NEW DISCOVERY MADE IN RUINS OF THEBES PALACE

Proof Found, as Believed, That Cadmus First Brought Alphabet to Greece.

Doctor Karamopoulos, one of the Greek Inspectors of antiquities, has accomplished some most interesting work in the ruins of the palace at Thebes. According to legend, this palace was

founded by Cadmus, who is said to have first brought the alphabet to

In previous campaigns the remains of the fresco decorations of the earlier pulace, 1600 to 1400 B. C., were brought to light. This consisted largely of a frieze of elaborately dressed and coiffured women carrying flowers, painted jugs or lvory boxes.

This year the excavator has found some of the storerooms of the later pulace, 1400 to 1100 B. C. From these there have been extracted a hundred or more big stirrup jars. They are unfortunately broken, but they can be put together ngain.

A considerable number of these jars have painted on them inscriptions in the still undecipherable. Mycenean alphabet. The letters, or rather signs, are of a hieroglyphic character and are derived, but differ, from the weliknown and equally undecipherable Cretan prehistoric alphabet.

Scientists believe it possible that the difference of alphabet means a differerce of language.

However much professors may dispute about the meaning and character of these alphabets, Athens archeological circles attach special interest to the fact that ancient trudition has once more been proved right by the discovery of what might be called Cadmean letters in the ruins of Cadmus' city.

MET, COURTED AND WERE MARRIED IN FOUR DAYS

\$100000

A few days ago this beautiful young woman was Miss Charlotte Rich, Then she met Albert E. DuBrin, a New York broker, in San Francisco, and now she's no longer Miss Rich. The courtship lasted only four days, but that was three days too long for Mr. DuBrin.

DEAD DOG AS MISSILE

Weman Charges Husband With A sault With Carcass Henry Malliet of Bound Brook, N

charged with assault by Mrs. Malliet, who told a jury Malliet hit her with a dead dog, was discharged after trial in Somerset County court. Mrs. Malliet caused her husband's arrest, charging he had belahored her with the carcass of a fox terrier which had been run over and killed by an automobile. The wife testified that Malilet became enraged because he thought she had let the dog out.

Neighbors called to testify gave conflicting evidence. One swore there was blood on Mrs. Malliet's face after the quarrel over the fox terrier. Another testified the plaintiff's nose was red, but he could not swear there was blood on it.

LOG USED AS LIQUOR CARRIER

Prohibition Agents Discover a New Way of Smuggling Booze.

Two halves of an eight-foot cedar log, tossed by a storm at Tampa, Fla., on a suburban beach, have revealed to prohibition agents another trick employed by coast runners in smuggling liquor into the state. The log was from a wrecked boat coming from Cuba with a cargo of logs consigned to a local cigar box factory. Four carefully carved cavities secreted four five-gation demijohns of whiskey in one log. Countersunk bolts held the halves together, so that the complete log landed with booze was in every respect similar to a fresh one just cut from the forest.

Four-Footed Rooster.

A farmer in Nova Scotia has a strange rooster. The bird has four wound around the leg of her cat. The the sixth drink. He won't begin to feet. It walks on two and the other cat was trying to do away with the two, which are crossed behind, dangle. I shake by eating it.

NEW SUBMARINE IS LAST WORD Scrap Book

Undersea Fighter Embodies Features Developed Through War.

CAN GET QUICK GUN ACTION

Radio System Permits Boat to Send and Receive Message While Submerged-New Submarine Is Double-Hulled and Is Regarded by Naval Constructors as Embracing the Very Latest in Submarine Construction.

The United States has taken another step forward in submarine construction with the launching of the S-51, the navy's latest undersea fighter, at Bridgeport, Conn. The S-51 is the last of the ships of her type to be built and she is a development in the direction of the great fleet submarine, with its wide radius of independent action and its heavy armament. The new submarine embodles many of the features developed through the experience gained in the World war. Some of the things that the S-51 can do and the way they are done are paval secrets and to some extent her construction and accomplishments have been shrouded in mystery.

