

THREE YEARS AFTER.

Eugene E. Lario, of 751 Twentieth avenue, ticket seller in the Union Station, Denver, Col., says: "You are at liberty to repeat what I first stated through our Denver papers about Doan's Kidney Pills in the summer of 1899, for I have had no reason in the interim to change my opinion of that remedy. I was subject to severe attacks of backache, always aggravated if I sat long at a desk. Doan's Kidney Pills absolutely stopped my backache. I have never had a pain of a twinge since."

The Beggars of Naples.
Lever says somewhere that when he threw out a handful of small coin to the Neapolitan beggars the blind were the first to see it, the paralyzed to run for it, the maimed to pick it up, the naked to put it in their pockets, and the dumb to blaspheme their luck in being out of the scramble.

Egyptians Used Fine Tools.
When the pyramids were built the laborers did not work under such disadvantages as have long been attributed to them. Researches show that they had solid and tubular drills and lathe tools. The drills were set with jewels and cut into the rocks with keenness and accuracy.

The letter of Miss Merkle, whose picture is printed above, proves beyond question that thousands of cases of inflammation of the ovaries and womb are annually cured by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—Gradual loss of strength and nerve force told me something was radically wrong with me. I had severe shooting pains through the pelvic organs, cramps and extreme irritation compelled me to seek medical advice. The doctor said that I had ovarian trouble and ulceration, and advised an operation. I strongly objected to this and decided to try Lydia E. Pinkham's Vegetable Compound. I soon found that my judgment was correct, and that all the good things said about this medicine were true, and day by day I felt less pain and increased appetite. The ulceration soon healed, and the other complications disappeared, and in eleven weeks I was once more strong and vigorous and perfectly well.

"My heartiest thanks are sent to you for the great good you have done me."—Sincerely yours, Miss MARGARET MERKLEY, 375 Third St., Milwaukee, Wis.—\$5000 forfeit if original of above letter proving genuineness cannot be produced.

BROWN GUN IS A WONDER.

Fighting Machine Said to Have a Range of One Hundred Miles.
The inventor of the new American gun is a man named J. Hamilton Brown, though the work of constructing this particular six-inch experimental piece is in charge of Col. John M. Ingalls, retired U. S. A., an artilleryist of high standing and reputation. Despite the incredulity of contemporary gun-builders, says a writer in Everybody's, Col. Ingalls and the officers with him assert that this six-inch gun will throw thirty miles a projectile weighing 100 pounds which will pierce a six-inch steel target.

A ten-inch gun of this construction, with a powder chamber of 14,259 cubic inches and using 360 pounds of smoke powder, would hurl a 600-pound projectile a distance of fifty-nine miles. Increasing this ratio a 16-inch gun would have an extreme range of more than 100 miles and equipped with such coast-defense rifles England and France could shell each other across the channel.

The important new principle in the Brown gun is the winding of a tube of involute steel plates with polished steel wire, thus securing both longitudinal and circumferential strength. The gun is 313 inches long and weighs 20,000 pounds. On a forged-steel lining tube thirty-four flat steel sheets, one-seventh of an inch in thickness and 308 inches in length, are laid in the same fashion that shingles are put on a roof, one under the other. But in this case they curl around the lining tube, fitting exactly and form the true tapering cylinder. On the outside of these plates is wound, back and forth, just as thread is wound on a spool, twenty-one miles of steel wire which is so tightly stretched by a special machine that every inch is tested to stand 2,500 pounds of tension.

There are seven layers of wound wire at the muzzle and twenty-one at the breech. On the outside of the wire for a distance of twelve feet from the breech, is shrunk a forged steel jacket to cover the power chamber. It is believed that no possible powder pressure in explosion could burst this gun.

HAND-TO-HAND FIGHTING.

Sample of Tragedies Now Being Enacted in the East.

It was 10 o'clock in the morning when we saw coming out from their hiding places a small band of Russian soldiers, writes a Japanese Magazine. That was the beginning of the fierce onslaught. It was as if somebody had revived in this civilized day of ours the scenes from the old story books, when swords, spears, bows and arrows were the only weapons of war, and men slashed away at each other. It was just at this time that we saw a Russian officer rise from the ranks, and leaping over the dead bodies of his men and comrades and putting himself at the head of the ranks, try by his daring example to revive the spirits of his men. Against the lurid background of blood and fire he made a superb figure, always rushing in front of his men, his sword gleaming ever over the heads of the fighting men.

At last this officer rushed out, calling always and loudly upon his men to follow. When he was within a few feet of our men he turned his head to see whether his men were obeying his order. Instead of following at his heels his soldiers were trampling upon each other in the mad effort to run away. The sight broke his heart, evidently. He turned the point of his sword he had held against himself. An instant later he fell with his heart pierced through.

