PLANS FOR MARKETING WHEAT

Society of Equity Proposes to Sell to Consumers.

They say that they are now concerned altogether in the manner of marketing the product rather than in obtaining a fixed price. They deny that farmers in the pool have agreed to hold their wheat for any particular price.

STEALS TYPE TO START PAPER

Also Confesses to Having Robbed Several Stores at Broken Bow.

Broken Bow, Neb., Sept. 3.—Guy Olmstead, nineteen-year-old journalist, running a monthly publication called The Western Boy, has been apprehended by County Prosecutor Gadd and has confessed to having committed seven burglaries in Broken Bow within a year.

The boy was taken before Judge Humphrey, who released him on bonds and continued the preliminary hearing to Sept. 30. Olmstead had worked in the newspaper offices of the Chief, Republican and Beacon and, as he stated, knew the ground thoroughly. When his time came to act, he "lifted" such a goodly lot of type, paper and other paraphernalia from the three publications that he was enabled to settle in a well equipped office, cut prices on job work and issue his juvenile magazine.

The arrival of a new press about this time caused the other three editors to sit up, take notice and quietly make an inventory of stock. This resulted in a combined raid, and the "Western Boy" was relieved of five cases of type, an endless lot of fine stationery and newspaper "junk" of all description. It was also discovered that about \$40 worth of type, belonging to H. G. Myers of the republican had been shipped away as old metal.

The youthful editor also confessed to having twice robbed the hardware store of George Apple, spirited a speed motor from Conrad & Co., breaking into the millinery store of Mrs. Ellis and robbing a traveling man's suit case at the depot. Editor Myers seems to have suffered the most, as the republican office was in close proximity to that of the "Western Boy," and to transfer the "loot" from one place to the other was quite an easy matter. Young Olmstead is the adopted son of F. M. Olmstead.

The prices of Majestic Ranges are the same, but we give the set FREE with each Majestic Range bought during demonstration week only.

REASONS WHY THE GREAT MAJESTIC YOU SHOULD BUY

- 1st. It has the reputation of being the best range money can buy.
- 2nd. It not only has the reputation, but IS the best range made, and we will prove this to you if you will let us.
- 3rd. It is constructed of Malleable iron (material you can't beat) and of Charcoal Iron (material that resists rust 300 per cent greater than steel), is riveted together air-tight. No heat escapes or cold air enters range, thus uses very little fuel to do perfect work.
- 4th. The reservoir alone is worth the price of the range over any other reservoir made. It boils 15 gallons of water; is heated like a tea kettle, with pocket against left-hand lining, and is movable, and sets on a frame, hence cannot wear out. When water gets too hot it can be moved away from fire.

MAJESTIC RANGES use less fuel; heat more water—and heat it hotter; costs practically nothing for repairs; last three times as long; bake better; easier to keep clean and give better satisfaction than any other range on the market. If you knew positively that the above statements were true, wouldn't you buy a Majestic at once? COME IN DURING DEMONSTRATION WEEK AND WE WILL PROVE IT TO YOU.