Can Get Quick Action. One of the improvements aboard the 8-51 is the mounting of her four-inch gun and the readiness with which it can be brought into action as the submarine leaves the depths of the sen and rises to the surface to strike an enemy. The 50 calibre weapon is mounted forward of the conning tower and is fully equipped for aciton even when the submarine is submerged. Just behind the gun in the wall of the conning tower is a hatchway Through this the gun crew can leap to their firing posts as the ship rises from the waves, Jumping into position while the deck is still awash. Ammunition charges in the wall of the conning tower can be thrown open to supply charges for the gun up to the time the vessel is riding free on the surface, and the ammunition hoist begins to work. A half dozen fourinch shells can be thrown from the gun before the submarine has risen far enough from the sea to present a possible target for any enemy vessel.

In addition to the four-inch gun, the S-51 carries five 21-inch torpedo tubes, four forward and one in the stern.

Undersea Wireless. The S-51 is equipped with undersea wireless. Her radio system permits her to send and receive messages while submerged. She maintains sight contact with the world above the waves through three periscopes. One of these has its eye-plece in the conning tower, where the operator, mounted on a platform, rides up and down to take observations at various heights. The eye-pieces of the two other periscopes are located in the control room.

Two electric motors drive the S-51 when she is submerged and on the surface she is propelled by two Busch-Sulzer-Dissel engines, rated at 950 brake horsepower each.

The new submarine is double lmiled and she is regarded by naval constructors as embracing the last word in submarine construction. She is designed to withstand with safety submergence to depth of 200 feet.

LEFT \$5,000 IN OLD SHOE

And Cobbler Returned It to Polish Woman, Getting \$10.

An elderly woman, described as be ing Polish, left a pair of shoes to be repaired with Frank Sidelii, cobbler Bayonne, N. J.

Sidelli found a paper wad in one the shoes. He tossed it carely dy into a pile of litter and went on about his work. A little later be came across the wad again, opened it and found it comprised fifty \$100 bills. He shouted and his wife and children came running in. They called the police.

Search was made, but the Polisi woman was not found until, a full hour later, she came running in breathlessly and crying for her money When Sidelli told her be had found the \$5,000 and saved it for her she praised blin for being honest and gave him a \$10 bill.

"My man is always afrabl of burg lars," she said. "He packed his savings in my shoe and I didn't know about it until just now, after I told him I had sent the shoes to be repaired. We will use the bank from now on."

Remove Mirrors So Girls Can Work. All the intrors have been removed from the rest rooms at the war risk bureau in Washington. The order for their removal was given because the girls spent too much time before them powdering their noses, according t officials.

Shock From Light Bulb Kills Man. John F. Holland, of Norwich, Conn. was instantly killed when he took hold of an electric light bulb in the cellar of his home. The usual force of the cur rent is not strong enough to kill a man.

Cat Wanted Meal of Snake.

One of our readers in Nova Scotta was looking out of her window and was surprised to see a green snak-

OLD ROVERS

When I was a boy there came to me The wisp of a Rover dream, A leughing lad who was made for mirth And happiness supreme.

And over the sea and round the world We wandered and roved together, A lilt of a song in the hearts of us. In fair and stormy weather.

But Life took its toll, and tide, and time And quavering grew the song, And days so short when we both were young, Now old, are gray and long.

But yet of a night when sighs the wind And shining the starry sky, We meet and talk as old men are wont Of the glad old days gone by,

And once again we are laughing lads Gayly and in fine feather, A lilt of song in the hearts of us-We tramp old tralls together, -Edmund Leamy in New York Sun

MAN'S MORAL CENTER FOUND

English Physician Claims to Have Made Discovery That Apparently Is of Great Importance.

Medical men are debating the recently published conclusions of Dr. William Browning on the subject of the crime center of the human brain. It was stated by Dr. Browning that

although a person has no "bump" for crime, in the same way that he may have a "bump" for music or mathematics, the seat of the moral sense (the sense which helps us to distinguish between right and wrong) is not in one of the glands, as has always been supposed, but in the right frontal lobe of the brain,

Ever since the days of the great Greek physician, Hippocrates, scientists have been trying to discover the location of man's moral center. So far, however, we have had to be content with the knowledge that the structure of the head of the criminal has marked features, such as a low forehead, ears situated below the level of the eyes, and so on.

The importance of the new discovery lies in the fact that 'it may enable crime to be cured by surgical operations .- London Tit-Bits.

AND ALWAYS MARKETABLE Miss Homely: Beauty's but a fad-

ing flower. Youth (with business mind): But a blooming fine asset in the business of love, Miss Homely.

