THE  
**Brown  
POTATO DIGGER.**

This machine is offered to the public after years of experience and practical operation in the potato field, during which time many alterations and improvements were made, nor was it offered for sale until the inventor was assured that it was nearer perfection, both in construction and the ability to do the work of a first-class digger in the field, than any other machine ever offered to the public.

TO KEEP FRIENDS.

Be Interested in Them, but Never Descend to Curiosity.  
If you would have friends be interested in them.  
There is a difference between interest and curiosity. Never be curious.  
Interest asks nothing, but is glad of others' joys and sorry for others' misfortunes. Curiosity seeks to find more than is written upon the surface, seeks it for the purpose of distribution, for innocent slander.  
One's friends like one to be interested. They detest one who is curious.  
To be interested in those one meets needs but to wish them well.  
To see the best of those about us will cause us to wish them well.  
To our well-wishers we pour out our joys and sorrows. They are interested. They understand.  
The interested friend always understands. The curious acquaintance never sees through motives. The curious one is blinded by his own interpretation of causes and his prejudiced view of results.  
Don't, therefore, seek to know what is hidden. If your friend conceals something from you he has a reason for doing it. Prove your interest and your lack of vulgar curiosity by trusting him in spite of the concealment.  
Those who are truly interested and never curious are surrounded by friends.—Detroit Tribune.

A CITY WITHOUT TAXES.

All Its Expenses Are Paid by the Income From Its Property.  
In the Black forest of Germany is the little city of Freudenstadt, with about 7,000 inhabitants, a busy industrial place with iron and chemical works of some importance.  
Small as it is, Freudenstadt is a full fledged city, with a mayor, aldermen, half a dozen policemen and a fire engine. The public business is conducted on an economical basis, and the total expenses do not exceed \$5,000 in a year.  
Freudenstadt has the distinction of being the only city in Germany and perhaps in the world which does not tax the citizens a shilling for municipal expenses. The yearly net revenue from the public property covers all the expenditure.  
This property consists of about 6,000 acres of the forest, which, being managed under the best forestry methods, is a permanent source of income. One or more trees are planted for every one that is cut down. No tree is cut till it can yield the maximum profit.  
After deducting all the expenses of the industry the annual profit to the acre is about £1.—Pearson's Weekly.

BRIEF TWILIGHT.

At the Equator It Lasts Only a Little Over an Hour.  
As twilight is caused by the refraction of the atmosphere, without which we should be instantly in darkness at sunset, all parts of the earth have twilight, though of varying duration. When the sun has sunk eighteen degrees below the horizon no more light can be refracted anywhere, but the path of the sun at the equator is so nearly vertical that its disappearance is proportionally rapid.  
The shortest twilight at the equator is one hour and twelve minutes at the equinoxes in March and September; the longest is one hour and nineteen minutes at the solstices in June and December.  
In London from May 22 to July 21 it is twilight all through the night. No wonder, with a disparity so great, people speak of night in the tropics as coming on almost suddenly. Farther north still, in the Shetlands and Norway, we speak of the midnight sun, where men never lose sight of the orb of day and twilight is unknown.—London Spectator.

Early Action in Tuberculosis.

The whole secret of success in the treatment of tuberculosis is to so increase the resistance of the patient as to bring about the arrest of the tuberculosis process and to prevent secondary infection. Early recognition and proper management in the beginning of the disease are the chief elements of cure. If the family physician encourages the hopeful patient to believe that "it is only a bad cold" and that it "will wear off," or when warm weather comes he will be "all right," he not only seals the patient's doom, but fails to take advantage of the opportunity presented today for the cure of consumption.—Suggestion.

The Demand Was Granted.

A certain city in England sent a deputation to Charles II., who was very ill, soliciting some favor. The orator, without any mercy to the sick man, made a long, tedious discourse. "Have you anything more to say?" asked the merry monarch impatiently. "Nothing," replied the orator, "except that if you do not grant our request I am instructed to recite my speech over again." Charles ordered that all his demands should be freely and instantaneously complied with.

An Exposure.

"Johnny," said the teacher, "a lie can be acted as well as told. Now, if your father was to put sand in his sugar and sell it he would be acting a lie and doing very wrong."  
"That's what mother told him," said Johnny impudently. "but he said he didn't care."—London Tit-Bits.

The Original MacIntosh.

"MacIntosh boasts a good deal about his family, doesn't he?" "Yes; I think he claims that the head of his family was the original MacIntosh that Noah had with him during that rainy season."—Philadelphia Press.
