Caught Drug Fiends
L. L. Kish, special agent for the Burlington, was called to Holdrege last Thursday by a message stating that men around the railroad yards were acting in a suspicious manner. He went down and arrested two

men who were found to have on them, when searched, over \$100 worth of cocaine and morphine, with a big supply of hypodermic needles and five masks. Both were dope fiends and were supposed to have been selling the drugs. As the pos-

session of dope constitutes a violation of the new federal law, Mr. Kish turned the men over to the federal authorities at Lincoln.

A CONFIRMED STATEMENT

Evidence Alliance Readers Will Appreciate

Doan's Kidney Pills have done splendid work in this locality. Have merited the unstinted praise they have received.

Here's evidence of their value that none can doubt.

It's testimony from this locality twice-told and well confirmed.

Such endorsements are unique in the annals of medicine.

Should convince the most skeptical Alliance reader.

George Busick, Gordon, Nebr., says: "I had a great deal of trouble from irregular passages of the kidney secretions and I also suffered from attacks of lumbago. Often the pain and lameness in my back was so acute that I was unable to stoop or do any kind of work. Doan's Kidney Pills cured me in a short time and the cure has lasted. I am glad to confirm the endorsement one of my family gave Doan's Kidney Pills in my behalf some time ago."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Busick had. Foster-Milburn Co., Props., Buffalo, N. Y.

FIFTY-SEVEN of the best known automobile engineers in the country met recently to design what would be an ideal automobile. In making up the specifications for this car they considered every detail which would appeal to an automobile owner driving his own car under average conditions.

Chesterfield Six \$1650
Light Four \$1450
Six-48 \$2400

The completed car called for a full French streamline body, a worm drive rear axle, four-speed transmission; cantilever springs; two-unit, six-volt electric starter; three plate dry disc clutch; one-man top; high-speed—high-efficiency six-cylinder motor, with cylinders 3" x 5"; leather couplings in the drive system; a pump operated water cooling system; high tension magneto; left drive with center control; full floating rear axle and weight less than 3000 pounds.

One of these engineers who called at the Jeffery factory last week said, "This Jeffery Chesterfield Six is exactly like the ideal car we designed at our last meeting."
