THE AMERICAN PRESS ASSOCIATION

WISE AND OTHERWISE

Some people feel that the population is increasing too fast, but the automobile industry is doing its best to dispose of the surplus.

It is reported that bootleggers are throwing in whisk brooms with each quart so the purchaser can brush himself off when he gets up.

Teacher to kindergarten class. "Now children, what is the ground covered with at this time of the year?"
 Willie: "Old auto license plates."

Speaking about prohibition, Kin Hubbard contributed this timely news item to the press the other day: "Mr. and Mrs. Tipton Bud was awakened at a early hour this mornin' by burglars singin' in th' cellar."

Secretaries Baker, Burleson, etc., were granted a permit to ship their private stocks from Washington to their future homes. We don't wish them any bad luck, but we do wish the stuff had to lay over at Laketon just one night.

At the end of the first lesson of a correspondence course, a school asked this question: "What is an advertisement?"

The answer of the youthful student indicates that he is a close observer of modern publicity—"An advertisement is the picture of a pretty girl eating, wearing, holding or driving something that somebody wants to sell."

The North Platte Tribune claims for its town the most unique electric plant in the world. A genius with an unpronounceable name has rigged up a generator and storage battery that is run by a windmill, and there is no denial that wind is more plentiful and cheaper in Nebraska than coal or water-power. The generator, which is easily attached to windmill, is manufactured in Lincoln and its friends claim that it will have undepicted place in the industry.

A friend of the deceased was calling on the widow, and during the conversation he asked her: "Did Frank leave you much?"
 "Did he leave me much?" she repeated, "yes, nearly every night!"

She: "What are the two things that cause all the divorces?"
 He: "Husband and wife."

 Mrs. M. Larsen was in Sioux City the first of the week.

Sioux City Livestock Record.

The highest price paid for a full load of cattle was paid today when a load of twenty steers sold straight at \$19.00. The load consisted of choice handy weight steers averaging 1,187 pounds, raised, shipped and marketed by H. Barge, a well known stockman feeder and habitual market topper from Emerson, Neb.

Two new tops for the year were established in the cattle division today, both being put on by one man, Charles Voss, of Homer, Neb. Mr. Voss marketed a mixed load of fed cattle consisting of choice heavy cows and long yearlings. The yearlings averaged around 1,100 pounds and sold at \$10.00, this being the first time this price was paid on this market since December. The cows were extremely heavy and at \$7.75, this also being a top for the year, considering weight. Mr. Voss is a consistent market topper in the cattle division. He has been regular shipper to the Sioux City market the last thirteen years and in the time has failed only on very rare occasions to top the division in which his cattle were classed.

Person Calling Operator Person Called

One Person Can Not Make a Call

The effectiveness of telephone service depends on the degree of cooperation between three partners:

1. The PERSON CALLING who looks up the right number in the directory and gives it slowly and distinctly.
2. The OPERATOR who makes the connection quickly, courteously and with the maximum degree of human accuracy.
3. The PERSON CALLED who answers promptly by giving his name as "John Smith speaking."

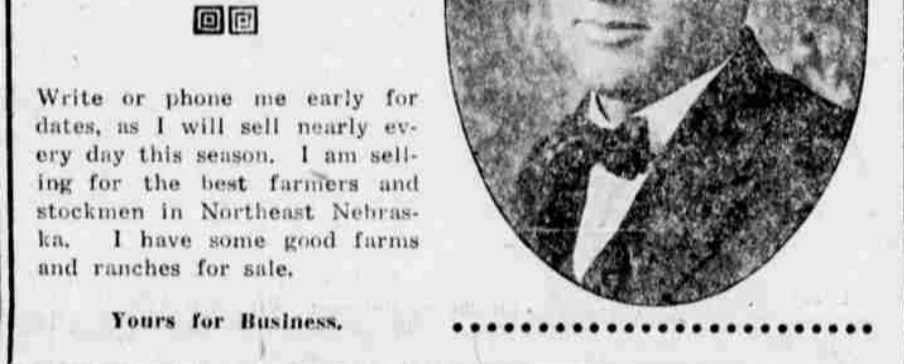

Making a telephone call involves a partnership of three persons.
