We Welcome Woman and Her Suffrage

if through it she will accomplish a greater interest in good homes and set higher ideals for the youth of our country. By instinct woman is a home builder because she realizes the good influence it has on the children, and you men would be terribly surprised if you knew as well as we do what good common sense ideas they have on arrangement and in the choice of lumber. They know that our smooth finished siding and casing, base and moulding is a labor and money saver because it requires no extra work from the carpenter or painter, and their taste in the selection of doors and windows usually adds beauty and attractiveness at little extra expense. If you're thinking of building we want to talk to both you and your wife and help you select your lumber.
