John and T. J. O'Keefe had two cars of steers on the South Omaha market Tuesday. They were three-year-olds and brought \$3.95, which, by the way, is the top price of any stock shipped from Alliance this season.

W. L. Ashbrook of Sioux county had 215 feeders on Tuesday's market which sold for \$4.60, and E. B. Myers of Hyannis sold 99 head for \$4.05. 101 head of Ashbrook's averaged 1,215 lbs., and 113 head, 1,191 lbs. Myers' averaged 1,153 lbs.

### South Omaha Market.

Offerings of range cattle were not very extensive Thursday nor was the quality of the arrivals particularly desirable as a rule. Beef steers were in active request at fully steady prices and the same was true of cow stuff. In the stocker and feeder line the trade was in very fair shape and prices firmly held for all suitable offerings. The recent frost was not nearly so injurious as was feared and the inquiry for feeders was about as good as it has been lately.

The market while somewhat lower showed considerable life Thursday considering the bearish reports from other points, and while prices in the main were about a nickel lower the movement was rather brisk at the prices. The decline was general and outside of very common packers was about as noted above.

Today (Friday) the cattle market report is steady and unchanged.

### Irrigate by Pumps.

Mr. Robertson came here a month ago from Marshall, Harrison county, Texas, to study irrigation methods. He has traveled over the state extensively and gained much knowledge of irrigation from his inspection of the ditches of Colorado, says the Denver Post.

"Texas will bloom as the rose when she gets irrigation down fine. And we are learning fast from Colorado ranchers. In our state we irrigate fully as much as you do in Colorado, as far as area is concerned. We would do more, but many of our people do not know how it is done or the value of it. From the Panhandle south to Beaumont, where the rice fields are, is a great stretch of country with irrigated places here and there. Along the Pecos river is another strip. This strip extends as far north as Roswell, N. M.

"We irrigate a great deal by pumping. We have no mountain streams as you have here and we must put in current pumps and do the best we can. The best is pretty good, though. I have seen a ranch of 2,500 acres all irrigated by current pumps and doing as well as any field under ditches.

"In the Beaumont rice fields we use the pumps altogether, but on the Pecos river we have a fall that permits of ditches. The advantage of pumping the water is that you put it where you want it. Here you waste a great deal of the water. Down in Texas we would be ruined if we allowed as much water to go to waste as the ranchers do in Colorado.

"The irrigation has been going on in Texas for about ten years. We learned it from Colorado. We raise cotton, corn, alfalfa, fruit and vegetables by irrigation."
