been afflicted for two months with pain in my back so bad that I could not get from the house to the barn. It was called rhoumatism. I could get no relief from the doctors. I began to improve on taking the sample and got two boxes at our druggist's, and, although 68 years of age, I am almost a new man. I was troubled a good deal with my water — had to get up four and five times a night. That trouble is over with and once more I can rest the night through. Ancient and Modern Ideas on the Subject. Time and Disease the Effacing Agents of Beauty. What Has Science Done to Restore the Lily and the Rose?

**BEAUTY AND PURITY** 

Socrates called beauty a short-lived tyranny, Plato a privilege of nature, Theocritus a delightful prejudice, Theophrastus a silent cheat, Carneades a solitary kingdom, Homer a glorious gift of nature, Ovid a favor of the gods. Aristotle affirmed that beauty was better than all the letters of recommendation in the world, and yet none of these distinguished authorities has left us even a hint of how beauty is to be perpetuated, or the ravages of age and disease defied. Time soon blends the lily and the rose into the pallor of age, disease dots the fair face with cutaneous disfigurations and crimsons the Roman nose with unsightly flushes, moth, if not rust, corrupts the glory of eyes, teeth, and lips yet beautiful by defacing the complexion, and fills the sensitive soul with agony unspeakable.

If such be the unhappy condition of one afflicted with slight skin blemishes, what must be the feelings of those in whom torturing humors have for years run rlot, covering the skin with scales and sores and charging the blood with poisonous elements to become a part of the system until death? It is vain to attempt to portray such suffering. Death in many cases might be considered a blessing. The blood and fluids seem to be impregnated with a flery element which, when discharged through the pores upon the surface of the body, inflames and burns until, in his efforts for relief, the patient tears the skin with his nails, and not until the blood flows does sufficient relief come to cause him to desist. Thus do complexional defects merge into torturing disease, and plqued vanity give place to real suffering. A little wart ou the nose or cheek grows to the all-devouring lupus, a patch of tetter on the palm of the hand or on the limbs suddenly envelops the body in its flery embrace, a bruise on the leg expands into a gnawing ulcer, which reaches out its fangs to the sufferer's heart in every paroxysm of pain, a small kernel in the neck multiplies into a dozen, which eat away the vitality, great pearl-like scales grow from little rash-like inflammations in such abundance as to pass credulity; and so on may we depict the sufferings to which poor human nature is subject, all of which involve great mental distress because of personal disfigurations. If there were not another external disease known, eczema alone would be a sufficient infliction on mankind. It pervades all classes, and descends impartially through generations. While some are constantly enveloped in it, others have it confined to small patches in the ears, on the scalp, on the breast, on the palms of the hands, on the limbs, etc., but everywhere its distinctive feature is a small watery blister, which discharges an acrid fluid, causing heat, inflammation, and intense itching. Ring-worm, tetter, scalled head, dandruff, belong to this scaly and ltching order of diseases. Psoriasis, our modern leprosy, with its mother-of-pearl scale, situated on a reddened base, which bleeds upon the removal of the scale, is to be dreaded and avoided, as of old. Impetigo, barber's itch, erysipelas, and a score of minor disorders make up in part the catalogue of external diseases of the skin. Thus far we have made no allusion to those afflictions which are manifestly impurities of the blood, viz.: swelling of the glands of the throat, ulcers on the neck and limbs, tumors, abscesses, and mercurial poisons, with loss of hair, because the whole list can be comprehended in the one word scrofula. It is in the treatment of torturing, disfiguring humors and affections of the skin, scalp, and blood, with loss of hair, that the Cuticura remedies have achieved their greatest success. Original in composition, scientifically compounded, absolutely pure, unchangeable in any climate, always ready, and agreeable to the most delicate and sensitive, they present to young and old the most successful curative of modern times. This will be conside ed strong language by those acquainted with the character and obstinacy of blood and skin humors but it is justified by innumerable successes where all the remedies and methods in vogue have failed to cure, and, in many cases, to relieve, even. The Cuticura treatment is at once agreeable, speedy, economical, and comprehensive. Bathe the affected parts freely with hot water and Cuticura soap, to cleause the sur ace of crusts and scales, and soft en the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Oin tment

to allay itching, irritation, and inflammation, and soothe and heal, and, lastly, take Cuticura Resolvent, to cool and cleanse the blood. This treatment af-fords instant relief, permits rest and sleep in the severest forms of eczema and other itching, burning, and scaly humors, and points to a speedy, permanent, and economical cure of torturing, disfiguring humors, eczemas, rashes, and inflammations, from infancy to age, when all other remedies and the best physicians fail. The remedies constituting the Cuticura system will repay an individual scrutiny of their remarkable properties.

