

Stoves ❀ Stoves ❀ Stoves ❀ Stoves

ARE you particular as to the kind of a stove you would use? Were some one to make you a gift of a stove, and not to restrict you to any one particular make, you would undoubtedly select the best stove to be had. You would do this with the view of getting the stove with the points of advantage over all others.

Now, why shouldn't you use the same good judgment when you *buy* a stove? We are showing on our floor, what we think are the **VERY BEST** lines of stoves made, and would ask your careful consideration of them.

..“Estate Oak” Heaters..

The sale on these heaters has been wonderful during the past seven years they have been handled in Alliance. They have merit, hence, are easily sold. The mere fact that they have a large ash pan and door to remove ashes through, appeals to every housewife. The ash pit is jointless, made in one solid piece. The screw drafts and doors have ground edges; fit air tight, and the stove will hold fire for forty-eight hours.

The “Great Western Oak” Heaters

and the “Great Western” full line of stoves, have been on sale here ever since Alliance began to exist. We can refer you to a long list of pleased users of these stoves. We can show you of this line,

- Great Western Oaks
- Mountain Oaks
- Banquet Steel Ranges
- Paris Wonder Steel Ranges
- Wonder Steel and Cast Cooks

- STOVE BOARDS
- OIL CLOTH RUGS
- STOVE PIPE
- DAMPERS
- ELBOWS

- COAL HODS
- SHOVELS

Kindly Listen to a Little Stove Talk.

DO NOT buy a small stove to save money. The fact of a stove being small, doesn't signify that it will burn economically less fuel than a large one. Buy a large stove, it costs more of course, but the larger the stove, the more radiating surface it has, and that is what distributes the heat. You can regulate a large stove to burn a little amount of fuel. But to try to get lots of heat from a small stove, you must force the fire, which sends unconsumed gases out of the chimney, and is a waste of fuel.
