DESPERATE LEAP FOR LIFE

Parachute the Only Hope of Occupants of Oceanliner Destroyed at the Front.

A Dutch observation balloon, anchored at the western front, had its cables cut by enemy airplanes and the balloon sailed thousands of feet upward into the clouds. A soldier in London Hall, who witnessed the incident, describes what followed...

After the balloon was free, they had destroyed their papers and instruments, established over the side of the basket, and leaped for life into the great void beneath them, trusting that the parachutes opened round their waists would save them when they should...

SPLENDID WORK OF DIVER

Feet of Underwater Repairing on Wrecked Steamer is Given High Praise by Shipping Men.

One of the most remarkable feats in the history of American labor, according to Capt. Louis Turner, representing marine engineers, was the submarine repairing of a steamer sunk in the waters of the California coast by a diver named Theodore Wick...

Large numbers of shipping men visited the dry dock where the ship went after Diver Wick's exploits, and were astonished that it had been possible to salvage the vessel at all. The diver's work is viewed all along the coast as an inspiration to labor in its great task of winning the war.

New Light on Term "O. K." President Wilson has his own way of doing things, and he also has a very good reason for doing them his own way. Not only does that apply to matters of world-wide importance but to trivial things as well.

Wheat Not a Necessary Food. When is not necessary. We are accustomed to regard wheat as a more or less indispensable article of diet. It isn't. It is an article of luxury, and absolutely nothing else. Wheat possesses over oats, corn and rice about 10 per cent more protein for use or beast. It has no more protein, and no better protein. It has no more fat and no better fat. It has no minerals salt better or in larger amounts. It has no more food or better food. It is just one of the cereals and there isn't the slightest evidence that it is the best one, because so far as comparative tests are concerned in animals it isn't the best one. It is very far from the best one. A. H. Taylor, M.D., U. S. Food Administrator.

Germany From the Clouds. "Eddie" Rickenbacker is quoted as saying: "Get many looks rather puzzled from above and there seems to be little flustering them back a ways from the lines. That is where an airplane's point of view is defective. The German hills and fields look as soft as ours. Probably they are, which is not very soft. Any field covered with grass always looks soft and you think it would make a fine landing place when you get down lower and are forced to land on any old field that happens to be under you, some time when you're anxious you learn differently."

LEGAL NOTICES

DEAN CORNELL, Owner. Col. E. F. RASMUSSEN, Auctioneer. C. J. GOODFELLOW, Clerk.

THE HERALD - \$1.25 Per Yr

CLAIMS CENTURY-OLD FUND

Chilean Government Asks Return of Unexpended Portion of Indemnity Paid in 1821.

The full bench of the Massachusetts supreme court has been called upon to determine the ownership of a fund nearly a century old, which is claimed by the commonwealth of Massachusetts on one hand and the Chilean government on the other.

In 1821 an American ship returning from China to Boston was seized by Chilean revolutionists and its cargo confiscated. When normal conditions prevailed in Chile the United States demanded indemnity and Chile paid \$70,400.

William H. Gardiner of Brookline, Mass., was selected to distribute the money among those entitled to it. He executed the trust except as to five Chinese—known only as Paqua and Moqua, merchants—and Thomas Furber of Boston. Mr. Gardiner failed to locate these persons or their representatives. When he died the trust was transmitted to his son, and upon the latter's death to the grandson and great-grandson, Robert H. Gardiner and Robert H. Gardiner, Jr., who are now its custodians.

"Cleans" Crowd of Cash. Vacuum cleaning money from street crowds was the striking scheme employed in one of the large cities some weeks ago for the benefit of the Red Cross, says Popular Science Magazine. A suction pipe was held over the heads of persons congregated on the sidewalk, and contributions collected by a leather-lunged man who shouted through a megaphone. Crisp dollar bills and worn greenbacks, it mattered not which, were drawn in by strong suction force when inserted in the nozzle of the tube.

Bandages Now Made Quickly. A recent invention which has not been marketed as yet, but is reported to be a great success, is an electric roller for use in making the much needed five-yard rolls of bandages. This new device is not only a great time and labor saver, but requires little practice to learn to operate. The rollers operated by hand, as they have been heretofore, require skill and training to operate them successfully and the work is strenuous. By rolling electrically the operator is able to keep both hands on the bandage while in hand operation one hand guides the roll or bandage and the other operates the roller.

Swamp a War Garden. Too old to be taken into the service George Hoy, a Japanese resident of Juneau, Alaska, has turned a mosquito swamp into a patriotic garden that has become the admiration of the city.

Cost of Infectious Diseases. Scarlet fever, measles and diphtheria cost the people of Chicago \$7,562,442 during the course of the year. This huge bill represents so much paid out as the price of carelessness and in difference, for much if not all of this disease might have been prevented by precautions, moralized the Journal of the American Medical Association urging the dollars and cents value of disease prevention.

The FOLKS AT HOME EXPECT YOU "OMAN'S" FOR "GAYETY" ENTERTAINING BURLESQUE; VANDOVILLE. Everybody Gets Aik Appny. 4343 THE SUBWAY AND 1137 SOUTH WEST OF CHICAGO.
