She Meant Well.
The orchestra in the grillroom was playing classical music during the lunch hour. A woman was listening with what she probably regarded as the proper attitude to assume when good music is played. After each number she applauded, and murmured to her companion, "I do so adore good music!" She beckoned to a waiter and asked him if the orchestra played any music by request. She was informed that it did.

"Will you please tell them to play the sextette from 'Russia' for me?"

Back Lame and Achy?
Do you get up mornings tired and achy? Evening find you all "worn-out"? Likely your kidneys are to blame. Hurry and worry, lack of rest, and eating too much meat, throw a strain on the kidneys. Your back gives out; you are tired and likely suffer headaches and dizzy spells. Take things easier and help the kidneys with Doan's Kidney Pills. Doan's have brought new strength to thousands. Ask your neighbor!

A South Dakota Case
H. A. Rademacher, farmer, Route No. 1, Emory, S. D., says: "My back was weak and ached. When I sat down while and went to get up an awful pain took me through my kidneys and I had to straighten up gradually. The secretions passed too frequently and were scanty and highly colored. I used Doan's Kidney Pills and three boxes cured me."

A St. Louis Woman Tells Her Experience

St. Louis, Mo.—"During my early married life I found 'Favorite Prescription' wonderful help. At one time I was in very poor health and became nervous and irritable. I took Dr. Pierce's Favorite Prescription and it was not long until I was a well woman. I certainly feel very grateful for what this medicine did for me and am glad to recommend it."—MRS. Big Wealth in Hands of Few

Fifty Families in United States Control More Than \$100,000,000 Each.

ROCKEFELLER AT HEAD OF LIST

Oil King's Estate Is Now Estimated at Between Three and Five Billion—Veritable Dynasty in Every Important Industry.

New York.—Fifty families in the United States control over \$100,000,000 each, 100 families control over \$50,000,000 each, and 500 families control over \$10,000,000 each.

John D. Rockefeller's estate is now up to \$3,000,000,000. Five billion dollars of wealth in the United States has been handed down to heirs, many of whom were incompetents, in the last fifteen years.

Two hundred persons in the United States control \$15,000,000,000; in France the same amount is controlled by 480 times that number of people, or 96,000.

Dynasties to Fore.
Industrially the United States is becoming dynastic—there is a veritable dynasty in each important industrial structure, some of which are:

Sixty per cent of the tobacco trust wealth is in the hands of ten families. Twelve families, with the Rockefeller family away in the lead, control 50 per cent of the oil industry.

The railroads of the country are controlled by 1.3 per cent of the stockholders.

One and five-tenths per cent of the stockholders in the steel trust possess 51 per cent of the stock.

Two families control 51 per cent of the stock in the harvest interests.

These startling figures on the concentration of wealth in the United States were obtained from Henry H. Klein, deputy commissioner of accounts of New York city and a deep student of economic affairs. He has spent ten years collecting concrete

facts on the pyramiding of American wealth.

Mr. Klein's attention was called to the recent statement of George P. Hampton, managing director of the Farmers' National council, that 33 individuals own 2 per cent of the entire American wealth. He estimated this 2 per cent at about \$4,837,000,000. Mr. Hampton gave no names, but the following list of individuals and estates and their vast holdings, checked up to a recent date, was given by Mr. Klein:

Estates or individuals—	Amount.
John D. and William Rockefeller, \$3,000,000,000 to	\$3,000,000,000
Pratt family	400,000,000

Called Fire Department to Quench Flames Inside Him

Seeing a man rush up to a fire alarm box and turn in an alarm, Patrolman Winner of the New York city police department, inquired where the fire was. "Inside me," gasped Joseph Marone of Wooster, O. "I drank booze and want the firemen to run a hose down my throat and extinguish the flames."

The patrolman told the fireman where the fire was, but took Marone to the police station.

There are many families Mr. Klein mentioned in the \$10,000,000 class, and this includes Mrs. William Leeds, now Princess Christopher of Greece, and Alexander Smith Cochrane, until recently America's "richest bachelor" and now the husband of Mme. Ganna Walska, opera singer.

Mr. Klein's list, which is several pages long, does not go below the \$10,000,000 class.

Historic Tract Being Reclaimed

Famous "Campagna Romana" Is Being Cultivated and Is Yielding Big Crops.