The Real Issue.
There are two issues after all. Above the one that speech may call Or wisdom utter:
Two issues that with me and you Are most important—and the two Are bread and butter.

Let patriotic banners wave;
Let economic speakers rave;
'Tis not potential
The Art proclaim or Music sing;
The Least is after all the thing
That's most essential.

Truth seeks some broader meeting place
For bread or clan or tribe or race
For saint and sinner;
But after all the noise and fuss
The issue paramount with us
Is—What for dinner?

New theories we may evolve,
Old governments we may dissolve,
New flags float o'er us;
And Truth may search and Wisdom think,
Still these two planks of meat and drink
Are yet before us.

So let contention hotly wage,
And let the wars of logic rage
In discourse fretted;
When all the clamor is complete
The issue still is what to eat—
And how to get it!

—New York Times.

Reno of the Silver State.
Reno, the metropolis of the state of Nevada, says the Sunset Magazine, has nearly all of the elements and adjuncts which have brought about the building of cities in other portions of our country. Nature has placed the stamp of approval upon its location. It has a territory of its own, great in extent and varied in resources. It is not at all overshadowed by the proximity of any other large commercial center. Sacramento, the nearest, is 150 miles distant, and separated from Reno by the Sierra. This mountain barrier effectually blocks the building of eastern and western lines of railway. The first and admittedly the shortest and best transcontinental steel highway from the east to west passes through Reno. The only other practical pass through this mountain wall is about thirty miles to the north, and from the nature of the case no competitor can arise in that direction. South through Nevada into California, and north through Nevada and California into Oregon, in the territory lying to the east of the Sierra Nevada mountains, Reno has and can have no rival.

Plenty of Good Cigars.

What's this complaint from certain old smokers about not being able to get a good cigar nowadays? It sounds more like the growl of a chronic kick than anything more reasonable. There are more cigars of a cheap quality on the market now than formerly, but the supply of cigars of the best quality is not thereby diminished. They cost money, but they can be had for the price.—Boston Herald.

Girls as Bank Employees.
Employment of girls in banks is no new experiment. The Bank of France took women into its employment as long ago as 1852. This beginning only consisted of four girls in very minor positions. Before a year was finished the four had become twelve. Twenty years later the number was 100 and to-day 300 women work in the bank, of whom three are among the principal cashiers.

Books From the Forest.
A youngish man strolling through a wood remarked sentimentally to his companion: "I once upon a time had an interest in 4,000 trees that grew here." "How did that happen?" he was asked. "My latest novel," he explained, "had a circulation of 1,600,000 copies, and the paper on which it was printed was made of wood fiber—cellulose—requiring about 4,000 trees."

Utilizing Fish Skin.
In Gloucester the "king town" of fish, the humble cod, has been utilized with success for making leather for shoes and gloves. In Egypt men walk on sandals made from the skins of Red Sea fish. In Russia certain peasant costumes are beautifully trimmed with the skins of a fine cod fish, the turbot. Bookbinders in Europe are binding books with eelskin.

Odd Names.
Fremantle, Western Australia, is a town with some queer names. The mayor is a Cadd, the chief printer is Cant, a contractor named Thick has just sued a local soup preserving company and a man named Offspring Webb was recently fined for keeping an unlicensed dog.

A Seventy Pound Eel.
In the recent storm which raged on the Upper Solway the largest eel ever seen in the district was stranded off Powfoot. It measured 6 feet in length, 25 inches in girth and weighed 70 pounds.—London Daily Express.

Magnetic Needle Untrustworthy.
Over a large area of central Russia the magnetic needle does not point north or south. It is at one part deflected to the west and at another part to the east and at one place it points due east and west.

Insist on Getting It.
Some grocers say they don't keep Defiance Starch. This is because they have a stock on hand of other brands containing only 12 oz. in a package, which they won't be able to sell first, because Defiance contains 16 oz. for the same money.
Do you want 16 oz. instead of 12 oz. for same money? Then buy Defiance Starch. Requires no cooking.

A bushel of potatoes may do more good than a wagon-load of prayer.

Mrs. Winslow's Soothing Syrup.
For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

One never knows a man any better for tearing him to pieces.

Every housekeeper should know that if they will buy Defiance Cold Water Starch for laundry use they will save not only time, because it never sticks to the iron, but because each package contains 16 oz.—one full pound—while all other Cold Water Starches are put up in 1/2-pound packages, and the price is the same, 10 cents. Then again because Defiance Starch is free from all injurious chemicals. If your grocer tries to sell you a 12-oz. package it is because he has a stock on hand which he wishes to dispose of before he puts in Defiance. He knows that Defiance Starch has printed on every package in large letters and figures "16 oz." Demand Defiance and save much time and money and the annoyance of the iron sticking. Defiance never sticks.
