SOUTH OMAHA MARKETS

CATTLE—Heavy supplies last week broke killing cattle a full quarter, feeders showing little change. Yesterday with 2300 and today 4200, the market has regained 10 to 15c of the decline. \$6.00 was top paid for steers and from this down to \$5.60 with the bulk of short fed and warmed up grades \$5.00 to \$5.50. Light weight cattle still better sellers than heavies. Best 1176 lb. Feeders, \$5.90, bulk being calves, yearlings and 2's at \$5.40 to \$5.65. Heavy supplies of cows and heifers, best \$5.00 to \$5.40; bulk, however, \$4.40 to 4.90 and medium grades \$4.00 to \$4.50, owing to the demand for them as stockers. Cannery rarely sell below \$3.25. Veal calves 25 to 50c lower, top \$8.00, bulk \$6.00 to \$7.00. Bulls also 25c lower at a range of \$4.25 to \$5.00. Believe receipts must continue limited for awhile to allow market to strengthen up.

HOGS—Market decidedly unsettled. Yesterday opened five to 10c higher, closed with advance lost. Today opened steady closed 10 lower, bulk \$7.35 to \$7.50, top \$7.55. Packers are poor buyers on any upturn on account of expected heavy supplies soon and with them lower prices.

SHEEP—Last week's market closed lower on account of heavy supplies and unfavorable eastern conditions. Yesterday with 3000 and today 8000, market sharply advanced 25 to 40c, top lambs bringing \$6.15; yearlings \$4.75; wethers \$4.10 and ewes \$4.15 and a few feeder lambs (warmed up) \$5.50. Believe with continued light supplies, the market will "firm" up but receipts will govern.

Once in a while an individual or a town attempts more than can be done successfully. Sometimes the attempt actually succeeds but more often results in failure. Our defunct electric light plant is a glorious example of misplaced confidence, or something else. It would have been better for Scottsbluff if we had struggled on for a year longer than we did before we had electric lights, for just as we had begun to hope that we had emerged from the darkness of coal oil lamps to real electric lights our firefly factory went punk. Since then we have had to resurrect our old coal oil lamps and stumble around in the dark. But we have hopes that some of these days, in the sweet bye and bye, an earthquake or something else will get that plant or a better one in action.—Scottsbluff Herald.
