#### ITEMS OF INTEREST

##### GLEANED FROM

##### OUR EXCHANGES

Wynot Tribune: Mrs. Thos. F. Murray visited with her parents in South Sioux City Friday.

Newcastle Times: Mrs. Mike Donahy and little son, went to W... Saturday to visit home folks.

Maebel items in Newcastle Tim. Rev. S. A. Draise of Dakota City, was a business caller here last week.

Walthill Citizen: Mrs. W. H. Mason was a Sioux City visitor Monday and Tuesday. Mrs. Alice Van Cleave of Homer, is staying at the Jess Cor house.

Sioux City Tribune, 16th: Private David E. Anderson and Miss Carrie E. Strom, of Sioux City, were married at South Sioux City, Wednesday afternoon, by Rev. J. L. Phillips.

Allen News: Mr. Lyle of Minneapolis, is visiting his daughter, Mrs. Gaughran. Miss Alice Underhill returned to her home in Waterbury last Saturday, having spent a few days with her sister, Mrs. Leonard Boyle.

Sioux City Tribune, 15th: Mrs. Lee Ellard, of Fort Dodge, Iowa, is spending several weeks in the home of Mrs. J. E. Triggs. Edward Phillips, of Carrington, N. D., is spending the week in the J. E. Triggs home on Harrison avenue.

Ponca Advocate: Cecil LeRoy Nelson visited friends in Jackson and South Sioux City Friday and Saturday. Attorney W. V. Steuterville and Clint Wilbur, of South Sioux, and County Attorney George Leamer, of Dakota City, attended a case in the county court here Monday.

Sioux City Journal, 19th: The appointment of A. B. Cowie as receiver of donations for the Armenian relief fund of South Sioux City, Neb., was announced last night. Contributions also may be made at the Hummel and Priestly grocery stores in the north end of the town and the postoffice and the Bank of South Sioux City in the south end. The quota for South Sioux City will be \$1 for every voter.

Sioux City Journal, 21st: Mrs. A. H. Biven, aged 82, of South Sioux City, fell over a chair yesterday and dislocated her left shoulder. Her condition is satisfactory, the attending physician reports. The second death of influenza at South Sioux City, where nearly 500 cases have developed during two epidemics, occurred Sunday, when Fern May, 1-year-old daughter of Mr. and Mrs. Herman Stading, died. Five other members of the family, father, mother, and three children are seriously ill.

Lyons Mirror: The Freshman class gave a party Friday evening at the gymnasium. Mr. and Mrs. Linton helped to entertain the Freshies, and many games were played. When John F. Piper wrote to us from Sioux City, Iowa to send the Mirror-Sun to him at Suit 620, Farmers Loan & Trust Building, we were reminded that it will be just 62 years ago on the 17th of this coming May since we passed over this self-same ground with our parents, Mr. and Mrs. J. F. Warner, on their way to Nebraska, over the old territorial emigrant road, where this big building is now erected.

Emerson Enterprise: Mr. and Mrs. R. Bottger and three children went to Nacora Tuesday to visit with Mrs. Bottger's father, Mr. Anderson, who lives near there. Mr. and Mrs. M. McEntaffer went to Crofton Monday evening to spend a few days with their daughter. Mr. McEntaffer expects to do some work there and they will be home the latter part of this week. The Emerson High School basketball team went down to defeat at the hands of Dakota City, Friday night. This was the first game our boys had ever played and considering that Dakota City has

one of the strongest teams in north and Nebraska, we don't feel so discouraged after all.

Sioux City Journal, 16th: R. F. Waidell, of Dakota City, Neb., will not lose his sight as a result of a dynamite explosion in a Burlington locomotive recently. Vision, however, will be impaired for a period, his eyes being badly burned. Attending physicians state that he is much improved, although still confined to his bed. Charles Stillman, the South Sioux City boy, who was seriously injured recently when accidentally killed by a hunting companion, has greatly improved in condition, and unless complications arise, will be taken to his home Sunday. He has been at St. Joseph's hospital since the injury was sustained.

Whitehatch Chieftain: Mrs. Nellie Nunn was a Sioux City visitor last Friday. Misses Cora Mithoff and Rose Ross visited in Homer last Friday. Mrs. Murray, who has been visiting Mrs. M. S. Mansfield, returned to her home in South Sioux City last week. Mrs. Omar Kilbourn entertained at dinner Sunday, Mrs. Chas. Kilbourn of Macy, and Mr. and Mrs. Tilden Harris and their little daughter, Marjorie Ellen. Mr. and Mrs. Clarence Fisher were in Dakota City, to visit Mrs. Fisher's stepmother, Mrs. J. C. McCormick, who suffered a stroke of paralysis last fall. Mrs. McCormick went to live with one of her daughters in St. Joseph, Mo., last Sunday.