Cuticura Soap contains in a modified form the medicinal properties of Cuticura Ointment, the great skin cure and purest and sweetest of emollients, combined with the most delicate and refreshing of flower odors. It purifies and invigorates the pores of the skin, and imparts activity to the oil glands and tubes, thus furnishing an outlet for unwholesome matter, which if retained would cause pimples, blackheads, rashes, oily, mothy skin, and other complexional disfigurations, as well as scalp affections and irritations, falling hair, and baby rashes. Its gentle and continuous action on thenatural lubricators of the skin keeps the latter transparent, soft, flexible, and healthy. Hence its constant use, assisted by an occasional use of Cuticura Olutment, realizes the fairest complexion, the softest, whitest hands, and the most luxuriant, glossy hair within the domain of the most advanced scientific knowledge to supply. Cuticura Ointment is the most successful external curative for torturing, disfiguring humors of the skin and scalp, including loss of hair, in proof of which a single anointing with it, preceded by a hot bath with Cuticura Soap, and followed in the severer cases by a full dose of Cuticura Resolvent, is sufficient to afford immediate relief in the most distressing forms of itching. burning, and scaly humors, permit rest and sleep, and point to a speedy cure when all other remedies fail. It is especially so in the treatment of infants. and children, cleansing, soothing, and healing the most distressing of infantile humors, and preserving, purifying, and beautifying the skin, scalp, and hair. Cuticura Ointment possesses, at the same time, the charm of satisfying the simple wants of the toilet of all ages, in caring for the skin, scalp, hair, and hands far more effectually, agreeably, and economically than the most expensive of toilet emollients, while free from every ingredient of a doubtful or dangerous character. Its " One Night Treatment of the Hands." or "Single Treatment of the Hair," or use after athletics, cycling, golf, tennis, riding, sparring, or any sport, each in connection with the use of Cuticura Soap, is sufficient evidence of this. Of all remedies for the purification of the blood and circulating fluids, none approaches in specific medical action Cuticura Resolvent. It neutralizes and resolves away (hence its name) scrofulous, inherited, and other humors in the blood, which give rise to swellings of the glands, pains in the bones, and torturing, disfiguring eruptions of the skin and scalp, with loss of hair. Cuticura Resolvent extends its purifying influence by means of the pores the surface of the skin, allaying irritation, inflammation, ltching, and burning, and soothing and healing. Hence its success in the treatment of distressing humors of the skin, scalp, and blood, with loss of hair, which fail to be permanently cured by external remedies alone. The grandest testimonial that can be offered Cuticura remedies is their world-wide sale, due to the personal recommendations of those who have used them. It is difficult to realize the mighty growth of the business done under this name. From a small beginning in the simplest form, against prejudice and opposition, against monied hosts, countless rivals, and trade indifference, Cuticura remedies have become the greatest curatives of their time, and, in fact, of all time, for nowhere in the history of medicine is to be found another approaching them in popularity and sale. In every clime and with every people they have met with the same reception. The confines of the earth are the only limits to their growth. They have conquered the world.

#### When a Man is Drunk.

The ancient problem, "When is a man drunk?" is a question on which doctors emphatically disagree. In Scotland, where the authorities have some experience of the drunken, a shibboleth forms the test. The Glasgow police extract from the suspect easy and fluent utterance of the words, "Shoes and socks shock Su-In Edinburgh the authorities ann. to the ancient "Burgess' fish hold sauce shop," In some parts of Engand the man must walk a chalked ine, and other tests include the spokan words, "Truly rural," "British constitution" and the apotheosis of the histle-sifting woman who had "six sleves of sifted thistles and six sives of unsifted thistles."

All kinds were afarmy, is the sultan's right-hand man in this present rebellion, ranks high among the famous Scots who have wooed fortune with their swords. Since he has been Moorish commanier-in-chief he has conducted many orilliant campaigns in the Sahara, and is the only Christian who has openely crossed the Giania pass and visited the sacred tomb of Mulai All Shereef, n the Tafilet district. The regular urmy under his command numbers about 20,000 men, with an irregular militia of 80,000. His salary is said to be \$35,000 a year, which compares well with Lord Roberts' \$22,500, and better with his own \$635 per annum as a British lieutenant. He lives in a magnificent palace at Marakesh.

#### THE LIVE STOCK MARKET.

Latest Quotations from South Omaha and Kansas City. SOUTH OMAHA.

CATTLE-There was a much heavier run of cattle than anyone expected and In fact receipts were the heaviest they have been in several weeks. As a result the market was very slow and lower and it was late before scarcely any cattle changed hands. There were a good many beef steers in the yards and the quality was about the same as it has been of late. Buyers did not start out until the middle of the forenoon and their bids were so much lower that nothing was sold for some time. The sales that were made could safely be quoted a dime lower on the average.

fected and as sellers did not like the idea of taking off another dime after the big decline of the day before, it was late before many cattle went over the scales. Buyers, though, dld not seem to care whether they got any cattle or not, so that salesmen had to take the prices offered or carry the cattle over. Bulls also had to sell lower in sympathy with the decline on cows and helfers, but there was not much change in yeal calves. There were not many stockers and feeders on sale, but buyers did not want many cattle, so that those that were offered had to sell a little lower. HOGS-Reports from all points were unfavorable to the selling interests, and as a result the market here suffered a decline. Trading was very slow on the start, as buyers and sellers could not get together on prices, and when the hogs finally did start toward the scales it was found the market was 5010c lower. The bulk of the medium weight hegs sold from \$6.70 to \$6.75, and the prime heavy hogs sold from \$6.75 to \$6.85. The light weights sold from \$6.75 down.

#### Where Birds Fly.

Interesting facts as to the flight of birds have resulted from a long series of observations, whose general results have recently been published. An engle was observed by Hergessell, of Strasburg, to fly at a height of 9,000 feet. A lark was detected at an altitude of 1,000 feet. Aeronauts have encountered crows as high as 4,200 feet from the earth. These.

however, are exceptional altitudes for bids to attain. As a rule, 1,300 feet seems to be the limit. The German Ornithological society has been conducting experiments with pigeons, and finds that when liberated at a height of 9,000 feet down to as little as 2,700 feet they drop rapidly to a much lower region of the atmosphere.
