FAMOUS SPOT MAY BECOME NATIONAL ESTATE.

Here Cornwallis Surrendered His Army to General Washington, and Here in 1635 Was the First Revolt Against British Rule.

An estate owned by a Detroit man, which is creating national interest pieces will be played by the many and discussion, and which may soon become the property of the nation, is the famous old Temple farm in Virginia. As one of the most interesting relics of United States history and the scene of Washington's triumph over Cornwallis, this beautiful spot is a center of interest to thousands of patriotic Americans. So closely is it connected with the important events in the formation of the country that it is often called "the central spot in history," and from all sides petitions are pouring in to the government to buy the farm and house and preserve them as a monument to the memory there exhibited than were ever col- of the first president of the United lected at one place in the history of States.

Temple Farm was the home succesively of Lord Spottiswood, Washingon, Lafayette and Rochambeau. It is situated in one of the most picturesque spots in America, and of its 500 acres searly 400 are now in a state of beauty. To the east is an uninterrupted view of Chesapeake Bay. To the north can be seen the marine traffic of the York river navy, to the west rises the monument erected by the federal government commemorating the surrender of Cornwallis, and that other spot sacred to the memory of perces-the National cemetery.

Barely a mile away is quaint Yorktown. Not only are the surroundings of Temple farm historic, but the farm stself with the famous old "Moore house" upon it. has hardly a spot which has not borne the footprints of armies.

The famous "McClellan road" is here; the remains of the first place of worship in Virginia are another interesting relic, as well as the oldest marked grave in the United States.

But of the many historic associations of the place the most interesting is that of the event which won for Washington the title of "Father of His Country." Here, in the corner room of the Moore house, facing the war-spolled fields, the articles of capitulation between Cornwallis and Washington were drawn up by the commissioners, and nearly 9,000 English soldiers marched through the old farm toward Yorktown, prisoners of war.

On this same spot in 1635 came the the first revolt against British rule, so that Temple farm has the distinction of being the spot where the first and last act of revolt which led to the birth of the republic took place.

AMUSED MEN OF MONEY.

Conductor Forgot His Audience in His Earnestness.

What is known as "the millionaire's train," running from Morristown, N. J., to Hoboken, carries a number of men known to the world of finance. The conductor is David Sanderson, to whom his passengers, grateful for his uniform good nature and efficiency, have just presented a handsome watch and a purse of gold. They insisted on his making a speech and Sanderson did so, winding up in this way: "Some people wonder why it is I have had such great success in life; why I have had no trouble with nobody. Even the other conductors don't understand it and they often ask me how I get along with the drunks on my train, an' I just tell 'em-" Such a shout of laughter went up from the millionaires that Sanderson's speech ended then and there.

#### Congressman Hardwick Mistaken for One of the House Pages.

Congressman Hardwick, the boyishlooking man from Georgia, has had the experience that has befallen other youthful statesmen. He was standing close to the speaker's desk one day when one of the reading clerks, mistaking him for a page, said: "Run and bring me that paper that is lying on Gen. Grosvenor's desk." Smiling at the clerk's error, the Georgian did as requested. Half an hour later the chair recognized "the gentleman from Georgia," and to the surprise and mortification of the reading clerk, Mr Hardwick, the beardless boy, who had performed messenger duty a short time previous, arose and delivered a long speech on the race problem in the south.
