

New Grocery Customers

Every business day we have new customers added to our large patronage. There is a reason for this. The most satisfactory thing about it is that they continue to be our customers day after day. That certainly means that we are giving them satisfaction. We study to please our customers. We give them the goods they want, and we send out nice, clean, fresh groceries; neatly wrapped and handled by experienced delivery men who deliver them when promised. Do we make mistakes? Yes, occasionally, for with a business of the magnitude of ours some mistakes must necessarily occur but we always rectify them at once and guarantee satisfaction.

We're ready to take your order—phone 32.

World's Temperance Lesson, Matt. xxiv:32-51.

Golden Text—Watch and pray lest ye enter into temptation. Matt. xxvi:41.

Verses 32-34—What was the event then pending which Jesus here foretells?

What were the signs then present that the Jewish nation would be destroyed?

About how long after this was Jerusalem destroyed, and how was it brought about?

Verses 35-36—Why is the word of God more stable and to be depended upon, than the stability of the earth itself?

When will the heavens and the earth pass away? (See Mark xiii:32.)

Were there some things which Jesus did not know when on the earth, and if so, to what extent was his knowledge limited?

Verses 37-41—How did the people act when Noah was building the ark?

In anticipating the coming of Christ how should we act at the present time?

Take two devout men, one who believes that the second coming of Christ may be any day and the other that it will not be in his life time and state what, if any, different effect it will have upon the righteousness of their lives?

At what stage does eating and drinking degenerate into gluttony and drunkenness?

Compare the evils of a lack of food, and overeating, and state their respective results.

What are the evils of drinking strong drink?

Is it ever wrong for a well-to-do healthy man to marry, or to abstain from marrying? Give your reasons.

Verses 42-43—In how many ways may we look for the coming of the Lord? What do you understand the command, to watch, to mean?

Verses 43-47—Do these instructions and warnings refer exclusively to the final coming of Christ and, if so, how do you account for it that he speaks as though they may expect that event in the near future?

What is it to be ready? Is that person ready who is engaged in wrong doing, or who has a grudge against anybody? Why?

Verses 48-51—Why is not a harsh and cruel man fit for heaven? Why will drinking men and their associates be shut out of God's kingdom? (This question must be answered in writing by members of the club.)

What will become of those who are not ready when the Lord comes? Lesson for Sunday, Nov. 20th, 1910. Jesus in Gethsemane. Matt. xxvi:36-56.

Crippen's Execution Postponed.

London, Nov. 8.—It was officially announced that Dr. Hawley H. Crippen, convicted and sentenced to death for the murder of his wife, Belle Elmore, would not be executed today, as originally arranged, for the reason the law provides that two weeks must elapse between the dismissal of an appeal and the carrying out of the sentence. The execution has been fixed for Nov. 23. Meantime Solicitor Newton, Crippen's counsel, is drafting a petition for a reprieve.

Putting in the Cement.

The middle lock is filled with the disorderly properties of a great engineering job. Steel towers that would hold up a lighthouse are braced to hold the fresh concrete on the growing walls. Ropes, tracks, braces run every where. Men work in swarms tramping the slushy concrete into place in the high steel walled pits, loading cars, setting up shores.

The lowest lock of the three is still noisier, for the work of excavation is not yet finished. By the time the president arrives, however, it will probably be ready for the concrete men to begin their work.

On the Pacific Slope.

The cement plant at Miraflores is just getting under way, and only the floor of the upper lock has been laid.

From Miraflores it is only five miles to the harbor of Panama and four miles more between the islands of the shallow bay to deep water in the Pacific. Here the president will see the site of the great breakwater, which may be carried from the shore as far as Naos island, nearly two miles out at sea.

These islands form one of the objectives of his journey, for there the men in charge of the canal plan to mount the batteries of mortars and disappearing rifles that are to guard the work on the Pacific side. The president, as commander in chief of the army and navy, has the final word as to the placing of the forts.

Striver Dies From Wound.

Little Rock, Ark., Nov. 8.—The first fatality here as the result of the strike of the Iron Mountain machinists occurred when J. C. Werlick, a striker, died. Werlick was shot and wounded in a clash between strikers and strike breakers near the company's shops in Argenta.

Three Children Burned to Death.

Winnipeg, Nov. 8.—Three children of A. Todd, a farmer in the Buchanan Sank district, were smothered to death by smoke when their home caught fire. The parents were absent.

TO INSPECT CANAL

President to Start This Week For Panama.

WILL LOCATE THE FORT SITES.

Excavation Work Advancing So Fast That End of it is Almost in Sight. Chief Executive Will Sail for Isthmus in United States Warship.

Washington, Nov. 8.—President Taft expects to start this week for a visit of inspection to the Panama canal.

The last time he went to the isthmus it was to ask if, after all, the whole canal project might not be a gigantic mistake. That was just twenty-one months ago. Now his errand is to look over fortification sites, to discuss the permanent government of the zone, the rates of toll, the final disposal of the Panama railroad, the suggested government coaling station for ships—to take up the problems of the finished canal. His journey means that the end of the great work is in sight.

Fiction of American Soil.

Like President Roosevelt, the present executive will preserve the fiction that he has not left American soil by making the voyage on an American warship. He plans to sail from Charleston on Nov. 10 on the armored cruiser North Carolina, with its sister ship the Montana for a convoy. The journey each way will take about four days, and the president plans to remain four days on the isthmus.

Steaming into the canal from the Caribbean, there will be little for the president to see, though the work of the dredges has pushed a channel for six miles in from deep water nearly

up to the locks and dam of Gatun. Here is the greatest change the president will see. When he left the isthmus the lock site was a gaping hole in the rock, roaring with the work of drills and rock trains. The cut was three-quarters of a mile long and nearly 400 feet broad.

Today the cut is floored with concrete for two-thirds of its length. The two huge chambers of the upper lock are done, except for a few finishing touches. Alone this lock makes one of the greatest masses of masonry in the world.

MURDERER BURNED AT STAKE

Crowd Storms Jail at Rock Springs Tex., Following Man's Confession.

San Antonio, Tex., Nov. 4.—Antonio Rodriguez of Las Vacas, Mexico, aged twenty years, was burned at the stake by a mob at Rock Springs, Tex., following his confession that he shot and killed Mrs. Lem Henderson, wife of a ranchman, because she "spoke mean" to him. Rodriguez was arrested when he applied at a ranch near Rock Springs for food. The mob stormed the frail structure at Rock Springs, overpowered the guard and took Rodriguez some distance from the city to an already prepared pyre.

Without a show of emotion and offering little resistance, Rodriguez was bound to the stake and the torch applied. When his body was completely incinerated the mob dispersed.
