

### Cattle Buying for Swift & Company

Swift & Company buys more than 9000 head of cattle, on an average, every market day.

Each one of them is "sized up" by experts.

Both the packer's buyer and the commission salesman must judge what amount of meat each animal will yield, and how fine it will be, the grading of the hide, and the quantity and quality of the fat.

Both must know market conditions for live stock and meat throughout the country. The buyer must know where the different qualities, weights, and kinds of cattle can be best marketed as beef.

If the buyer pays more than the animal is worth, the packer loses money on it. If he offers less, another packer, or a shipper or feeder, gets it away from him.

If the seller accepts too little, the live-stock raiser gets less than he is entitled to. If he holds out for more than it is worth, he fails to make a sale.

A variation of a few cents in the price per hundred pounds is a matter of vital importance to the packer, because it means the difference between profit and loss.

Swift & Company, U. S. A.

### WORLD NEEDS FOOD

Demand Makes Opportunity for Returning Soldiers.

Thousands Will See Glorious Possibilities in Settlement of Available Farm Land in This Country and in Canada.

The war is over, peace will soon be signed, the fighting nations have sheathed their swords, and the day of reconstruction has come.

What of it? Hundreds of thousands of men, taken from the fields of husbandry, from the ranks of labor, from the four walls of the counting house, and the confines of the workshop, taken from them to do their part, their large part, in the prevention of the spoliation of the world, and in the meantime removed from the gear of common everyday life, will be returning, only to find in many cases old positions filled, the machinery with which they were formerly attached dislocated.

Are they to become aimless wanderers, with the ultimate possibility of augmenting an army of menacing loafers? If they do it is because their ability to assist in laying new foundations, in building up much-needed structures, is underestimated. Men who fought as they fought, who risked and faced dangers as they did, are not of the caliber likely to flinch when it comes to the restoration of what the enemy partially destroyed, when it comes to the reconstruction of the world, the ideals of which they had in view when they took part in the great struggle whose divine purpose was to bring about this reconstruction.

Inured to toil, thoughtless of fatigue, trained in initiative and hardened by their outdoor existence, they will return better and stronger men, boys will have matured and young men will have developed.

They will decide for themselves lines of action and thought, and what their future should and will be. On the field of battle they developed alertness and wisdom, and they will return with both shedding from every pore.

Action was their watchword, and it will stand them in good stead now that the din of the battle no longer rings in their ears, or the zero hour signals them to the fray, and it will continue their entire existence.

But if they return to find their old vocations gone, their places filled, the institutions with which they were connected no longer existing, new walks of life and employment must be opened to them. It may be that the counting house, the factory, the workshop will have lost their attraction. The returned soldier will look elsewhere for employment; within his reach there is always the "Forward-to-the-Land" necessity. In this lies the remedy that will not only take care of a multitude of those who may not be able to return to their former occupations, whose desires are not to do so, whose health prohibits them from indoor life or whose outdoor habits from the past one, two, three or four years have given them such a taste and desire for it that confinement would be unbearable. Farm life will thus appeal to them, and the indications are that it will be taken advantage of by thousands. It means much to them as well as to the continent of America that provides the opportunity to the world at large, and to the stricken and famished nations of Europe, who, not only today, but for years to come, will require the sustenance that can only largely be supplied by the United States and Canada. By following the pursuit of agriculture the returned soldier will continue the cause he so greatly advanced when fighting on the field of battle. Both countries have undeveloped areas yet open to settlement.

There is little need here to direct attention to the wealth that has come to the farmers of Canada within the past few years. It is not only in grain growing that unqualified and almost unequalled success has followed honest effort, but the raising of horses, cattle, sheep and hogs has been a large source of profit. These are facts that are well known to the many friends and acquaintances of the thousands of farmers from the United States who have acquired wealth on the prairies of Western Canada. Farms of from one hundred and sixty to six hundred and forty acres of the richest soil may be secured on reasonable terms, and with an excellent climate, with a school system equal to any in the world, and desirable social conditions, little else could be asked. Canadian statesmen are today busily engaged planning for the future of the returned soldier with a view to making him independent of state help after the immediate necessary assistance has been granted, the main idea being to show in the fullest degree the country's appreciation of the services he has rendered. But now that the war is ended, and the fact apparent that of all vocations the most profitable and independent is that of the farmer, there will be a strong desire to secure farm lands for cultivation. Canada offers the opportunity to those seeking, not as speculation but as production. The deepest interest is taken by Federal and Provincial authorities to further the welfare of the farmer and secure a maximum return for his efforts. Large sums of money are spent in educational and experimental work. Engaged on experimental and demonstration farms, and in the agricultural colleges, are men of the highest technical knowledge and practical experience, some being professors of international reputation. The results of experiments and tests are free and available to all. Educational opportunities for farmers are the concern of the government and appreciation is shown by the number of farmers who attend the free courses. Agriculture in Canada has reached a high standard, notwithstanding which lands are low in price.