Sioux City Journal, 18th: A 5-day-old baby at South Sioux City probably has the unmistakable distinction of being the youngest smallpox patient in the northwest. The child's mother, Mrs. A. L. Mathwig, wife of State Agent Mathwig, has been ill with the disease for some time, and shortly after birth Monday the child also contracted the disease. Both patients are satisfactorily responding to treatment, reports the physician attending them. The 8-year-old daughter of Mr. and Mrs. Charles Lowrey, of South Sioux City, sustained a broken right thigh yesterday afternoon when struck by an automobile driven by Fred K. Rodnds, 412 West Fourth street. The accident happened at Fourth and Pierce streets. The child was taken to her home, Dr. Robert J. MacArthur, the attending physician, reporting that her condition was satisfactory. Mrs. Lowrey and her daughter were in Sioux City to visit Mr. Lowrey, who is ill in a hospital.

Sioux City Journal, 15th: Born—In South Sioux City, Neb., Monday, January 13, 1919, to Mr. and Mrs. Al Mathwig, a daughter. Carl Melvin, who has been convalescing in the hospital at Camp Dodge after being severely wounded in action in France, in the battle of July 28, has arrived at the home of his mother, Mrs. Geo. Hirschebue, of South Sioux City, Private Leo Monahan, who recently arrived at Newport News, Va., with the first returning company of engineers, has also arrived at his home in South Sioux City. Word has been received in Sioux City of the marriage of Miss Helen Mae Stidworthy and Lieut. Harry Fudge, which occurred Wednesday, January 8, at the Lincoln hotel, Lincoln, Neb. Only members of the immediate families were present. Mrs. Fudge wore a traveling suit of dark blue velvet. Following the ceremony a dinner was served to the wedding party. Lieut. Fudge and Mrs. Fudge left Wednesday afternoon for Washington, D. C., where they will make their home until Lieut. Fudge is discharged from the army. They will visit Major Stidworthy, Mrs. Fudge's father, at Fortress Monroe. Mrs. Fudge is a graduate of the Sioux City high school.

Sioux City Journal, 15th: Work at the ice houses at Crystal Lake and the two plants at North Riverside was held up for about two hours yesterday when I. W. W. delegates visited the plants and ordered all ice harvesters carrying I. W. W. cards to cease work. Four representatives of the organization visited each plant and ordered the men to walk out unless better food, better

lodging accommodations and more money were given them. The strike ended when officers of three different states went to the respective plants and either arrested or ordered the delegates to "keep moving." The four leaders at the South Dakota plant were arrested and placed in Sheriff James Halliday, of Elk Point, S. D., in charge of police at the lower plant, work was resumed, and the I. W. W. was dispersed. The delegates also were ordered away from the Crystal Lake ice house and work was resumed. Sheriff Halliday asserted that officers will be placed on duty at the Dakota plant throughout the ice harvesting season and that all I. W. W. who make trouble will be sent to jail. A policeman has been detailed to the Iowa plant and Dakota county officers sent to the Crystal Lake houses, no further trouble is anticipated.

Sioux City Journal, 17th: William H. Finnegan, who died at Colorado, S. D., last Friday, was a pioneer resident of South Sioux City. He came here in 1883 and resided in South Sioux City until 1912, a period of forty years. He then went to Colorado, where he operated the creamery business, in which he was engaged at the time of his death. He was born in Waukegan, Wis., in 1857, and moved with his parents to Plymouth county, Ia., when he was 12 years old. He is survived by three sons, Thomas Finnegan, A. E. F. Finnegan and Joseph P. Finnegan, of South Sioux City, and three daughters, Mrs. George W. Peterson, of South Sioux City, Mrs. C. W. Rottelberg, of South Sioux City, Neb., and Mrs. Charles Lamb, of Morehead, Ia. To paraphrase a proverb, the way of the I. W. W. is hard. It is indeed a rough and rocky road the "march" to the "wobblies' hall." They threw up their hands and relinquished their self imposed task of picketing the business of Crystal Lake, refusing to play the part of "martyr" any longer. When the gods that direct the destinies of the organization prevent their plans, and wives and parents to quell the fury of unnamed workmen. "Never again!" methinks the groans and defeated spirits. It happened over in South Sioux City. The "wobblies" entered because they had been dispersed Tuesday by Sheriff George Cain and his deputies when they attempted to stop ice harvesting at Crystal Lake, gathered in force Wednesday morning at the end of the street car line. As the Communists ice company employees approached, the pickets advanced and their fire, the honest workmen. Guns were pulled, knives flashed in the rays of the rising sun and the leaders of the motley I. W. W. crew commanded the workers to turn around and beat it. The ice company employees neglected to obey the best part of the order. They ran, yes, but were outdistanced by the "wobblies," who turned tail at the battlements of "let's go, fellers." A stopwatch in the hands of a timekeeper would probably have resulted in the discovery that several marathon records were shattered before the combination bridge was reached. Yesterday morning a reception committee composed of Sheriff J. E. Cain, of Dakota county, deputies and engaged citizens waited in vain for the "wobblies" to reappear. Strong medicine of a form guaranteed to cure the American belief in the efficacy of force and stout clubs. Several strangers were in the vicinity, but if they were disciples of the organization they kept the matter confidential. The sheriff and the deputies will be on the ground again this morning.

