MORE THAN 100 INJURED ARE TAKEN TO HOSPITALS.

BLAME PLACED ON CREW

Eastbound Michigan Central Train While Derailed Cut in Half by Flyer.

Porter, Ind.—Twenty-seven persons are known to be dead and more than 100 were injured in the wreck of two passenger trains here.

New York Central train No. 151, New York and Boston to Chicago, plowed through Michigan Central No. 30, Chicago to Detroit and Toronto, demolishing a wooden coach, a combination passenger and baggage car and killing or injuring practically every person in it.

The wreck occurred at a lonely junction point, about fifty miles from Chicago. It was two hours before the first relief train arrived, and only efforts of volunteer fire fighters prevented many of the injured from being burned to death.

The accident was caused, according to railway officials, when the Michigan Central train crew failed to observe stop signals at the intersection of the two roads, and was thrown on to the New York Central tracks from the derailed switch. It was stated that the Michigan Central train should have stopped and allowed the New York Central train the right of way.

When the Michigan Central train hit the derailling switch at the cross-over it plowed across the ties for more than 300 feet, and stopped with the wooden coach in the path of the New York Central train. The heavy engine struck the coach at an angle, ground it into splinters, left the rails, plowed a hole in the earth and turned over on its side.

PRISON IS CROWDED

SHERIFFS NOTIFIED NOT TO SEND MORE PRISONERS TO THE STATE PENITENTIARY

MEN SLEEP IN PRISON YARD

Warden Fenton Reports Institution Full to Overflowing Making It Impossible to Properly Care for and Guard Criminals

Lincoln—Warden Fenton of the Nebraska state prison expects to notify all sheriffs of the state to send no more men to the penitentiary. The institution is crowded to the doors, with two men in each cell and some sixty assigned to sleeping quarters in bunks in the prison yard.

There are now 612 prisoners within the walls. This is a record for all time and more than 200 above the normal capacity. The warden considers it essential to call a halt and to refuse to receive more men either until more room is provided or some of the inmates are paroled.

The warden reports that in his estimation there are from 125 to 150 men who could safely be paroled and that in his opinion at least 125 first offenders, now eligible to parole, should be sent out. He predicts that not 5 per cent of them will go bad.

Other state institutions have put up the bars from time to time, especially hospitals for the insane and the feeble minded, but this is the first time that penitentiary authorities have faced conditions so acute as to demand attention.

It is said that recent and prolonged agitation against release of prisoners has influenced tightening of the clamps. Those in favor of the old arrangement have argued that those who complain against the parole system should put up the money for an addition to the penitentiary.