Thus upon the United States and Canada for many years will rest the great burden of feeding the world. With free interchange of travel, difficulties of crossing and recrossing removed, Canada may look for a speedy resumption of the large influx of settlers from the United States which prevailed previous to the war. During the war period there was a dread of something, no one seemed to know what. If the American went to Canada he might be conscripted, put in prison, or in his attempt to cross the border he would meet with innumerable difficulties, most of which, of course, was untrue. These untruths were circulated for a purpose by an enemy, which, it was discovered, had an interest in fomenting and creating trouble and distrust between two peoples whose language and aims in life should be anything but of an unfriendly character. The draft law of the United States, adopted for the carrying out of the high purposes had in view by the United States, kept many from going to Canada during the period of the war. The citizen army of the United States was quickly mobilized, and contained a large percentage of the young men from the farms. In this way many were prevented from going to Canada.

That is all over now. There are no real or imaginary restrictions; there is no draft law to interfere. On the contrary, there is an unfathomable depth of good feeling, and the long-existing friendship is stronger than ever. This has been brought about by the knowledge of what has been done in the recent great struggle, each vying with the other in giving credit for what was accomplished. In thought and feeling, in language, in aims in life, in work, in desire to build up a new world, there has been bred a kinship which is as indissoluble as time itself.—Advertisement.

Anyway, She Said Something. Here is a story about Princess Mary, of the days when she used to steer for her brothers on the Thames. One afternoon their boat nearly collided with another boat rowed by two Eton boys.

"When are you going to learn to row?" asked one of the Etonians, as the boats bumped.

"When you learn manners!" retorted Princess Mary.

That, at least, is one version. The second journalist, having more space to fill, perhaps, reported the conversation as follows: Eton Boy—Why doesn't your mother teach you to steer before she sends you out?

Princess Mary—Why doesn't your mother teach you manners? Possibly there is a third version floating around. What was it she really said?—London Mail.

Good Reason. Sergeant—"Why did you sell your wrist watch?" Private—"Time was hanging too heavy on my hands."

A man's reputation for wisdom depends less on what he really knows than it does on what he doesn't say.

No man ever thinks a woman talks too much—for a woman.

Some men work hard, while others only work soft marks.

The wings of thought bear us on to action.

The higher the price of meat, the more food we have for reflection.

Much Can Be Accomplished if Each Will Determine to Do His or Her Part.

Several million Americans, great and small, will be members of a light-saving crew this winter. Long nights require more lights, and more lights require more fuel in the plants where coal is used to produce electricity and artificial gas. The more fuel we use over here, the less can be used to bunker the ships to bring the boys home. The light-saving crew must observe these rules:

Turn off every light as soon as it is no longer needed.

Do not go from room to room leaving a trail of light behind you.

Replace all the poor, fuel-wasting lights by efficient ones.

Use every bit of daylight to work by as late as possible.

Never sacrifice light at a cost to the eyes.

Did you ever realize that there is great difference in electric lights? A carbon filament light burns with a red glow, while a tungsten yields a white, intense light. A 10-watt tungsten filament burning four hours a day, uses about 272.6 pounds of coal in a year. A carbon filament uses twice this amount.

His Mind Was a Blank. A young noncommissioned officer was having his first experience in putting his men through some of the drills that he himself had gone through often and well. When the time came for the command, "Battalion, halt!" the poor boy's mind was suddenly a blank. His knees shook, his lips trembled as he opened his mouth to say the words that would not come, but his men marched before him, his superior officer was looking on, and an order must be given. Driven thus to desperation, he took a new grip on life and shouted frantically: "Fallers, whoa!"

Her Method. "Does Mildred talk when she plays golf?" "No, only when you play."—Life.

Onions are recommended as a cure for indigestion, but as yet no cure has been discovered for onions.

A girl seldom cares much for a man unless she gives him a lot of advice.

Happy is the man who owes nothing and whom no one owes.

For centuries GOLD MEDAL Haarlem Oil has been a standard household remedy for kidney, liver, bladder and stomach trouble, and all diseases connected with the urinary organs. The kidneys and bladder are the most important organs of the body. They are the filters, the purifiers of your blood. If the poisons which enter your system through the blood and stomach are not entirely thrown out by the kidneys and bladder, you are doomed.