FARM BUREAU NOTES  
C. B. Young, County Agent

These last winter days are good for clearing off dead wood and trees from the orchard. Nothing pays better.

We will be glad to assist in every way possible, regarding planting to secure seed, eggs and birds. We have written for samples of several lists among them being one of white sweet clover, contained, at 25 cents per pound.

Subscribe for the Farm Bureau News. If any subscription that you wish to have, send it to your present director, or some other officer of the Farm Bureau, a list of which appears elsewhere in this paper. Subscription price 50 cents per year.

The women of the county should cooperate in making the special sewing societies during the second week in February a success. Miss Gollner and Mrs. Rivett of the State University, will conduct the work. This assures a very strong course. The meeting places will be announced later by Mrs. Thomas Graham, Chairman of the Home Makers' association of Dakota City, but they will be so numbered that everyone will be sure a meeting place.

We have a large number of bulletins on many subjects of material interest to both men and women, which we are glad to send free to anyone seeking application for them.

During the week we answered two calls to see cattle having lumps near their jaws. These were not regular lumps, inasmuch as they were not attached to the jaw bone, but are really abscesses. They are readily cured if left until they become soft, when they should be opened and small pieces of blue vitriol inserted into the wound. They should not be left to open by themselves.

Preserve and beautify your home with Mount City Paints and Varnish. For sale at Neiswanger Pharmacy.

#### METHODS OF VACCINATION.

There are two methods of vaccination, the simple, in which the serum alone is given, and which when given in heavy doses produces a tentative immunity which cannot be relied on for more than three or four weeks, although it may be good for as long as six or eight, and the double, in which the serum is given in light doses, and which produces a more permanent immunity. In the simultaneous treatment, a small amount of vaccine serum is given at the same time as the serum. This method is more satisfactory, giving a light form of cholera, which offers greater resistance than the simple treatment.

There is still a great deal of misunderstanding among those who have not made a special study of hog cholera vaccination, as to which treatment is best to give under certain conditions. For this reason, we are giving the following data taken from the Bureau of Animal Industry, U. S. Department of Agriculture, Washington, D. C., which is published in the Bulletin of the Bureau of Animal Industry, No. 894, issued August 21, 1917.

Table 1 shows the results of the two methods of treatment in infected herds. The hog under separate will which results were in sick herds, but from a study of the temperature and evidence of being well.

Table 2 shows the result of the two treatments in exposed herds, which were apparently well when treated.

Table 3 shows observations on the effect of the two methods on abortion in pregnant sows. This is a question which comes up every time vaccination is done in herds having bred sows, and should be of interest to all hog raisers.

Table 4 shows the results of the two methods on the treatment of pregnant sows. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 5 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 6 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

#### SEE NEED OF CITY PLANNING

Japanese Municipal Authorities Awake to Dangers Connected With Congested Centers of Population.

The remarkable expansion of Japanese cities during the last few years has accentuated the urgent necessity of city planning. With this end in view a conference of the mayors of the leading Japanese cities has occurred at Tokyo. Among those present were the mayors of Osaka, Yokohama, Nagoya, Kyoto and Kobe, while Tokyo municipality was represented by Messrs. Katsushima and Ogino.

In Tokyo, city planning was set on foot twenty years ago, about the same time the question of city planning was receiving attention in Europe and America," said Doerfer Seki, mayor of Osaka, in an interview with a Tokyo Yomiuri representative. "In Osaka, however, it is only a few years since the problem began to claim serious attention, although the necessity of city planning in Osaka is perhaps more urgent than in other cities. The density of population in Osaka is certainly greater than in other places and improvement in sanitary and other matters is urgently needed. It is estimated that the population of Osaka twenty years hence will be 2,650,000 and that of the two neighboring districts 2,800,000, making a total of 5,450,000. This estimate is based on the present rate of increase, but it is possible the rate of increase may be larger. Hence lies the urgent nature of city planning for Osaka."

