MOBILIZED FOR DISASTER CALLS

Red Cross Machinery of Organization Ready for Any Demand for Service.

60 BASE HOSPITALS READY

Chapters Provide Emergency Relief Committees and Establish Supply Centers to Answer Appeals.

Preparedness for disaster relief on a scale never before possible is being undertaken by the American Red Cross as one of the important features of its new peace program, in support of which a nationwide Third Roll Call will be conducted from Nov. 2 to 11 to obtain 20,000,000 members and \$15,000,000.

Plan Survey of Supplies. Since 1900 disasters of peace have cost many thousands of lives and have brought personal injury or property loss to 1,500,000 persons, destroying property valued at \$1,000,000,000. During 1917 eighty disasters were reported to the American Red Cross, 62 tornadoes, 5 floods, 4 great fires, two earthquakes, two serious mine disasters, two munition plant explosions and the tragic calamity which befell Halifax.

Under the direction of the Red Cross the entire resources of all communities will be mobilized for instant use when needed. Chapters everywhere will create committees to make surveys, locating emergency food supplies, drugs, hospital supplies, cots, mattresses, blankets, clothing, armchairs, schools and other buildings for housing refugees and will canvass physicians, nurses, social workers and others prepared to respond instantly to calls for their services in disasters.

National Resources Available. The thirteen divisional organizations will establish disaster relief supply centers and take charge of operations when assistance is needed. In cases of major disasters where the resources of the division in which it occurs are overtaxed, the entire strength of the Red Cross in the country may be mobilized through national headquarters.

Fifty base hospitals organized by the American Red Cross and turned over to the government for use with the military forces will be ready for immediate service.

Mrs. Gallagher Knew What to Do

EXPERIENCE SHE'D HAD BEFORE TAUGHT HER THE VALUE -OF TANLAC.

"When I felt myself going down this summer I knew exactly what to do, for I had taken Tanlac before and it fixed me up so fine I just knew it would do so again," said Mrs. Barbara Gallagher, who lives at 1009 Plum St., Lincoln, Neb.

"For many years," she continued, "I suffered agonies from rheumatism and never knew what it was to be without pains or aches somewhere in my system. My head ached like it would burst and I would get so dizzy at times that everything seemed to be whirling around till I would feel like I was going to fall. My nerves were in such a dreadful state that I would roll and toss half the night without being able to sleep a wink, and my appetite was so weak that I would have attacks of indigestion and sometimes they would nearly put me out of business.

"One of my friends advised me strongly to try Tanlac and I could see a marked improvement right after I started on it. My nerves grew quiet so I could sleep better, the headaches and dizzy spells passed away, my appetite increased and my indigestion soon became all right. Tanlac soon fixed me up all right and I have enjoyed splendid health ever since. Whenever I feel the least bit out of the way I take a little Tanlac."

Tanlac is sold in Dakota City by Neiswanger Pharmacy, in South Sioux City by Shane's Pharmacy, and in Homer by Wagner's Pharmacy.

Seed Sweet Clover In The Spring

Early spring was the most popular time for seeding among eighty-eight farmers supplying the Nebraska College of Agriculture with data of their experiences with sweet clover. Eight seeded in February, 16 in March, 49 in April, 9 in May, 1 in June, 3 in August, 5 in September, and 1 in November. The eighty-eight farmers were growing a total of 1,861 acres, or 22 acres per farm. Sixty-seven were growing it for pasture, 34 for soil improvement, 24 for hay, 18 for seed and 9 for bees. Fifty-nine were growing it on upland, 22 on well-drained bottom land, 7 on rather swampy land, and 13 on alkali land. Some found it of value on sandy land subject to blowing. Some grew it successfully on alkali land where almost nothing else would grow. Further information may be found in Agronomy circular No. 7, which will be sent free by the College of Agriculture, Lincoln.
