Make This Test For Acid-Stomach

There are millions of people who suffer almost daily from the horrors of an acid-stomach—indigestion; sour, gassy, stomach; distressing heartburn; sickening food-repeating; painful bloating and that miserable, puffed-up, lumpy feeling after eating. Many of these people have tried treatment after treatment; medicine after medicine; others have gone to doctors and stomach specialists and some to hospitals, but in spite of all of their efforts they have obtained no lasting relief or a permanent cure.

These symptoms simply mean acid-stomach. If allowed to run on, they are very likely to cause a lot of serious trouble. Dyspepsia, rheumatism, gout, lumbago, sciatica, splitting headache, dizzy spells, nervousness, sleeplessness, mental depression, melancholia, a feeling of listlessness and all-goneness—these are just a few of the disorders which can be traced to acid-stomach. As a matter of fact, acid-stomach is often the direct cause of those almost incurable conditions known as catarrh of the stomach, intestinal ulcer, and cancer of the stomach. The lives of those who suffer from these serious troubles are nothing short of daily agony. Surely, then, you must see how important it is to go at once to the seat of the trouble—acid-stomach. You know

what acid-mouth does to the teeth—how it eats right through the hard enamel and causes them to decay. Think then of the havoc that must be caused by excess acid in the stomach!

Even if you are not suffering any immediate stomach pains, but are not feeling just as fit and fine as you should, you should by all means make this test: Go to your drug store at once and get a big box of EATONIC. It is in the form of pleasant-tasting tablets—you eat them like a bit of candy. EATONIC is prepared for just one purpose—correcting acid-stomach by driving out the excess acid. EATONIC literally absorbs the excess acid. It brings instant relief from the pains of indigestion, heartburn, belching, sour, gassy stomach, bloating, etc. It makes the stomach pure, sweet, cool and comfortable, puts it in a normal, healthy condition, so that your food is properly digested. You need every bit of strength you can possibly get out of the food you eat—and EATONIC helps you get it.

Don't put this test off if you value your future good health and happiness. You run no chance at all because EATONIC is absolutely guaranteed to give you relief or your druggist will refund your money. The cost is a mere trifle.

TAKE EATONIC TODAY FOR YOUR ACID-STOMACH

Very Naturally. If a man is wide awake during the day he can afford to sleep at night.
Gert—What did Myrt do when she found out you said she was homely?
Mabel—Oh, she got real ugly about it.

Counterfeiter Caught! The New York health authorities had a Brooklyn manufacturer sentenced to the penitentiary for selling throughout the United States millions of "Talcum powder" tablets as Aspirin Tablets.

Aspirin "DON'TS"

Don't ask for Aspirin Tablets—say "Bayer!"
Don't buy Aspirin in a pill box! Get Bayer package!
Don't forget that the "Bayer Cross" is your only protection against dangerous counterfeits.

Don't fail to say to druggist: "I want 'Bayer Tablets of Aspirin' in a Bayer package." The genuine! Buy only the regular Bayer package with the safety "Bayer Cross" upon it and on each tablet inside.

Bayer-Tablets of Aspirin

The genuine American owned "Bayer Tablets of Aspirin" have been proved safe by millions for Pain, Headache, Neuralgia, Toothache, Earache, Rheumatism, Lumbago, Colds, Grippe, Influenza Colds, Joint Pains, Neuritis. Proper dosage on every "Bayer" package.

Boxes of 12 tablets—Bottles of 24—Bottles of 100—Also Capsules.
Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

FEED REQUIREMENTS FOR HORSES DIFFER

Horses at Heavy Work Need a Ration With a High Percentage of Grain.

(Prepared by the United States Department of Agriculture.)

There is much more to feeding old Dobbin than simply giving him a little corn and oats and then allowing him to fill up on whatever kind of hay is available. Close observation is needed more in feeding horses than any other class of live stock. Horses of the same weight may have different feed requirements which make it necessary to study the individuality of the animals. If the horse is not doing well on a ration a slight change should be made, but an abrupt change may cause digestive disturbances.