Weariness, sleeplessness, nervousness, despondency, backache, stomach trouble, headache, pain in loins and lower abdomen, gall stones, gravel, difficulty when urinating, cloudy and bloody urine, rheumatism, sciatica and lumbago, all warn you to look after your kidneys and bladder. All these indicate some weakness of the kidneys or other organs or that the enemy microbes which are always present in your system have attacked your weak spots. GOLD MEDAL Haarlem Oil Capsules are what you need. They are not a "patent medicine," nor a "new discovery." For 200 years they

have been a standard household remedy. They are the pure, original imported Haarlem Oil your great-grandmother used, and are perfectly harmless. The healing, soothing oil soaks into the cells and lining of the kidneys and through the bladder, driving out the poisonous germs. New life, fresh strength and health will come as you continue the treatment. When completely restored to your usual vigor, continue taking a capsule or two each day; they will keep you in condition and prevent a return of the disease. Do not delay a minute. Delays are especially dangerous in kidney and bladder trouble. All druggists sell GOLD MEDAL Haarlem Oil Capsules. They will refund the money if not as represented. GOLD MEDAL Haarlem Oil Capsules are imported direct from the laboratories in Holland. They are prepared in correct quantity and convenient form, are easy to take and are positively guaranteed to give prompt relief. In three sizes, sealed packages. Ask for the original imported GOLD MEDAL. Accept no substitutes.—Adv.

### EARTH WILL BE REPLENISHED

Miracle of Restoration Sure to Follow the Destruction That Has Been Wrought in Europe.

The forests of France will grow again, the fields laid barren will bear, once more their golden harvests, the youth of Europe destroyed by war will be renewed.

This is the old, old miracle of the earth, and dull indeed is the mind of that man who does not behold it with a sense of profound wonder. Such a man goes through life but dully. He is like a traveler in a new and beautiful country who sees nothing upon his whole journey except the buttons on his vest.

Man wastes and destroys, but God constantly replenishes the earth in the footsteps of all destructive creatures. Even when man himself is destroyed, God renews him again as the dead seed is renewed in the dust where it has fallen.—Los Angeles Times.

Dr. Pierce's Pleasant Pellets put an end to sick and bilious headaches, constipation, dizziness and indigestion. "Clean house." Adv.

A good action is never lost.

### Influenza and kindred diseases start with a cold.

Don't trifle with it. At the first shiver or sneeze, take

Standard cold remedy for 20 years—in tablet form—safe, sure, no opiates—breaks up a cold in 24 hours—relieves grip in 3 days. Money back if it fails. The genuine box has a Red top with Mr. Hill's picture. At All Drug Stores.

### Itching Rashes Soothed With Cuticura

All Druggists, Soap 75, Ointment 50 & 60, Talcum 25. Sample each from "Cuticura Dept., Boston."

Farms for SALE, free big list. Missouri and Illinois stock, dairy and grain farms; all sizes. Write to Ross A. Hill, 128 McCasland, St. Louis, Mo.

SPOT CASH for Liberty Bonds and Bonds partly paid for. Write for full particulars. Free offer. Lewis & Co., 404 Lehigh Bldg., Kansas City, Mo.

W. N. U., SIOUX CITY, NO. 1-1919.

Stock Raising in Western Canada is as profitable as Grain Growing. In Western Canada Grain Growing is a profit maker. Raising Cattle, Sheep and Hogs brings certain success. It's easy to prosper where you can raise 20 to 45 bu. of wheat to the acre and buy on easy terms. Land at \$15 to \$30 Per Acre—Good Grazing Land at Much Less. Railway and Land Co.'s are offering unusual inducements to homeseekers to settle in Western Canada and enjoy her prosperity. Loans made for the purchase of stock or other farming requirements can be had at low interest. The Governments of the Dominion and Provinces of Manitoba, Saskatchewan and Alberta extend every encouragement to the farmer and ranchman. You can obtain excellent land at low prices on easy terms, and get high prices for your grain, cattle, sheep and hogs—low taxes (none on improvements), good markets and shipping facilities, free schools, churches, splendid climate and sure crops. For illustrated literature, maps, description of lands for sale in Manitoba, Saskatchewan and Alberta, reduced railroad rates, etc., apply to Superintendent of Immigration, Ottawa, Canada, or G. A. COOK, DRAWER 107, WATERTOWN, S. DAK.; R. A. GARRETT, 311 JACKSON ST., ST. PAUL, MINN. Canadian Government Agents.

His Trouble. The young, witty-looking Tommy was leaning gracefully across the counter in the bar of the Cow and Caterpillar. Every now and then he would give a twitch to his left arm. "Shell shock!" whispered a sympathetic observer. "Poor fellow." "I wonder if he will tell us his experiences?" said another man. The subject of their remarks then turned to them and remarked, amiably: "I wonder if I shall ever make this darned wristwatch go?"—London Tit-Bits.

By treating them with certain gases a Frenchman has succeeded in keeping eggs fresh for ten months.

The first phonograph was made forty years ago, but its popularity is of more recent date.

When a girl is in love she is hungry only between meals.

Why, Certainly! Smartliff was showing off his great knowledge to a girl the other evening. "Can a person strike without having something to strike with?" he asked. "Certainly," she said, without thinking. He gave a conquering snicker. "What do those laboring men strike with?" and he snickered again. "With unanimity," she replied promptly, and he pulled in his horns.