Table 1 shows the results of the two methods of treatment in infected herds. The hog under separate will which results were in sick herds, but from a study of the temperature and evidence of being well.

Table 2 shows the result of the two treatments in exposed herds, which were apparently well when treated.

Table 3 shows observations on the effect of the two methods on abortion in pregnant sows. This is a question which comes up every time vaccination is done in herds having bred sows, and should be of interest to all hog raisers.

Table 4 shows the results of the two methods on the treatment of pregnant sows. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 5 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 6 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

#### EXPLOSION OF MINES OFF BRITISH COAST HAS RESULTED IN GREAT DIMINUTION OF CATCHES, IS REPORT.

Wilfred Busley, who is on the way to his tea plantation in Assam, India, said on his arrival in this city that the frequent explosions of mines off the British coast had caused a great scarcity of fish, according to New York Times. This was especially the case along the east coast of England and Scotland, and had also affected the coast of Holland. Herring, which formerly were plentiful at this season of the year off the coast of Scotland, selling at a cent apiece retail, now bring 15 cents, he said, and were scarce. Flounders and cod, formerly eight to ten cents a pound, are now worth 50 cents at retail. It was only at rare intervals, Mr. Busley said, that the poor were able to purchase fish.

"The only fish in British waters that appeared to defy the mines and torpedoes," Mr. Busley continued, "is the hardy halibut. Just before I sailed from England one of the steam trawlers off the coast was about to haul in the lines when the captain noticed a giant halibut following close behind a cod that was impaled on one of the hooks. The halibut made several attempts to swallow the cod and was eventually hauled up onto the deck of the trawler. The skipper told me that the big fish weighed 108 pounds, and was sold in the market for \$80."

Table 1 shows the results of the two methods of treatment in infected herds. The hog under separate will which results were in sick herds, but from a study of the temperature and evidence of being well.

Table 2 shows the result of the two treatments in exposed herds, which were apparently well when treated.

Table 3 shows observations on the effect of the two methods on abortion in pregnant sows. This is a question which comes up every time vaccination is done in herds having bred sows, and should be of interest to all hog raisers.

Table 4 shows the results of the two methods on the treatment of pregnant sows. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 5 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 6 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

#### HOW TO MAIL CUT FLOWERS.

You have some lovely forget-me-nots in your garden. You would like Mary to have some, but she is so awkwardly far away. Didn't it occur to you that you could mail them satisfactorily, if you only knew how? Here's how. Separate the large bunch into smaller bunches of perhaps four or five flowers. Now wrap out a wad of absorbent cotton in salt water—a teaspoonful to a pint will be sufficient. Break the damp wad into smaller pieces and wrap firmly about the ends of the stems. Finally wrap flower stems and all, loosely in newspaper wax paper if you have it. It is a good plan, too, to line the box with the dampened cotton.

Table 1 shows the results of the two methods of treatment in infected herds. The hog under separate will which results were in sick herds, but from a study of the temperature and evidence of being well.

Table 2 shows the result of the two treatments in exposed herds, which were apparently well when treated.

Table 3 shows observations on the effect of the two methods on abortion in pregnant sows. This is a question which comes up every time vaccination is done in herds having bred sows, and should be of interest to all hog raisers.

Table 4 shows the results of the two methods on the treatment of pregnant sows. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 5 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 6 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

Table 6 shows the results of the two methods on the treatment of infected herds. It is seen that in herds that are not infected, but that very little trouble comes from treating pregnant sows is far more apt to come from rough handling than from the treatment itself.

## COAL

FUEL ADMINISTRATOR GARFIELD has asked us to GET COAL NOW, so we can supply our customers with their winter needs NOW.

We have on hand some Fancy Illinois Egg Coal, Hocking Valley Coal, and have some Choice Wyoming Coal on way.

We can supply your needs NOW, but get your orders in early, while Coal can be secured.

Call on Mr. Herman Foley at the Elevator.

### Slaughter-Prestcott Elev. Co.

## Ford

You can make the price of a one-ton Ford truck by hauling your stock to the city with it. Order your car now, we have lots of orders ahead.

We carry a full line of house lamps at regular prices. 40 watt, 35 cents; 50 watt, 35 cents; 75 watt, 70 cents; 100 watt, \$1.10.
