The time to insure your livestock is now when the number is low. They are put in at an average of a fixed amount and when the number is small the cost is correspondingly small. The school board have just published a course of study which they have adopted and which has been approved by the county superintendent of schools. They are comprehensive and up to

The Canton people are invited to be present at the annual meeting of the Hemingford telephone company on the second of next month. It has been suggested that if the southwest line takes up the high line idea the Canton line could buy the right of way for their wire over the line and lessen the cost of coming to town for them and at the same time reduce the cost of a good line to those on the southwest line from town. The above is merely a suggestion made by one of the members of the southwest line.

The Farmers' Institute held here Wednesday was a complete success. Speakers were here from the University of Nebraska. Interesting discussions of the topics most of interest in this locality took place. The public schools were dismissed that day and they had an exhibit of their work in agriculture which was praised by the speakers as the first of that kind which they had been shown in connection with the farmers institutes they had attended. They also said that the work was of a very high order. The Armstrong district was also dismissed for the day and the children took notes of the lectures. These institutes will be a permanent feature hereafter.
