A letter from Wm. Morrow of Rosendoll, North Alberta, Canada, one of The Herald's subscribers in that north land, informs us that that country is on the boom, and wages high. FIRST FLOOR PLAN. SECOND FLOOR PLAN. THIRD FLOOR PLAN.

This design for a commodious apartment house is adapted to a narrow lot, the entire width, including bay, being but twenty-seven feet. The building has been constructed of concrete blocks at a cost of about \$7,000, exclusive of heating apparatus. The whole front, including veranda, may be colored brown sandstone and the side and rear walls left in the natural gray of the blocks, giving a pleasing variety to the perspective. The rooms are all of good size and well laid out. The third floor plan shows divides this story into two suits of two rooms each and three detached rooms for renting separately, but this floor can be arranged as a family flat similar to the second. If rented to several tenants the top floor would naturally be controlled by the occupants of the second floor.

**THOUGHTS ON BUSINESS**

BY WALDO PONDRAY WARREN

**SELECTING A MAN**

PICKING out the right man for the place, it often measures the difference between success and failure in a business. More often it measures the difference between a moderate success and a phenomenal one.

Twenty or more years ago a carriage factory was started with the idea of doing things in an original way, and a man was chosen to carry out the idea. He had had no previous experience in that line, but he had the right idea and grasped the plan enthusiastically. The work began on a simple scale, so that the inexperienced man was able to feel his way. The business grew until it attained great proportions. The same man is still at the head of it, not as the owner, but as the manager. He proved to be the right man for the place. It would be difficult to imagine how he might have made the business more successful in that particular line.

In thinking of this the thought occurred to me, suppose some other man had been chosen in the beginning. Suppose he had had wide experience, but a different idea. He might have made more rapid progress at the start, or he might have turned the whole business into other channels and have given it a different character. He might not have been able to grow up with it, or might have left it after the first year's trial. The present greatness of the business might have been unknown to-day if it hadn't been that the right man was chosen when the business was small.