To furnish energy for work, the horse must be fed in excess of what is needed for bodily maintenance. The amount of feed needed for maintenance is about two-thirds of that required for a horse doing moderate work. If the work calls for more energy than that in the ration, the stored-up energy of the body fat, or other body tissues, will be drawn upon with a consequent loss in body weight and energy. If such feeding is continued, the horse will be so weakened that he will be unable to perform his work profitably, and also will be especially liable to disease.

No Universal Feed.
No feed or combination of feeds will meet conditions in all parts of the country, and no feed or mixture is suitable for all classes of horses. In choosing a ration for a horse, select the one that meets his requirements, whether for growth, maintenance, work, breeding or fattening. Then estimate the amount of feed needed, and try out the ration. It may then appear that too little is being fed, or that the ration may be changed somewhat for economy or efficiency. If a number of horses are kept, different rations may be tested on different animals, and the best one selected for general use, but individual feeding gives the best results.

If feeds deficient in protein are fed,

an excessive amount must be consumed in order that the system may secure the required amount of protein, and a waste of feed will be the result. It is essential, therefore, to use a balanced ration—one containing protein and carbohydrates—in such proportion that they will meet the animal's need without waste.

More Grain for Light Horses.
Horses of the light breeds, used for pleasure or racing, need more grain and less hay than do horses doing slow or heavy work. Oats easily rank first among the feeds for light horses, and may be supplemented with crushed or soaked barley and bran. Corn is too fattening to constitute the bulk of the concentrates for light horses. It may be used, however, if supplemented with linseed meal or bran. A mixture of one of the leguminous hays, such as alfalfa or clover, fed with timothy or other hay will furnish the roughage. A larger quantity of hay should be allowed for horses less actively employed, and should be fed mostly at night. One pound of hay and from one to one and one-fourth pounds of grain to 100 pounds of live weight will be sufficient for such light horses at moderate work.

The quantity of feed for the work horse depends on the amount of work and on the speed at which it is performed; a horse requires considerably more feed when working at the trot than at the walk. It is a good rule to allow 1.1 pounds of grain and one and one-fifth pounds of hay to every 100 pounds live weight for horses at moderate work. At this rate a 1,200-pound horse would require 13 pounds of grain and 14½ pounds of hay a day. If the work is severe, the quantity of grain should be increased. The horse at hard work requires one and one-fourth to one and one-third pounds of grain for 100 pounds live weight. The hay, however, should not be more than one and one fourth pounds for an equal amount of live weight.

THRASHING SEASON AT HAND

Big Waste of Grain and Loss of Time Result When Outfits Are Not Overhauled.

(Prepared by the United States Department of Agriculture.)

Enormous waste of grain and much loss of time result every thrashing season because of the inefficient work of thrashing machines that have not been thoroughly repaired and put in working condition before the beginning of the working season. Defective parts are overlooked, or neglected in the hope that they will last through the season. When they fail in the midst of the thrashing season, serious losses often result before repairs can be made. In or just before the thrashing season new parts are difficult to get promptly, because of the rush of orders from many who have procrastinated.

As soon after the close of the thrashing season as possible, says the United States department of agriculture, the separator should be overhauled, necessary repairs and adjustments made, and needed parts ordered. This not only will prevent loss of time and money during the next working season, but will lengthen the life of the machine.

A bulletin has just been issued, as No. 5 in the series on "Care and Repair of Farm Implements," giving detailed instructions as to how to "lay by" grain separators. The discussion of every part of the machine is minute, constituting a handbook for the overhauling and repair of grain separators between seasons. It is a contribution from the bureau of public roads and is issued as Farmers' Bulletin 1030. Taken in connection with Farmers' Bulletin 991, which treats of operating adjustments, it is believed to constitute a complete thrasher's guide.

ADVANTAGES TO BE GAINED

Where Stock Raisers of One Community Raise Same Breed Better Prices Are Realized.

(Prepared by the United States Department of Agriculture.)

There are many advantages to be gained when the stock raisers of one community raise the same breed. Better prices may be secured from the sale of uniform product and suitable breeding stock can be secured near home.

