Agricultural Enterprise.

"The instructions I get from our congressman on how to make a farm pay," remarked Farmer Corntossel, "are kind o' disappointin'."

"They give a great deal of information about agriculture."

"Yes, but what I want is some reliable advice about how to turn the old place into a real estate subdivision."

You naturally feel secure when you know that the medicine you are about to take is absolutely pure and contains no harmful or habit producing drugs. Such a medicine is Dr. Kilmer's Swamp-

Root, kidney, liver and bladder remedy. The same standard of purity, strength and excellence is maintained in every bottle of Swamp-Root. It is scientifically compounded from

vegetable herbs. It is not a stimulant and is taken in

teaspoonful doses. It is not recommended for everything. It is nature's great helper in relieving and overcoming kidney, liver and blad

der troubles. A sworn statement of purity is with

every bottle of Dr. Kilmer's Swamp-If you need a medicine, you should have the best. On sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to try this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper .- Adv.

Telephones on Public Works.

A complete automatic telephone sys tem, with 101 stations and 1,227 miles of line, is to be built for the sole pur-, - pose of communication between the dams and hydraulic works now under construction by the War department along the Ohio river, says Popular Mechanics Magazine. There are 132 of these dams, designed to maintain nine feet of water.

RUB OUT SORENESS

Sprains, Backache With Old St. Jacobs Oil.

Back hurt you? Can't straighten up without feeling sudden pains, sharp ches and twinges? Now, listen! That's lumbago, sciatica, or maybe from a strain, and you'll get blessed relief the moment you rub your back with soothing. penetrating "St. Jacobs Oil!" Nothing else takes out soreness, lameness and stiffness so quickly. You simply rub it on and out comes the pain. It is perfectly harmless and doesn't burn or discolor the skin.

Limber up! Don't suffer! Get a small trial bottle from any drug store, and after using it just once you'll forget that you ever had backache, lumbago or sciatica, because your back will never hurt or cause any more misery. It never disappoints and has been recommended for 60 years. Stop drugging kidneys! They don't cause backache, because they have no nerves, therefore can not cause pain.-Adv.

Rich Forsake Fifth Avenue

Tradesmen Steadily Break Exclusiveness of Noted Residence District of New York.

MRS. VANDERBILT LEADS WAY

New Exclusive District Expected to Spring Up in Section Where Near-Slums Existed Before-Long Fight for District.

New York .- Stealthy but steady advances by tradesmen, covering a period of more than twenty years, have virtually broken the residential exclusiveness of Fifth avenue, known the world over as the home precinct of the Vanderbilts, Carnegies, Harrimans, Plants, Fricks and other wealthy families.

One by one mansions which housed international personages and gave to Fifth avenue much of its glitter and fame are surrendering to commercial enterprise, and the rich are seeking homes in new "exclusive" parts of the city. Real estate men, who have watched with interest this aggression of trade, say that another decade will have wiped out the last bit of residential exclusiveness in the avenue.

Mrs. Vanderbilt Moves.

The change in Fifth avenue was reflected in the recent purchase of property bordering the East river at Fiftyeighth street by Mrs. William K. Vanderblit, Sr., where she intends to build a home in a section known as Sutton square. This bit of property is directly across from Blackwell's island, where a city prison is located, and is almost underneath the Manhattan ap-A Feeling of Security almost underneath the Manhattan approach to the Queensborough bridge. Real estate men expect that Mrs. Vanderbilt's migration to the East river will mean a new exclusive district in a part of the city where near-slums existed before.

Mrs. Vanderbilt, who a few years back helped to make Fifth avenue history with her brilliant social activities, said when she purchased the East river property that Fifth avenue had "lost its residential atmosphere, which was its most valuable charm." Traffic and crowds, resulting from the trade invasion, she said, had taken away its

Wage Fight for District.

The fight to "save" Fifth avenue has been waged since the late nineties, when real estate men began to get options on property near the magnificent mansions. Members of the Vanderbilt family and others owning homes there expended millions of dollars in buying tide.

at exorbitant figures, and after a lapse of years has fallen back for business use. Hotels, banking houses, jewelry stores, millinery and fine tailoring establishments have gradually crept northward along the thoroughfare.

The home which Mrs. Vanderbilt is forsaking at Fifth avenue and Fiftysecond street will become the site of a trust company. Its sale was made possible as the result of the death of Mr. Vanderbilt in Paris, when the house, owned by his estate, was sold to the highest bidder. The first actual break in the Vanderbilt holdings came when Gen. Cornellus Vanderbilt leased his home at Fifth avenue and Fifty-fourth street to a shoe firm.

The residence of the late Henry C. Frick, steel magnate, will eventually go to the city for use as a museum.

"Ocean of Air" Needs Watching

Navigation Lanes May Differ From Day to Day, Says Government Meteorologist.

DATA MUST BE GATHERED

Meteorologists Should Decide, After Study of Air Conditions, What Route and Altitude a Plane Should Take.

Washington, D. C .- The "bcean of air" which followers of aviation believe some day will be filled with great air liners, plying their way on regular schedules, must be studied from a meup property in an effort to stem the teorological standpoint and the whims and fancies of the element must be Much of this property was purchased reduced to easily understood data be-

fore the dream of world-wide commercial aviation can become a reality, according to C. LeRoy Meisinger, gov ernment meteorologist here.

Mr. Meisinger in a paper discussing the effect of air conditions on commercial aviation says that meteorology is the mainstay of aviation, regardless of the confidence a pilot may have in his motor and in his plane.

The "ocean of air," he says, constantly is changing and does not contain steadfast currents, such as the Gulf stream and the Japan current, which are found in oceans of water.

Must Gather Data.

Because of the constantly changing condition of the aerial routes through which the air liners of the future would travel Mr. Meisinger declares before hig commercial aviation comnanies can operate on a large scale great masses of data on air conditions at all times of the year, in all places and all circumstances must be gath hurt by this substance to which they ered. He suggests placing consulting are not accustomed. meteorologists on the staffs of ali aviation companies to study the air as what altitude and what route a plane as a natural eye-wash. This, flowing

Air conditions are so changeable, Mr. Meisinger says, that a plane traveling between the same two points neight have to take a different route almost every day in order to make the trip with the least danger. Also, a plane flying from New York to Chicago might find a certain route the ticles of dust which may have accumbest, while one traveling from Chicago ulated. But when this figuid is proto New York on the same day might duced so rapidly that it cannot be find an entirely different route more

Things to Consider.

Some of the things which airplane dispatchers will have to consider, he says, are the speed and direction of the wind in the area to be traversed, the frequency of low clouds and fog. the frequency and intensity of thunderstorms, the vertical temperature distribution, the normal values of precipitation at flying fields and the effect of atmospheric pressure on aerial in-

struments, particularly the altimeter. The changing conditions in the air make it impossible to gather the necessary information in a single pathfinding flight over an area, he continues, but by gathering data in numerous flights at all times of the year and in all circumstances a system of averages could be devised which would ald greatly in dispatching planes.
