### Lloyd's Column

"So should we live that every hour May die as dies the natural flower— A self-reviving thing of power; That every thought and every deed May hold within itself the seed Of future good and future meed."

#### A Stupefying Question

Pretty Girl—All the girls in our set are going to be vaccinated tomorrow night. Do you know where? Bashful Youth (blushing deeply)—Really—I—I couldn't—er—um— Pretty Girl—Oh you'd never guess in the world. We are all going to meet at Cousin Clara's house, and be vaccinated there.—New York Weekly.

#### Her Alimony Explained

Miss Curley kept a private school, and one morning was interviewing a new pupil.

"What does your father do to earn his living?" the teacher asked the little girl.

"Please, ma'am," was the prompt reply, "he doesn't live with us. My mother supports me."

"Well, then," asked the teacher, "how does your mother earn her living?"

"Why," replied the little girl, in an artless manner, "she gets paid for staying away from father."—London Evening Standard.

#### To Live Long

Fix deeply in mind the grand truth that life power rules the body, and that it alone can cure disease. Life power lives on air, water and food only; everything else is hurtful.

Make cleanliness your motto, and watch against filth in both house and grounds.

Few starve for food, but many for air. Breathe deeply a hundred times daily. Wear no tight clothing. Above all, ventilate your sleeping room. Beware of gluttony. If the appetite is dull, eat fruit only, or eat nothing. Use no fiery condiments, but live chiefly on natural grains, vegetables and fruits. Never ask your stomach to chew your food—employ your teeth. Adorn your table not only with viands, but with flowers and smiles and kindly words.

Deformity is not awkwardness only, but danger. A high chest will give freedom to breathing and digestion, and help to cure many diseases. Thick blood causes colds and countless other diseases. Keep the lungs active by deep breathing, the skin by baths and friction, the kid-

neys by free drafts of warm water, the bowels by correct eating, and the blood will be pure.

Spend part of each day in muscular work, part in study and part in good deeds to men.—New York Weekly.