LAYS IDLE FOR MANY YEARS

Since the Fall of the Roman Empire This Once Fruitful Tract Has Been Uncultivated—To Reclaim Many Thousand Acres.

Ostia, Italy.—Efforts are being made to reclaim and plant parts of the vast tract of land which stretches for several miles around Rome and goes by the name of the "Campagna Romana." It has been allowed to remain idle and uncultivated ever since the fall of the Roman empire.

Before that time it was a sort of terrestrial paradise; villas and gardens were dotted all over it as far as the eye could see. It was luxuriant with fruits and flowers, it supplied food and work for thousands upon

thousands of men, it was one of the most beautiful and intensely cultivated spots in the world.

When Rome, however, was obliged to resign her position as "the mistress of the world," the "campagna" was abandoned and gradually became a marshy, malaria-infected desert, inhabited only by a few hardy shepherds.

New Law Having Effect.
Now, however, the law which was recently passed, decreeing that anyone who does not cultivate his land to the utmost of its capacity, is liable to have the land confiscated, is beginning to have its effects.

Prince Aldobrandini has engaged a company to reclaim a huge estate of several thousands of acres, which he owns in the "campagna."

The work already has begun and an experimental station has been set up at Ostia. The land was first of all drained and then arrangements were made to obtain water from the Tiber for irrigation. Electric tractors to draw the plows were then bought and various kinds of fruit, vegetables and cereals were cultivated in order to find out how fertile the land is and what kind of crop it is most adapted for.

Yields Plentiful Crops.
The results were beyond the wildest hopes of any of the promoters of the company. The land, after lying idle for centuries, seems to have stored up its fertility throughout all that time and now yields crop upon crop with unstinting hand.

An attempt has even been made to grow cotton here and the experiment has been successful, but how successful it has been impossible to determine, as the cottonseed used was of the worst quality obtainable. This year, however, it is proposed to plant American or Egyptian cotton. So happy have the results at the experimental station been, that it is hoped that soon work may be begun for the total reclaiming of the whole of the "campagna."

To Teach Hondurans to Fly.
Tegucigalpa, Honduras.—Two American aviators have arrived in Honduras with American-built flying machines bought for the war department. They are engaged for a certain period to teach flying and how to care for the airplanes. It is expected that in peace times the machines will be used to carry mails over the country where railroads are scarce and roads bad.

John Carmichael, forty-five years old, a farmer's wife, was attacked and branded in many places with a hot iron she had been using. Her screams attracted persons passing by and a posse was organized to search for her assailant. Bloodhounds followed the trail of the Dixie Highway, nine miles south of here, where they lost it.

French Baby Has Heart in Pouch Outside Body
Paris.—Paris medical authorities were called to Soissons to examine an infant born to a working family with heart and intestines contained in a pouch on the outside of the child's body. The case was said to be the first of its kind on record. There is every indication that the child will live, as all the organs are functioning perfectly despite their displacement.

MOON AFFECTS RADIO

American Fleet Officers Make Interesting Discovery.

Efficiency of Air for Transmitting Radio Communications Affected by Changes of Moon.

Paris.—The changes of the moon have been found by the radio officers of the small American fleet in the Adriatic sea to have a striking effect upon the efficiency of the atmosphere for transmitting radio communications.

The officers have succeeded in drawing curves and other diagrams, based upon months of observation, which, they assert, reliably serve to indicate what atmospheric and celestial conditions affecting radio service will be met at any particular date in the future.

HARD TO EXPLAIN POISONING FEAR EXTINCTION OF HOLLY

Scientists Unable to Tell Why Bites of Some Animals Are Fatal and Others Innocuous. Botanists Say That Within Another Generation It May Be as Rare as the Mistletoe.

Scientists in Great Britain have been greatly interested in the recent case of a monkey bite resulting in the death of the king of Greece, says a London dispatch. The result is that a study is being made of the effects of bites from various animals. Inasmuch as the monkey is what is known as a "clean feeder," it seems extraordinary that the bite of such an animal should produce the fatal poisoning of a human being.

It does not, however, appear that the malignancy of an animal's bite can be measured by what it feeds upon. A dog is a carnivorous creature, yet its bite seldom produces serious results, while on the other hand the bite of a horse or a donkey frequently results in poisoning. Only a few weeks ago a woman died from being bitten by a donkey, while a man lost a hand through being nipped on the thumb by a horse.
