The business session was ial conveyance drawn by four horses. delayed until Wednesday on account In the afternoon Senator Hitchcock of the inability of W. G. Condit, state profitably by viewing the city and at-

tending the carnival. The session was held in the district court room. Many topics of interest to the officers were discoursed. including the recent legislation in their behalf. Among this legislation is the new mileage law, which helps the sheriffs considerably. Owing to the many attractions in town, including the races and auto polo at thefair grounds, the meeting was shortened considerably, and a sort of adjourned session will be held in North-Platte in December, at which timethe finger print system and other important matters will be discussed. and the officers for the ensuing year will be elected.

Chadron was the successful bidder for next year's convention. Hastings was the only other town that was voted upon.

The meeting was a decided success even though it was a short one, and the visitors were profuse in their compliments regarding the reception tendered them in Alliance. Most of them are staying the remainder of this week. This evening a smoker will be

given in the new Elks home in honor of the sheriffs, and a fine time is anticipated. Tuesday afternoon the visitors were treated to an automobile ride over the city, and those who had not been in this section of the country for several years marveled at the changes that had taken place. not only in the business section but

Fords Are Going Fast

Last week the Keeler-Coursey Co. received a new carload of Fords, but all the machines were spoken for before they were received. Those who held off on buying on account of the rebate now seem satisfied they will get the money, and are getting a lively movement. However, this idea seems general over the United States and for that reason the Ford factory is many thousand cars behind on their orders, even though they are Dr. Jackson. He has also been hon- nesday and is now ready for business turning out machines at the rate of about four a minute.