Almost on Roof of World.

The highest known inhabited house in the world is near the summit of Donkia pass, in the north of Sikkim, Tibet. It is a stone hovel, occupied by a Tibetan guard or outpost of four or five men. The height of the pass is 18,100 feet by trigonometrical survey, and 18,400 feet by the aneroid readings At that height the amount of oxygen in the atmosphere is only half that at sea level Tibetans can stand this, of course, as their plateau is generally between 15,000 and 16,000 feet. The fact that this hovel is only occupied for a few weeks in the height of the summer rather spoils its record as the highest inhabited house. There is a hovel in the Andes where Peruvian shepherds live all the year round at a height of 17,100 feet.

German Bees for Belgium. German reparation experts, having caught and delivered the rabbits. pheasants and other wild game demanded by the reparations commission, are now engaged in collecting bees for delivery to France and Belglum. Twenty thousand swarms must be delivered to France and 300 to Belgium within the next few days. The bee hunters have been given a respite until next spring to turn over the rest of the requisition wherewith Germany is stung.

May Be Sorry for This Theft. Someone stole 12 guinea pigs from barn near the state house in Provi dence, R. I., where the animals, owned by the state board of health, were being kept for experimental purposes Two of the pigs were inoculated with tubercular germs, two others with the germs of rables. The state bacteriotogist says he is anxious to locate the pigs or the man who stole them, not so much to recover the animals as to let it be known what a dangerous lot they are.

According to Schedule. "How was the party when you

"Proceeding briskly."

"Was Bibbles there?" "Yes. He was telling that funny story of his about King Solomon and

the queen of Sheba." "That usually comes along about recite 'The Raven' until he's bad ten." -Birmingham Age-Herald.

PRETTY AND HARMLESS BOMB

Device Would Seem to Be a Decided Improvement on the Old-Fashioned Firecracker.

A toy bomb that really explodes is the novel idea of Louis F. Duck of De Kalb, Ill. It is quite safe for youngsters' use, and exciting.

The plaything is of wood. The body of the bomb is spherical, but with a neck into which a plug fits. Upward from the plug extends a little rod for me, County Judge of Dakota PROBATE NOTICE TO CREDITORS County, Nebraska, at the County Court of Dakota from the plug extends a little rod 8th day of May, 1922, and on the 10th In the Matter of the Estate of which passes through a disk, and upon day of June, 1922, at 10 o'clock A. M. the rod, above the disk, a rubber head each day, for the purpose of presenting their claims for examination, adwith a hole through it to admit the rod, and it carries three feathers.

Two or three paper caps are put in the bottom of the hole in the bomb

Pleasing and Harmless.

body. Then the plug is pushed into in contact with the caps. The rubber head that carries the feathers is stuck on the upper end of the rod and the bomb is ready for use.

The way to use it is to throw it up serving to throw the feather-headed plug up into the air.

The plug goes up with the feathers downward, but reverses and descends to the ground with a whirling motion caused by the feathers, that is alto gether delightful.-Philadelphia Led-

Plant That Produces Wax.

In the north of Texas there is a vast. wild country which is "paved with gold" for the enterprising speculator. Here one can ride overland for six days without ever being out of sight which a very high grade of wax is who will develop the industry of waxmaking. As yet, only six factories are working. The candellla plant grows from one to three feet high, and as many as 5,000 stems come from the same root. It flourishes in the poor est soil, and reproduces itself annual ly. The cost of labor is low, and the supply of material incredibly vast. The Ed T. Kearney, as executor. wax is made by boiling and steaming the weed. The crude wax is refined and used in making candles, phono graph records, polishes, varnishes and even linoleum. And from the fibrous waste a good quality of paper is turned out.-Montreal Herald.

WHAT A BLUFF your new typewriter named

Alice? "You always use that name when you talk in your sleep." "Well, she does such poor work that she is always on my mind."

Sparrow Snake's Last Meal. When walking through the fields, ar Ontario reader says, he heard the ter rific chirping and chattering of a ground sparrow, as though in fear He investigated and found a black snake that looked as though it had swallowed an apple. He killed the snake and cut it in two just below the swelling in its body, and shook out a small sparrow. The bird opened its mouth to chirp, but couldn't, and died evidently from suffocation. The about 80 inches.
