Studebaker

The Car for You

We are offering Studebaker Four and Six models—an automobile that will fill substantially every point to be desired in a car. The lines of both these models are classy incorporating the up-to-minute designs. The equipment includes only the standard makes.

In the construction of the car the safety principle has been given the utmost consideration. Special attention is called to the Studebaker rear axle, an adjunct to safety that is not surpassed in any car at any price. The Studebaker full floating axle is not to be compared with any of the "semi-floating" or "three-quarter floating" types. It is an axle which is scientifically heat treated alloy steel giving a margin of safety of more than 30,000 pound inches. It has the "Timken" bearings which add greatly to its efficiency. It is an axle that defies wear and shock. You may wonder at the special emphasis placed on the rear axle. But consider a moment the load it carries and you will realize why we feature this point. Call and let us explain in detail its value as well as the other features of the Studebaker that makes it the car for you.
