THE INTERSTATE FAIR WILL BOTH EDUCATE AND AMUSE

Every man, woman and child within auto distance of the Interstate Fair, Sloux City, September 18 to 24, would benefit by a visit to the fair this year, according to fair officials.

There, under one top, will be the most interesting educational exposition in this part of the state.

The foods we eat, the clothes we wear, in fact everything of an essential nature in our daily life, will be exhibited in some form or other.

There will be a wonderful entertainment program, to be sure. The features we have engaged for the coming fair include horse racing, auto racing, fireworks, music, vaudeville, and a midway show. It is the finest program of its kind ever planned by the fair. Still the big feature of the fair will be its educational program.

The progress which has been made in improving the breeds of stock the last few years is remarkable. Our state is one of the leading agricultural states in the union, largely because of the part it has played in encouraging the raising of pure-bred horses, cattle, sheep, swine and poultry; fruits, vegetables, corn and grains. The fair will demonstrate this conclusively. That's why everyone should go.

Entries for the women's work, boys' and girls' work, live stock and farm products shows are coming in at a lively rate. Persons interested in exhibiting may obtain full information by writing to Secretary Moore for a premium list.

INTERSTATE FAIR WILL OFFER EXHIBITS OF MA-CHINERY AND APPLIANCES FOR THE DAIRY INDUSTRY

The shepherd of 2,000 years ago who churned his milk in the skin of a goat would faint dead away at a mere glimpse of the scores of contrivances invented for the care of milk and the making of butter, which are to be shown at the Interstate Fair, Sioux City, September 18 to 24.

Up-to-date dairymen of fifty or hundred years ago would have gasped ing. and turned white if they could have been shown all the new machines and instruments for the average dairy farm, which visitors will see on every hand when they come to the fair.

It was only a few years ago that it ers out of their money. Today the improved dairy farm of size could not de without the milking machine. The only problem of the farmer is to find

home and farm will be larger than any previous one, according to fair officials. This is due largely to the energetic sales efforts of manufacturers, directed at the opening up of new fields. Production of machinery bas caught up with consumption, and the selling problem has become paramount.

THE INTERSTATE FAIR OFFERS SHORT COURSE IN MODERN AGRICULTURE

Make farming pay!

. That, in short, is the underlying purpose of the big educational program that is to be put on by the Interstate Fair, Sloux City, September 18 to 24. A visit to the fair this year will be like taking a short course at an agricultural college.

All of the latest ideas will be demonstrated.

It is the fair's mission to educate. They are striving to stimulate interest in farming in every way, and making farming profitable. They went to help in getting more good horses, cattle, sheep, swine and poultry, into this club work is being fostered by them in every way.

A splendid entertainment program is being planned this year. Features include horse racing, auto racing, fireworks, baseball, vaudeville, auto polo. music, a midway show and aviation. Search for features was made all over the country before the program was closed.

Those who want to know more about the premiums to be awarded for exhibits of all kinds may obtain the information by writing to Secretary D V. Moore, Sloux City, Iowa

INTERSTATE FAIR WILL ENTERTAIN DISTINGUISHED GUEST

The Hon. E. T. Meredith, publisher of Successful Farming, and former Secretary of Agriculture, will be at the Interstate Fair Thursday, September 22ud. A special program is being Thursday arranged by the officials in charge of the Boys' and Girls' Encampment for his entertainment. He will be the speaker at the banquet given that evening by the Sioux City Chamber of

Commerce for the boys and girls. No man in the United States has done more for the advancement of the boy and girl on the farm than has Mr. Meredith. He was the originator of the "Pig Club" idea and started the daughter motored to the city movement of lending money to boys and girls with which to purchase live circus. stock. Mr. Meredith gives much of his time to this work and his Junior ublication issued at Des Moines will be found in the homes of a large majority of the farm boys and girls.

Rallroad Offers Free Scholarships From Farm Bureau News)

The Union Pacific railroad is se.k. ing to encourage boys to take more interest in farming by offering free scholarships in the University of Ne-braska to the highest ranking club boys in the counties served by the road. A scholarship worth \$75, and free transportation, will be given away in each of 59c ounties this year and in each of 39 counties next year.

Boys and Girls Clubs at State Fair Boys and girls club work and demonstrations have been given a separate class in the premium list of the Nebraska State fair this year, and indications point to the best show of this kind ever held at a fair in this state. A total of \$2,277.50 and several special prizes will be distributed among the young farmers and home-makers. Probably twenty-five counties will enter teams in the judging and demonstration contests, and it is thought that the exhibits of live stock, vegetables and fruits, canned goods, sewing, baking, etc., will be larger than at any previous fair.

GOOD CARE INCREASES LIFE OF FARM MCAHINERY.

It is conservatively estimated that farm machinery well cared for will last from three to five years longer than machinery in the hands of careless farmers, or in other words the proper care of machinery when ment. On a dollar and cents basis this means if a farmer has \$2000 invested that proper use and oiling of the machinery will save him \$250 each year; the added satisfaction and saving from correctly operated, tight fitting, smooth running machinery need no argument for their proof.

Two years' savings will pay the cost of the machinery shelter which will last for many years.
