FINE SEED POTATOES

Have a car of Minnesota Red River Ohio seed potatoes ordered. They are free from scab and dry rot. Each farmer should get enough to plant five acres this year. It will not cost you much to get enough for five acres and it will pay you big to get pure seed that command a better price on the market when you raise them to sell. I have given Mr. Seidell a sample of this seed. Ask him his opinion on this seed and to show you the sample. Place your order with me at once for your amount. Delivered price if taken off the car is 90 cents per bushel sacked.

Kinkaid Visits Alliance

Congressman Moses P. Kinkaid arrived in Alliance at noon Sunday, staying over until noon of the next day. He had been at Gering attending a meeting of representatives of the owners of lands on the south side of the river and government irrigation experts. This meeting was for the purpose of considering the building of the south side canal which will start near Guernsey, Wyoming, and will run down into Nebraska, covering about 250,000 acres of land. The necessary number of signatures of owners of lands has about been secured and it is probable that work will soon start on the project. The congressman visited with friends while in Alliance.

The work of signing up new members for the coming year has been very satisfactory so far, there being no refusals of old members to sign up for the next year and several new members coming in who held out last year but who have seen the phenomenal results achieved during the past year. The budget system has eliminated the former custom of going around to the business men several times each year and taking subscriptions for public work.

Over 90 per cent of Business Men Fail

Men fail in business because they do not know the game. They lack system and a thorough knowledge of their business. The reason why so many would-be farmers fail is because they know little or nothing of the science of farming. They think anybody can farm and then are surprised to find that their crops will not grow. The farmer who is always behind, who always has bad luck with his crops, is the man who farms by guess and trusts to luck. If he were in the mercantile business he would be in the hands of a receiver within a year. He is a failure but he hangs on because the poorest farmer can get a living out of the land if he only plows and sows the seed.

An Agricultural Education

The first thing a young man who intends to go into business should do is to take a course in a business college. Here he can become familiar with the first principles of business, without which he will fail. The first thing a man who expects to farm should do is to take a course in an agricultural college, if he can, but if he has not the time or the money to spend in a two-year course, he can get the same instruction at home by taking a course in the Campbell Correspondence School of Soil Culture. Everything is furnished—books and all—at a very slight cost, and the best thing about it, he does not have to leave the farm or his work.

He can choose from the following courses: Soil Improvement Course, Horticultural Course, Small Farming Course, Cereal Culture Course, Dry Farming Course, Farm Engineering Course, Soil Tillage Course.

Summer is the time to study agriculture, and the farm and garden is the laboratory in which to work out the problems. Don't wait for fall or winter to begin, but get busy now. You will learn more in one summer applying your instruction in the fields than in a dozen winters sitting by the fire.

Send for our catalog Number 3. It will not cost you a cent.

They were held without bond in accordance with the recent Harrison Drug Act, which prohibits anyone but druggists from having "dope" in their possession. It is thought that the Belfe family headed a trust in Denver, and that the recent arrests will put a stop to it.

Killing Prairie Dogs

Is your land infested with prairie dogs? Is your range damaged and your crops endangered with this pest? For thirty-five years I have been killing these pests with a method of my own that does the work quickly and surely. My outfit will operate in western Nebraska during the coming season.

Anyone desiring the prairie dogs on their land killed should communicate with me without delay. My contract price for the work is only thirty-five cents per acre and I charge only for the ground that is infested with the dogs. I will sell the rights for this business for this part of Nebraska to any reliable person or persons.

Call on or write me at the Nebraska Rooming House, in Alliance. If I am not there you can see my representative. Or call at The Herald office and they will locate me for you.
