## Sweep Your Floor with Paroline

In the office, store and home the most disagreeable nuisance is dirt and dust caused by sweeping. This can be avoided by using Paroline.

Paroline is a scientific compound of vegetable oils and other substances. You sprinkle a small amount on the floor before sweeping. It gathers up and holds the dust. It is antiseptic and prevents disease.

Paroline costs very little. A small amount goes a long way. Use it once. You will wonder why you didn't get it sooner.
