

# Vanadium Steel Makes the Ford Strong, Light and Dependable—The Car for You to Buy

FOREDOOR TOURING CAR

We have ordered seventy-five Fords for the year 1912. Thirty-eight of them have already been sold and delivered. No other car has one-fifth the sale in the same territory. Our customers are our best advertisement. Every Ford owner is a Ford booster. Why? Because of the fact that every Ford car gives perfect service and absolute satisfaction. The Ford car is very light. This result is secured by the use of Vanadium steel throughout. Vanadium steel is

the toughest and strongest steel made. Ford owners do not fear breakdowns and heavy expense for repairs.

The Ford can be run for less than one-half the expense of the ordinary heavy car. Its powerful little engine has ample power to take the car anywhere at any time—through sand, mud or snow. Ford cars frequently get 10,000 miles or more of service from a single set of tires. The ordinary car gets about 3,000 miles or less than one-third the service.

Every Ford dealer carries a complete stock of parts, ready for instant delivery. No waiting to send to the factory for needed parts in case of accident. No trouble in fitting them, either, for every one of the 75,000 Fords made this year are exactly alike. Every part is interchangeable.

The Ford dealer sells from three to five times as many cars as the other dealer. His commission is only about one-half that of the other dealer. This saves you money. The fact that Ford builds 75,000 cars in his factory enables great saving in cost to be made. Another big saving for you. You cannot get Ford quality and service in any other car at double the price.

Hundreds of firms are adopting the Ford delivery car in place of horses for delivery work. One car will do the work of several wagons at much less expense. Investigate.
