fat and carbohydrates that the cow needs. Just what this is we cannot ever say exactly, because the amounts vary from week to week and no two cows are alike, nor are feeds alike.

A practical ration is one that has sufficient protein and enough total food to make the greatest amount of milk without the cow losing weight.

A commercially successful ration is the one that makes the most milk or profit, keeps the cow healthy and enables the use of the most roughage.

All the hay and ensilage a cow can eat will keep her alive and make about 15 pounds of milk. Any more milk has to come from grain or grain feed.

The farm can usually raise carbohydrates cheap in the form of hay and ensilage, and, outside of clover, peas, etc., protein can usually be bought cheaper than it can be raised.

The average price of protein feeds with 20 per cent digestible protein was about \$26 to \$35 per ton before the war, but the prices are much higher now, while hay (clover) with 5 1/2 per cent digestible protein has been rated at \$10 per ton, so the protein feed at \$40 would furnish protein about the same as clover at \$10.

## DIFFERENT COWS, DIFFERENT FEEDS.

(National Crop Improvement Service.)

No suggestions that we can offer nor any other formula that can be made can be followed to the letter as a druggist follows the prescription of a physician. Feeds vary in their nutritive values, some being better than the average and some not as good, and cows vary in their ability to digest and transform nutriment. These conditions make it necessary for the feeder to use a good deal of judgment and not follow too blindly the suggestions of others. Any good stock feed is recommended as a base, to be supplemented by home-grown roughage.

## CONCENTRATES FOR RATIONS

Taken From an Article by E. S. Savage, Professor of Animal Husbandry, New York College of Agriculture.

(National Crop Improvement Service.)

A good rule to follow in all rations is to have at least three plants represented in the ration. There are seven factors which should be considered: (1) Bulk, (2) Digestibility, (3) Relation between the digestible protein and carbohydrates and fat, (4) Variety, (5) Suitability of the feeds to the animal and product, (6) Palatability, (7) Cost.

As an example, choosing the cheapest feeds relatively, considering manurial values, suitability and all, we would recommend the following mixture of grains as suitable for dairy cows at present prices:

600 pounds distillers dried grains.  
400 pounds gluten feed.  
300 pounds wheat bran or brewers dried grains.  
400 pounds hominy feed.  
300 pounds cottonseed or oil meal.

## SALT FOR CATTLE.

(National Crop Improvement Service.)

Professor Henry says that a cow requires three-quarters of an ounce per day per 1000 lbs. of weight and six-tenths of an ounce per day per 20 lbs. milk. Therefore, a cow which weighs 1200 lbs. and gives 30 lbs. milk should have 1.8 ounce salt. It must be remembered, however, that salt is generally included in high-grade dairy feeds: It is well to give cows access to extra salt. They will take what their roughage demands.

## THE PRICE OF FEED.

(National Crop Improvement Service.)

Feed is handled on a smaller margin than coal, ton for ton. The retail feed dealer who buys in carload lots can sell as cheap as the manufacturer can in less-than-carload lots, the difference in freight rates being the dealer's gross profit. In nearly every instance, a group of farmers can order their feed, through a dealer, in carloads and make a material saving. The difference in freight alone will show a good profit.

Take the chill off the drinking water in cold weather and cows will drink more and produce more.

Don't figure too fine on rations. Be liberal but don't overfeed. You can kill all of your profit by feeding more than the cow can assimilate.

(National Crop Improvement Service.)

The human element in dairy feed is important. Two men may have the same equipment, one make good money, the other fail, while both are supposed to be feeding by the same system and the same tables.

Horse sense is good cow sense.

## Driving the brain starts the pain

Over-work, worry and the constant strain of a business life are often a cause of much trouble.

**Dr. Miles' Nervine** is highly recommended for all Nervous disorders. It is particularly invaluable to business women. Regulate your bowels by using

**DR. MILES' LIVER PILLS**

IF FIRST BOTTLE, OR BOX, FAILS TO BENEFIT YOU, YOUR MONEY WILL BE REFUNDED.

NERVOUS ATTACKS.

"I suffered with nervous attacks and headaches. Then my liver got out of order and it seemed as though my whole system was upset. I commenced using Dr. Miles' Nervine and also took Dr. Miles' Liver Pills and now I feel perfectly well in every way. My bowels also are in good shape now."
