Washington Letter.

BY TAVENNER.

Washington, June 25.—Why is it that the prices of articles on which the tariff was not advanced, has increased since the passage of the Payne-Aldrich bill?

I put this question to United States Senator Mores E. Clapp of Minnesota, one of the genuine progressive Republicans of Congress.

"I can answer that question," replied Senator Clapp. "In less than two minutes, and no one will successfully contradict my statement.

"In the Payne-Aldrich revision of the tariff the rates on scores upon scores of articles were advanced. Those increases have advanced the price of everything; yes, have increased the price of articles on which the tariff was not changed.

"You can't raise the cost of living to a man who is producing something to sell, without forcing that man to raise correspondingly the price of what he has to sell.

"Suppose both of us are in business, and that each has to use what the other produces. Suppose the tariff on the article I handle is increased, while the tariff on the article you handle is not increased. By virtue of my increased protection I force you to pay increased prices. What are YOU going to do about it? What MUST you do about it? Answer: You must increase the price of what you have to sell. And that's just the way it works out all along the line, and in the end all the increases fall upon the broad shoulders of the consumer.

"But you will hear it said constantly with reference to something on which the price has been advanced. 'Oh, that isn't in the tariff at all. That increase has nothing to do with the tariff.' But the fact is tariff revision upward on a few articles reaches all along the line.

"The new tariff law has cost, and is costing the American people millions on millions of dollars, in increased cost of living. And if the Payne-Aldrich bill had been beaten, those millions would have been saved to the people."

Battleships are expensive. Congress has authorized two more battleships. It is estimated each ship will cost \$12,000,000 to build, and \$1,000,000 a year to maintain. The aggregate ultimate cost of each ship, as a matter of fact, is, therefore, \$13,000,000.

The cost of each ship would buy 8,000 farms at \$1,000 each; it would construct 1,600 churches throughout

the country at \$20,000 each; it would furnish the means of education through a four-year course to 16,000 men or women at \$500 per annum; it would build and equip 50 manual training schools with necessary tools and appliances, giving a trade to 75,000 young people each year; it would build a macadam road between Chicago and New York, or build and equip 40 Y. M. C. A. buildings of magnificent proportions, each building accommodating the young men in a city of 200,000 people!

The House passed a bill requiring the publication of campaign expenses before and after election. The Senate took the sting out of the measure by amending it so that it provides for the publication of expenses 30 days after election.

Preparing \$40,000.00 Premium List

Denver, Colo., June 29. One of the bee hives of Denver is in Suite 422 Tabor Opera House Building, where General Manager Petrie and Secretary Fuller of the Inter-State Fair and Exposition have a large force of expert livestock men and clerical attaches preparing for the big show to be held Sept. 3 to 17, 1910. The exposition has become a national affair and the amount of money offered for prizes, \$40,000.00, is bringing entries from all parts of the United States. The horse show in particular promises to eclipse any previous Western effort, yet hardly less can be said of the agricultural and horticultural displays. Big out of door attractions will be announced shortly. The premium list will be ready early in July.

During the Fair the reunion of the Spanish War Veterans will be held and the Rough Riders with Col. Roosevelt at their head will attend the big show.