KEEP COWS CLEAN

(Prepared by the United States Department of Agriculture.)

The cow must be kept in clean, comfortable quarters in order to produce the largest quantity of milk and butter. The essentials of such quarters are:

1. Plenty of light.
2. Plenty of fresh air, with no drafts.
3. Convenience.
4. A floor that can easily be kept clean.

SUGGESTIONS FOR DRY MASH

One Is Made of Cornmeal and Beef Scrap and Another of Bran, Middlings and Scraps.

(Prepared by the United States Department of Agriculture.)

Here is a suggestion for a good poultry dry mash: 3 parts by weight of cornmeal and 1 part beef scrap. Still another ration may be made up of 1 pound of wheat bran, 1 pound of wheat middlings, 6½ pounds of beef scraps and 16½ pounds of cornmeal.

CHICKENS SUITED FOR HOME

Little or No Attention Should Be Paid to Fowls Which Are Not of Local Importance.

(Prepared by the United States Department of Agriculture.)

In considering the breed of chickens best suited for the home flock, pay little or no attention to those which are not of local importance; that is, not being raised successfully in the community, except on the advice of experts.

DESIRABLE AS GARDEN CROP

Actual Food Value of Tomato Is Not as Great as That of Potato—Has Good Qualities.

(Prepared by the United States Department of Agriculture.)

The tomato is closely related to the potato, and while the actual food value of the tomato is not so great as that of the potato, it has certain qualities that make it one of the most desirable of our garden crops.

LONG-LASTING

Satisfaction for the sweet tooth.

Aid to appetite and digestion—benefit and enjoyment in LASTING form.

And only 5 cents a package.

Sealed Tight Kept Right

WRAPPED IN UNITED PATENT COUPONS

The Flavor Lasts

Subtlety wins but wisdom holds.

GREEN'S AUGUST FLOWER

has been a household remedy all over the civilized world for more than half a century for constipation, intestinal troubles, torpid liver and the generally depressed feeling that accompanies such disorders. It is a most valuable remedy for indigestion or nervous dyspepsia and liver trouble, bringing on headache, coming up of food, palpitation of heart, and many other symptoms. A few doses of August Flower will relieve you. It is a gentle laxative. Ask your druggist. Sold in all civilized countries.—Adv.

Cuticura Stops Itching and Saves the Hair

All Druggists, Soap, Ointment & Talcum. Sample each free of "Cuticura, Dept. 2, Boston."

DAISY FLY KILLER PLACED ANYWHERE

ATTRACTS AND KILLS ALL FLIES. Nest, clean, ornamental, convenient, cheap. Lasts all season. Made of metal, can't spill or tip over. Will not soil or injure anything. Guaranteed effective. Sold by druggists, or by express, \$1.25 prepaid, \$1.35.

HAROLD SOMERS, 100 De Kalb Ave., Brooklyn, N. Y.

Mystery Explained.

He stood amid the blaze and splendor of his magnificent mansion, and in his hand he held the portrait of a beautiful woman. His face was pale and haggard, and his lips moved convulsively.

What was this mystery? Was this the picture of his departed wife?

No.

Was it the portrait of his dead but dearly remembered daughter?

No.

What, then, was the cause of his haggard face?

Was it not the same portrait that two minutes ago had fallen from its nail, and raised a lump as big as a hen's egg on his head?

It was.

A Diagnosis.

"Oh, doctor," said a worried looking agrarian. "My wife is in an awful condition! From a medium fat woman she has been reduced to skin and bones. She talks incessantly in a loud squeaking voice, begins a sentence and never finishes it, and jumps from subject to subject without uttering anything that has the least sense to it."

"H'm! I see!" returned the physician. "Go home, Mr. Gableby, and take out your party line telephone at once. Your wife has been listening in on it too much."—Kansas City Star.

Lots of people make fortunes out of other people's curiosities.

Breakfast is Ready when you have a package of Grape-Nuts

for this tasteful blend of wheat & barley is ready-cooked.

Not a bit of waste. Usable to the last crumb. Usual price 15¢ per package.
