## Automobile Insurance

Is just as necessary, just as much a business proposition as insurance on any other property.

So many factors combine to cause auto losses that the owner cannot feel safe without insurance. Defective Wiring, Short Circuit, Lightning, Leak in Gasoline Tank, Cigar Stubs, Theft, Back Fire, Tornadoes and Windstorms, Property Damage, Public Liability, Collisions, Burning of garage in which auto is stored are a few sources from which damage or complete destruction of automobiles result.

We can issue you a policy insuring you against any or all of these causes and which will cover your car any place in the United States. Our rates are such that you cannot carry the risk yourself. Our companies are rated among the best.

WHY TAKE A CHANCE BY CARRYING YOUR OWN INSURANCE?

brother-in-law, Leo Wagner, of the Ryan Drug Co. Mrs. James Heene is quite sick at her home here. Her son, W. J. Heene, of Jefferson, S. D., was in town to see her Monday. Joe Hagan, a brother, of Sioux City, and Mrs. Frank Heenan and Mrs. John Hart of Hubbard visited her Tuesday.

Sioux City Journal, 2: The ill wind, or to be exact, the prolonged rainy spell, did not fail to do its good turn, thereby confirming the truth of the old adage. The water level of Crystal lake was raised sixteen inches by the recent down-pours saving the amusement place owners and others about the lake \$30,000, which they had planned to spend in raising the water level of the lake according to Joe Marshall, part owner of one of the bath houses. Mr. Marshall said the water now has raised sufficiently to cover the entire beach on the west shore, coming within a few inches of the floor of the bath house and the dancing pavilion built out over the water. "About every five years the water level in the lake becomes so low we have had to fill it. Four years ago we pumped water into it. We had subscribed about \$20,000 and expected help from the state in constructing a ditch from Elkhorn creek six miles away, to the upper end of the lake, but the rainy weather saved us. The lake probably will not need more water for another five years, and we are assured that is deep enough to afford nearly every kind of water sport this summer."

## May Not Pay to Pasture Too Early

Where possible it pays to not use pastures too early, suggests the State College of Agriculture. The season being a little late there is naturally a little impatience to get the cattle on pasture. Under ordinary conditions it pays to keep the cattle off the pasture until the sod has become firm and the grass has started a good growth. It is not a good plan to suddenly switch dairy cattle from dry stable feed to new grass exclusively. It is better to start them gradually, say for a few hours in the middle of the day, after they have had a good feed of hay. It is well for several days to take the cattle back to the yard after a few hours in the pasture. Such a plan is not only desirable for the sake of the pasture but it gives the cow an opportunity to adapt her system gradually to what otherwise would be too sudden a change, and which frequently results in upsetting the cow and causing a feverish condition, often resulting in badly flavored milk.
