## TRYING PEBIOD WEATHERED

Nationwide Survey of Conditions in dicates Improvement in Many Lines.

Baltimore, Md.—David F. Houston, former secretary of the treasury, in analyzing a country-wide survey of industrial, financial, agricultural and other economic conditions, declares that "the big national question is taxation with peace settlement and international trade next."

The survey, made in all of the geographical divisions of the United States by field agents of the Fidelity and Deposit company of this city, consisted of answers to thirty-six questions by farmers, bankers, manufacturers and public officials. An interesting feature of the statistics is that in every feature of the New England and the Rocky Mountain states building operations show a marked increase. General transportation conditions in every state were reported "good" and raw materials plentiful. Savings accounts, the survey showed, increased in nineteen states.

Police officials of 27 states said there have been noticeable increases in crime over last September, but a decrease was reported in Massachusetts, Mass., New Hampshire, Vermont, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, and Mississippi.

In every state the consensus of opinion was that the farmers have not disposed of all their last season's crops. Low prices and shortage of money and labor are said to have caused a reduction in acreage in all states except Illinois, Iowa, Kansas, Missouri, Nebraska and the Pacific coast states. The crop outlook for 1921, however, in every case, was reported fair or good.

"The survey indicates that the business world is still feeling its way, but with increasing confidence and with the conviction that the worst has passed," said former Secretary Houston. "The country has successfully borne the strain caused by a most notable drop in prices, particularly of a vast volume of raw materials, and has weathered a trying period of liquidation."

"The demand for finished products has not developed to the point where our factories feel justified in taking requisite quantity of our surplus raw materials to furnish the necessary relief to their producers; but there are some indications of a change in this direction."

"This survey does point to certain favorable domestic conditions. The cost of living has appreciably diminished. Building operations in a number of districts tend to increase. There have recently been no strikes of consequence. Greater productivity of labor per man is reported from all districts. Raw materials are plentiful, and physical transportation conditions are good. There have been no business failures of moment. The crop outlook is satisfactory, and the banking situation has improved."

### A Harding Behind Bars.

## JOHN BURROUGHS DIES

Dean of Nature Writers Succumbs at Kingsville, O.

Was Noted for His Close Friendship With Roosevelt, Whom He Defended in "Nature-Faking" Rows.

New York, March 30.—John Burroughs, famous naturalist, died at 2 a. m. on a New York Central train at Kingsville, O. He had been spending the winter at Pasadena, Cal. He was eighty-four years old and had been in poor health for some time.

John Burroughs was the venerable dean of nature writers in the United States. Through a score of books he shared with countless readers his life-long intimacy with birds, bees, flowers and the whole out-of-doors. His highly-developed powers of observation and the charm of his interpretations were the marvel of his critics.

He learned to love nature when he drove cows at his birthplace farm, Roxbury, among the Catskills, in New York state, but anything like a literary composition was a bugbear to him as a youth.

Mr. Burroughs was born in 1837. In 1863 he went to Washington with something of an inclination to enlist in the Union army, but he decided to seek a government office. It is related that with only a few of his poems as credentials he walked into the treasury department and asked for a job. It was agreed that his vernal verses really smelled of the woods, and smacked of sincerity. He would be a safe man to watch the treasury vaults. He agreed to take the place. At a little desk, facing the huge iron vault where he kept tab on those who went to handle the \$50,000,000 stored there, he began writing of the birds, to relieve his homesickness. The result was his first book, "Wake-Robin."
