

**JOINT LIFE INSURANCE,  
a Very Popular Policy.**

This policy insures two people under one policy. For example, a policy is issued on a husband and wife for one or more thousands. Should the husband die first, the policy will be paid to the wife, and vice versa, to the husband should the wife die first. This costs but a little more than it would to insure the husband only. And a death in the family means an expense of at least \$200. It's almost as expensive to die as it is to live.

**Don't have to die to beat this Policy.**

Should both husband and wife survive the period for which the policy is written, all money paid in will be refunded and then some. We can refer you to Alliance people who have done this. Call and see us and let us explain this, no obligation on your part to take a policy by so doing.

**MORE LORIMER SUBPOENAS**

Summons Are Said to Be Issued for Chicago Millionaires.

Chicago, April 10.—Ten secret subpoenas were served by process servers while the Helm Illinois senatorial committee investigating charges relating to the election of Senator Lorimer was holding a secret session in the LaSalle hotel to determine on its actions for this week.

The committee, it is understood, will force ten millionaires to appear and make admissions or positive denials of the charges that a fund was raised to elect Lorimer. Big financial interests are said to have held a secret meeting to discuss the advisability of seeking to bring pressure to bear upon Lorimer to secure his resignation and thus stop the investigation that may involve large interests and cause a popular clamor that might demand a reduction in the tariffs. These big interests are also said to seek to force an early adjournment of the senate and thus kill the Helm committee.

**ENGLAND FACES NEW DANGER  
Rats Run Rampant, Spreading Terror  
Over the British Isles.**

London, April 11.—Menaces to the safety of England continue to multiply. The German peril is always present; the free trade threat against the integrity of the empire is an old friend; socialist spoliation often clouds the future, and recently the country has heard much about the white bread danger.

The latest source of perturbation is the discovery in England that "the balance of nature has been upset," and that innumerable evils are expected to flow from this dislocation. So many

of the natural enemies of rats have been destroyed that the long-tailed terriers are rampant in every direction and the Associated Chambers of Commerce are advancing in a solid phalanx against the rodents.

"Incredible though it seems," says Secretary Matthews of this organization, "the country suffers from rats to the extent of \$75,000,000 annually. Nor is the plague of rates the only sign of the disturbed balance of nature. The board of agriculture has ordered a general attack on the migrant pigeons, which are descending by hundreds and destroying whole clover fields in various parts of England. Rooks, larks and starlings, some working in one place and some in another, have more than decimated the wheat fields."
